Properties with Multiple Federal Flood Insurance Claims
Rivermoor Marsh to Humarock Beach

Red dots show the general distribution of properties with multiple flood insurance claims and do not reflect exact locations.

White lines represent town boundaries and dashed black lines show littoral cell boundaries.
Shoreline Type
Rivermoor Marsh to Humarock Beach

- Red: Port and Industrial Shorelines
- Yellow: Sandy, Barrier, and Cobble Beaches
- Green: Estuaries, Lagoons, Mud Flats, Salt Marshes
- Blue: Naturally Erosion Resistant Coastal Banks
- Light Blue: Coastal Banks
- Purple: Rocky Coast

The variables depicted on this map are for guidance and planning purposes only and are not intended to replace site specific resource area delineations necessary for applications prepared pursuant to the Coastal Wetlands regulations or other related regulations.

The Shoreline Type variable is determined along the 2001 high-water shoreline.

Write lines represent town boundaries and dashed black lines show littoral cell boundaries.

This map is from the South Shore Coastal Hazards Characterization Atlas, published by the Massachusetts Office of Coastal Zone Management (CZM). CZM makes no representations or warranties with respect to the definitiveness of the data presented. Prepared by Applied Coastal Research and Engineering, Inc., December 2005.
