

By Mr. Saltonstall, a petition (accompanied by resolve, Senate, No. 845) of John A. S. McGlennon and William L. Saltonstall that provision be made for an investigation and study by a special commission (including members of the General Court) of methods of fulfilling the constitutional amendment guaranteeing the right of a healthy physical environment. Natural Resources and Agriculture.

The Commonwealth of Massachusetts

In the Year One Thousand Nine Hundred and Seventy-Three.

RESOLVE PROVIDING FOR AN INVESTIGATION AND STUDY BY A SPECIAL COMMISSION OF METHODS OF FULFILLING THE CONSTITUTIONAL AMENDMENT GUARANTEEING THE RIGHT OF A HEALTHY PHYSICAL ENVIRONMENT.

1 *Resolved*, That a special commission, to consist of four
2 members of the senate, five members of the house of represen-
3 tatives, the secretary of the executive office of environmental
4 affairs or his designee, the secretary of the executive office of
5 consumer affairs or his designee, the secretary of the execu-
6 tive office of human services or his designee, the secretary of
7 the executive office of transportation and construction or his
8 designee, and seven persons to be appointed by the governor,
9 is hereby established for the purpose of making an investiga-
10 tion and study of methods of fulfilling the constitutional
11 amendment guaranteeing the people of the commonwealth a
12 right to a healthy physical environment, approved by the vot-
13 ers at the state election of November, nineteen hundred and
14 seventy-two.

The Commission on the Environment and the Human Factor in the Design of Buildings and the Urban Environment. The Commission was established in 1961 by the President of the United States, Dwight D. Eisenhower, and the Secretary of the Interior, Fred A. Seelye. The Commission's mandate was to study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.

The Commission on the Environment and the Human Factor in the Design of Buildings and the Urban Environment

In the Year 1961, the President of the United States, Dwight D. Eisenhower, and the Secretary of the Interior, Fred A. Seelye, established the Commission on the Environment and the Human Factor in the Design of Buildings and the Urban Environment.

The Commission was established to study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people. The Commission's mandate was to study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.

1. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
2. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
3. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
4. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
5. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
6. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
7. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
8. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
9. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
10. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
11. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
12. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
13. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
14. To study the relationship between the built environment and the human factor, and to recommend ways to improve the design of buildings and the urban environment to better serve the needs of the people.
