SELECTMEN’S REPORT.

It will be seen by the Treasurer’s Report, that a very much larger sum has been expended during the last financial year, for the grading of new roads, than has been paid in the same period of time, within the memory of the present Board, or possibly since the settlement of the town.

The widening and grading of Orchard Street, as ordered by the County Commissioners, we regard as an improvement which “convenience and necessity,” both demanded. There is now sufficient breadth for side water courses, with a road of suitable width between; and we trust, that in future, there will be less cause for complaint among those who are accustomed to pass to and from the new town of Norfolk, over this Avenue.
The road, as laid out and accepted by the town, from Main to Foundry Street, has not, for reasons which follow, been placed under contract to grade. It was accepted at the meeting of the Town in November last, and two months allowed to the owners of the lands through which it was laid, to remove their wood and timber from the line of the location, which brought it to a season of the year, when road making is impracticable. We recommend early attention to the finishing of this much needed improvement.

The condition of our public roads, it is believed, will compare favorably with the roads in our vicinity: but the query has arisen whether, or not, there was a growing tendency on the part of some, at least, of the town's authorized agents, the Surveyors of Highways, to neglect some of the lesser travelled streets, and expend the money appropriated for "repairs of highways," in amending only a portion of those within their several assignments. It would seem to be the imperative duty of those who are intrusted with this charge, to carefully examine all the highways and bridges within the limits so assigned to them, respectively, and give their first and immediate attention to all places, manifestly hazardous and unsafe for public travel. The manner of repairing highways, has been often a subject for discussion at our annual meetings, and opinions yet differ as to the best mode, though it is generally conceded, that our present practice is a decided improvement on the old system of each "working out his taxes"; yet there may be room for still further improvements.

Our Fire Department has been called out but once during the year, when a building was on fire, and in that case, only a comparatively slight and partial loss, was sustained by the owner. When we recollect the extreme drouth that so long prevailed, and frequency of extensive and destructive fires in other localities, we cannot but be thankful, that we have been so exempt from these terrible calamities.

From a particular examination of the bridge, familiarly known as the "Great Bridge," though not considered immediately unsafe, yet we think it needs careful attention, and at the proper time, thorough repairs.

By Chap. 45, Sec. 2, of the General Statutes, the Selectmen of each town are required, "to submit to the inhabitants at every annual meeting, a report of all the places where guide posts are erected
and maintained within the town, and of all places at which in their opinion, they ought to be erected and maintained.

The duty required by this statute, so far as it applies to this town in the practice of it, has been very much, (though not maliciously,) neglected. That guide posts have been erected and maintained at such places, as has been deemed necessary and convenient to have them, is a fact well known to the "oldest inhabitant," though no "report" may appear on our records. In a town of such small area as our own, nearly every legal voter, could in his own home, write a tolerably accurate description of these "helps to our dumb animals." Some new Posts and Boards are at present needed, to supply the places of somewhat decayed old ones, and most of the remaining boards, need new painting and lettering.

Permanent bounds at the termination and angles of the new roads, have not as yet been placed. It was thought advisable to delay, until a contract could be made for a supply for all the recently located roads; and as accurate surveys have been made in each case, which are on file, together with plans of the same, no difficulties will be experienced in hereafter determining the points for such bounds.

CHARLES HAMANT,
WILLIAM C. ALLEN,
ALONZO B. PARKER.

Selectmen.

MEDFIELD, FEB. 1, 1871.
REPORT
OF THE
SCHOOL COMMITTEE
OF THE
TOWN OF MEDFIELD,
FOR THE YEAR 1870.

The Schools of this town have been generally successful during the past year. This, however, cannot be said of the

HIGH SCHOOL,

which is now in a very unsatisfactory condition. A school of this kind, properly conducted, is a great benefit to any town, and particularly to a town like our own, containing as it does, but one village, thus rendering the school-house easily accessible to all qualified to attend. Such a school infuses throughout the community, an air of culture and refinement, and opens for all its youth, an opportunity to rise in the world, and take important and honorable stations in life. The High School, as now kept, is useless for any purpose for which it was intended. Without dwelling upon the unsuccessful management of the school, or commenting upon the disorderly conduct of the scholars, we call the attention of the public to what we consider the prime cause of failure, namely, a want of a

STANDARD FOR ADMISSION.

It is impossible for one teacher to properly conduct a school of sixty-nine scholars, with an average attendance of sixty. This fact is recognized by the law which has wisely provided, that,

"In every public school, having an average of fifty scholars, the school district or town to which such school belongs, shall em-
ploy one or more female assistants, unless such district or town, at a meeting called for the purpose, votes to dispense with such assistant." Gen. Stat. Chap. 38, Sec. 9.
The committee, therefore, deem it necessary to adopt a standard for admission, and to exclude all who upon examination, fail to reach that standard. By so doing, they believe the number of scholars will be so materially diminished, as to avoid the necessity of employing an assistant, which would otherwise be absolutely necessary to any degree of success. The idea seems to be prevalent, that it is a great honor to a child to be sent to the High School, and parents are continually sending their children before they are qualified, a course detrimental to the welfare of all the schools.

EXAMINATIONS.

The system of "cramming" a school for an examination, in order to make a mere show, is something which ought not to be allowed. The object of an examination is to exhibit the result of the term's work, and not to display to an unsuspicious audience of parents and friends, the brilliant manner in which a scholar can rattle off a half page of Grammar or Geography, or rush through a problem in Arithmetic, to the accomplishment of which, he has devoted all his time and energy for two or three weeks, and which has been ringing in his ears, until he cannot forget it if he would.

CORPORAL PUNISHMENT.

This is a subject which has given rise to much discussion, within the past few years, and one which ought to receive serious attention. The whipping-post has long since disappeared from our midst. Flogging, in the Navy, was abolished by Congress more than seventeen years ago. Whipping has ceased in the State prison and penitentiaries of Massachusetts, for more than ten years. In Prussia, Austria, France, and Holland, and in our own State of New Jersey, children in schools are protected by law. In the Massachusetts Legislature of 1868, the Committee on Education presented two reports. In the majority report they say, that while they are convinced that the practice of corporal punishment is unwise, unnecessary, and demoralizing in its effects upon both teachers and scholars, nevertheless, believing that full power to banish it from our public schools, is now vested in school committees, and further that the time and manner of dealing with the question, should be left to their
discretion, they report that it is inexpedient to legislate on the subject. The following extracts, are taken from testimony and letters contained in the minority report, which favored entire abolition by law.

Dr. Wyman says:—

"Corporal punishment is unnecessary.
The best teachers govern without it. It benefits poor teachers only, and these are not wanted in our schools.

Corporal punishment of marriageable females is practiced in the schools of Massachusetts for failure of a lesson. Such practice should be made a misdemeanor and the remedy summary, because it is unnecessary and shocking to the community.
The sensitive, delicate and good children, who are in fear of being whipped for failures, are most likely to fail, and therefore most likely to suffer.
The delicate and nervous in their organization, are most likely to be uneasy and therefore to be whipped for the organization given them by their Creator.
Children cannot chose their teachers; they must submit to suffer in body and mind if the teacher is unskilful; the suffering of the body can be prevented by the enactment of a law, and the unskilful will be driven from the profession. Children should be protected by statute law from bad teachers as the community is protected by law from bad men.

It is not in accordance with the present stage of civilization in this State.
There is no more reason to believe that school children cannot be governed without the whip than there was that sailors, or negroes, or felons could not be governed without the whip.
Arguments for the continuance of the use of the rod drawn from the practice of a half-civilized nation more than 2,000 years ago, are not available at the present day.
What shall be done with incorrigible children? The same that is done under the corporal punishment system with incorrigible children, and it is claimed that fewer children will be found incorrigible under a system of kindness, reason, and restraint, than under a system of corporal punishment.
If a child is injurious to the school he should be removed, for good children have more rights in school than bad children. If a female is so incorrigible as to require corporal punishment she is an unfit associate for good girls.
If a child commit an offence against the law and become a criminal, he should be placed in the hands of the proper law officers. Schoolmasters should be the friends and teachers of youth, and not policemen."
Professor Agassiz, says: —

"My opinions on the subject are very decided, and those opinions are in opposition to corporal punishment. I believe the sooner we break away from this custom, the better it will be for the pupil, better for the teacher, better for society, better for the community, and better for the general advancement of education and knowledge. I have been a teacher all my life, and have taught in all grades of schools, both public and private. I have had under my instruction children of all ages, and never resorted to the rod, or any objectionable form of punishment. I am opposed to corporal punishment, in schools of all kinds, and under all circumstances. No good influences can possibly arise from such a system. It is demoralizing alike to teacher and pupil. It must be humiliating for a teacher to look back and remember that he had employed such a system in his teaching. I have a distrust of, and antipathy for, any teacher who cannot control a scholar without whipping. It is an established fact that education is practicable without physical punishment. All acknowledge that we have in the community, competent and successful teachers, who never use the rod. The knowledge and power of dismissal or suspension would be a restraint on disorderly inclined pupils. If I had charge of a large school in which there were disorderly or unruly children, I would require them to leave their seats, place them near the teacher and in front of the school, and endeavor to reform and discipline them by kind and conciliatory means. If this course failed of the desired result, I would call in a policeman, and have them removed from the school. I have had children as young as four years under my instruction, and have never used corporal punishment. I would not degrade myself by such discipline with any human being."

Edward Shippen, Esq., President of the School Board of Philadelphia, and formerly a teacher, says: —

"I am amazed upon reflection that I ever degraded my pupils, myself, and my calling by raising my arm to strike a child into whose nostrils God had breathed the breath of life; in whose mind and heart he had planted faculties and feelings susceptible to the slightest touch of kindness. Every blow inflicted was a public impeachment of my fitness for the position to which I had been called."

The Rev. James Freeman Clark says: —

"Whipping is a barbarous and brutal punishment which the civilized and Christian world has outgrown. As we have abolished whipping everywhere else as a punishment, we ought to abolish it
also in our schools. As we do not find it necessary to use it in the
government of men, we ought to be able to govern little boys and
girls without it.

There are two classes of teachers. There is the teacher who leads
and the teacher who drives. The one goes before his flock, and it
follows him. The other goes behind it, and it flies before him. In
the East, on the Syrian hills, you will meet one of the former class,
walking calmly on, all his sheep following him, and even when two
shepherds and their flocks meet, they never become confused or
mixed, for each sheep knows the voice of his shepherd. But on the
roads leading to Brighton, you may see examples of the other, a
tumult of sheep running wildly before their drivers, who follow them,
screaming, beating and yelling. The Eastern flock of sheep is the
type of the school governed by reason and love — the other of that
which rests on the rod.

It is not talking about whipping, it is the whipping itself, which
throws an odium on teachers. The profession can never be elevated
to its proper dignity, while it is made a part of the duty of a teacher
to brandish the rod. From the time of "Mr. Vindex" in the "Fool
of Quality" to that of "Mr. Squeers" in "Dotheboys Hall," satire
and ridicule of teachers have been founded on their use of the ferule.
In conversation with Professor D'Arcy Thompson, the distinguished
writer and lecturer on education lately among us, he expressed the
opinion that teaching could never be raised to the rank of a profes-
sion, while whipping was continued in schools. Public contempt,
in a greater or less degree, he remarked always attaches to any
whose office involves inflicting physical pain on others. Hence
hangmen and public executioners, and the familiars of the torture-
room in the Inquisition, have always been objects of popular odium.
The reform in which we are engaged will do more than any other to
elevate the character of teachers in the general esteem. A profes-
sor in a college is only a teacher, but he is much more esteemed
than the master of a public school, partly because his work is pure-
ly instruction, and does not involve the infliction of physical pain."

Professor C. P. Newton, of the Newark Academy, of* Newark,
N. J., says: —

"It is to be feared that this barbarous practice of using the rod or
rattan has done more mischief for the rising generation in Newark
than can be repaired by fifty or more good teachers in many years
to come; yet more to be deplored is the utter want of feeling exhibited
by its advocates, some of whom openly acknowledge that they teach
for money, and whip as a matter of convenience.

If corporal punishment be necessary to enforce moral discipline
in families, to thus demonstrate to it the superior power and au-
thority of the parent, it does not necessarily follow that it should be
delegated to a class of teachers who are not looked upon as parents, or if so, whose position forbids the use and consequent abuse of a parent's power. There may be exceptions to this rule, but of such rare occurrence that no general law should give the authority to teachers indiscriminately."

MUSIC.

The Committee recommend an appropriation, for the purpose of procuring a teacher of music for the schools. This could be done for a trifling expense, and would be a great benefit to the scholars; cultivating their taste, teaching them habits of attention, and at the same time affording them amusement and recreation.

Respectfully presented,
For the Committee,
JAMES HEWINS.

Read in town meeting March 6, 1871.
