STATUS CODES

FE - Listed as Federally Endangered by the U.S. Fish and Wildlife Service.

FT - Listed as Federally Threatened by the U.S. Fish and Wildlife Service.

E - Endangered. Any reproductively viable native species which has been documented by biological research and inventory to be in danger of extirpation from the Commonwealth.

T - Threatened. Any reproductively viable native species which has been documented by biological research and inventory to be rare or declining within the Commonwealth and which is likely to become endangered in the Commonwealth in the foreseeable future.

SC - Special Concern. Any native species which has been documented by biological research and inventory to be suffering a decline that could threaten the species in the Commonwealth if allowed to continue unchecked, or which occurs in such small numbers or with such a restricted distribution or specialized habitat requirements that it could easily become threatened.

321 CMR 8:00 lists the rules and regulations relative to the establishment of the Commonwealth's list of endangered and threatened species.
