

High School Dropouts 2007-08 Massachusetts Public Schools

The annual high school dropout report represents a snapshot of those students who dropped out of school in any given year. The data contained in this dropout report reflect one year of dropout data across grades nine through twelve and not a particular cohort of students across four years. This report provides annual dropout data to education leaders to develop and strengthen dropout prevention programs in the state. To serve this purpose well, the Department has made several refinements to the dropout calculations over the past few years. Some of these refinements, summarized below, make it difficult to make year-to-year comparisons.

Please note that the Department has also calculated and released graduations rates for the 2008 cohort that provide a more complete picture of the outcomes of high school students in Massachusetts. It is important to keep in mind that the dropout data contained in the graduation rate reports is a cohort dropout rate and shows the cumulative effect of students dropping out over four years. The graduation rate reports can be viewed at: <http://www.doe.mass.edu/infoservices/reports/gradrates/>.

In the 2007-08 school year, 9,959 or 3.4 percent of students in grades nine through twelve dropped out of school.

The Department did not make any major changes to the Student Information Management System (SIMS) data collection in the 2007-08 school year. However the fluctuation in dropout rates between 2004-05 and 2006-07 can be attributed to two significant modifications. These modifications in the dropout calculation provide more comprehensive information on dropouts to help inform policy and programmatic decisions.

In the **2005-06** school year, the Department began to cross-reference SIMS data with the General Educational Development (GED) Testing Service database. In prior school years, the Department relied solely on district notification regarding students who received their GED. As a result, the Department more accurately tracks students who drop out of high school and then earn a GED therefore decreasing the number of students who are considered final dropouts.

In the **2006-07** school year, the Department modified the SIMS data element, *Enrollment Status at Time of Data Collection*. In prior years, districts would report the number of students who indicated that they were transferring to another district and the Department excluded them from the dropout calculations. The expanded dropout and transfer codes provide additional information to the Department on students' plans after leaving the district. Those students who were coded as a transfer to an in-state public school with no record of re-enrollment in another school district before October 1st of the following school year are now considered to be dropouts.

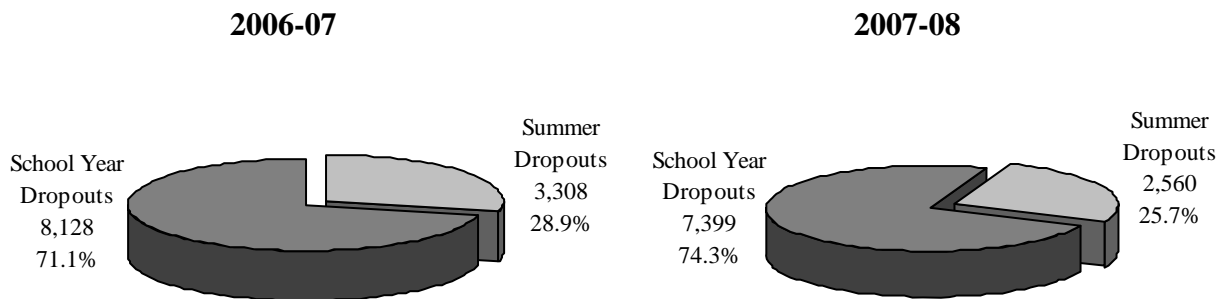

¹ Due to changes in the Student Information Management System (SIMS) summer dropouts were not included in the analysis, therefore resulting in an underreported dropout count.

Table 2: Final Enrollment Status of the 2007-08 Dropout Count

Code	Final Enrollment Status	Number of Dropouts	Percent of all Dropouts
Transfer	Transfer to an in-state public school (with no record of re-enrollment)	1,998	20.1%
Dropout	Enrolled in a non-diploma granting adult education program	1,407	14.1%
	Entered Job Corps	240	2.4%
	Entered the military	25	0.3%
	Incarcerated, district is no longer providing educational services	96	1.0%
	Left school due to employment	407	4.1%
	Confirmed dropout - plans unknown	3,298	33.1%
	Student's status/location unknown	2,488	25.0%
Total Dropout Count		9,959	100%

The final dropout count is based on two groups of students; summer and school year dropouts. Summer dropouts were reported in the October 1, 2007 SIMS submission as a dropout or a transfer to an in-state public school (with no record of re-enrollment) prior to the beginning of the school year, whereas school year dropouts were reported as either a dropout or as a transfer to in-state public (with no record of re-enrollment) during the school year. For 2007-08, the percentage of summer dropouts decreased while the percentage of school year dropouts increased compared to the 2006-07 dropout count.

Figure 2: Comparison of the Summer and School Year Dropouts Composing the Total Dropout Counts in 2006-07 and 2007-08

Beginning in the 2003-04 school year, in compliance with the National Center for Education Statistics reporting guidelines, summer dropouts were applied to the grade in which they failed to enroll. Therefore, students who completed grade eight but did not enroll in grade nine were included in the analysis as grade nine summer dropouts.

Beginning with the class of 2003, the Department required students to meet or exceed the “Needs Improvement” threshold of both the English Language Arts and Mathematics sections of the grade ten Massachusetts Comprehensive Assessment System (MCAS) to receive a Competency Determination (CD) in order to graduate from high school with a diploma. Students who did not pass the grade ten MCAS had the opportunity to pass the MCAS through re-test opportunities before their scheduled graduation date. Among both grade eleven and grade twelve dropouts, 61.5 percent had earned a CD before dropping out of school.

	Male	150,408	50.8%	5,669	3.8%	56.9%

Although the rates for both Native American and Native Hawaiian students increased in the 2007-08 school year, it is important to note that these groups were more prone to rate fluctuations due to the smaller number of enrolled students than the other race/ethnicity categories. Dropout rates for all other selected demographic populations decreased compared the 2006-07 school year.

² In the 2003-04 school year, the Department removed the data for students expected to enroll in grade nine due to an incomplete data collection. The Department presumes that if the grade eight missing students were included in the summer dropout count, the grade nine dropout rate in 2003-04 might be slightly higher.

³ In the 2005-06 school year, the Department changed the race/ethnicity categories to comply with the federal Office of Management and Budget reporting guidelines.

The state dropout rate masks the wide disparity in individual school annual dropout rates, specifically the number of schools that have dropout rates below the state rate. The following chart illustrates the distribution of school dropout rates

⁴ Represents the number of schools in the category in the 2007-08 school year.

⁵ Represents all charter schools with enrollment in grades nine through twelve, including those whose primary mission is to serve at-risk students

⁶ As defined by the incorporation status within the Commonwealth of Massachusetts.

⁷ Only includes schools with enrollment of 75 students or more as dropout rates for schools with low enrollments are overly sensitive to small variations.

Methodology

Population

The dropout calculations were derived from the population of students enrolled in grades nine through twelve in Massachusetts public schools. High school enrollment was based on the October 1, 2007 SIMS submission. The dropout count was collected during all three SIMS submissions and then checked against data submitted by all other districts.

Definitions and Calculations

The Department applied a dropout measure that was developed by the U.S. Department of Education. A dropout is defined as a student in grades nine through twelve who leaves school prior to graduation for reasons other than transfer to another school, and does not re-enroll before the following October 1. Students considered to be dropouts were checked against data submitted by all other districts. If student dropped out and then re-enrolled in another district, the student was not considered a dropout.

The dropout count was based on two groups of students:

Summer Dropouts: Students who were reported in the October 1, 2007 submission as a dropout or a transfer to an in-state public school (with no record of re-enrollment) prior to the beginning of the 2007-08 school year.

School Year Dropouts: Students who were reported as either a dropout or a transfer to an in-state public school (with no record of re-enrollment) during the 2007-08 school year.

Beginning in the 2003-04 school year, in compliance with the National Center for Education Statistics reporting guidelines, summer dropouts were applied to the grade in which they failed to enroll. For example, a student who was reported as enrolled in grade ten at the end of the 2006-07 school year, but fails to enroll in the 2007-08 school year, was counted as a grade eleven dropout because the student completed grade ten. Although the revised 2002-03 dropout by grade data were used in this report, previous school years' dropout by grade figures have not been modified in accordance with the guidelines.

According to the U.S. Department of Education dropout measure, students who dropped out during a particular reporting year, but returned to school, graduated or received a GED by October 1 of the following year were not counted in the final dropout count; these students are referred to as returned dropouts. The final dropout count equals students who were considered to be dropouts at the end of the 2007-08 school year (preliminary dropouts) minus all returned dropouts.

Figure 1: Final Dropout Count Calculation

Final dropout count = Preliminary Dropouts (Summer Dropouts + School Year Dropouts) – Returned Dropouts

Example for the 2007-08 school year:

State final dropout count for 2007-08 = (3,142+ 10,429) – 3,612 = 9,959

A dropout rate is the frequency that a dropout occurs within a defined population. The Department calculates the annual dropout rate as the number of students who drop out of school over a one-year period, minus the number of returned dropouts, divided by the October 1 grade nine through twelve enrollment, and multiplied by 100. For the 2007-08 school year, the one-year period was from July 1, 2007 to June 30, 2008.

Figure 2: Annual Dropout Rate Calculation

Annual dropout rate =	$\frac{\text{Final dropout count}}{\text{October 2007 Grade 9-12 enrollment}} * 100$
<i>Example:</i>	
State annual dropout rate for 2006-07 =	$\frac{9,959}{295,937} * 100 = 3.4 \%$

*Starting in the 2004-05 school year, the Department credited a dropout to a school if the student who dropped out attended a school with high school enrollment. Conversely, if a grade nine summer dropout attended a school without grade nine enrollment then the dropout applies to the district only. A ninth grade summer dropout who attended a school and that had enrollment in grades six through eight then dropout would be applied to the district only.

Note: For the 2007-08 school years, schools without data indicate that data were suppressed due to a high school enrollment of under six

For the 1998-99 through the 2006-07, school years, schools without data were either suppressed due to low enrollment or were not open for that year (s).
