## The Commonwealth of Massachusetts

In the Year One Thousand Nine Hundred and Seventy-Five.

AN ACT REQUIRING THAT THE DEPARTMENT OF YOUTH SERVICES REPORT BACK TO THE COMMITTING COURT CERTAIN INFORMATION ABOUT JUVENILES UNDER ITS SUPERVISION.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1 Chapter 120, section 12, of the General Laws is hereby  
2 amended by inserting after the words: "The department may  
3 direct release under supervision at any time, and may place  
4 children in its custody in their usual homes or in any situa-  
5 tion that has been approved by the department;" the words,  
6 "except that no child shall be returned to his own home im-  
7 mediately after commitment and diagnosis without the knowl-  
8 edge and approval of the committing court."

The following figures are arranged in the order in which they were taken, and are numbered in accordance with the order in which they were taken. The figures are arranged in the order in which they were taken, and are numbered in accordance with the order in which they were taken.

### The Development of the Embryo

1. The first stage of the development of the embryo is the formation of the blastula.

2. The second stage is the formation of the gastrula, which is characterized by the appearance of the three germ layers: the ectoderm, the mesoderm, and the endoderm.

3. The third stage is the formation of the neurula, which is characterized by the appearance of the neural tube.

4. The fourth stage is the formation of the somites, which are the precursors of the muscles and vertebrae. 5. The fifth stage is the formation of the heart, which is the first organ to be formed. 6. The sixth stage is the formation of the lungs, which are the precursors of the respiratory system. 7. The seventh stage is the formation of the digestive system, which is the precursors of the stomach and intestines. 8. The eighth stage is the formation of the reproductive system, which is the precursors of the testes and ovaries. 9. The ninth stage is the formation of the nervous system, which is the precursors of the brain and spinal cord. 10. The tenth stage is the formation of the skeletal system, which is the precursors of the bones and cartilage.
