FULL EXPLANATIONS

This "Richards Atlas" of Springfield is the most complete we have ever issued here, being the third edition. The first edition was issued in 1896, the second in 1910.

The official records in the Assessor's Department, Water Department and Department of Streets and Engineering, at the City Hall, were carefully consulted, as well as those at the County Registry of Deeds.

The figures in the streets are always the house numbers. The figures in the lots are the numbers as on record at the Registry of Deeds.

The owners' names are printed on the maps in the business and farmers districts only. All owners' names are printed by streets in the back of the Atlas. The figures before each name are the house numbers, and those after are the acres in square feet or acres (A for acres). This additional feature of the streets makes the Atlas more complete than our former editions.

The owners' names are subject to constant change, and have always been a great source of trouble to all publishers; hence publishers are bearing the names not exactly of their owners, but we have retained this feature as an index in the back of the Atlas, similar to our atlas of Worcester, Providence, Portland, Me., and other large cities.

We wish to thank all city officials and their assistants, whom we have consulted, for aiding in giving us information. We wish also to thank all our subscribers whose support has made it possible for us to publish this useful work.
