Contract Summary

The Department of Environmental Protection awarded and manages the statewide contract for recycling containers, compost bins and rain barrels. There are a wide variety of containers available under the contract, including curbside recycling bins, solar trash compactors, wheeled carts, home composting bins and buckets, public space recycling containers, rain barrels, roll-off containers, among others.

Benefits and Cost Savings

- **Environmental Benefits:** The rain barrels under this contract represent a 98% reused item and most of the plastic recycling bins, containers, and carts are manufactured with approximately 30% post-consumer recycled plastic. As a result, this contract serves to keep tons of plastic out of landfills yearly, reduces our dependence on foreign oil (for the manufacturing of plastic) and works toward growing the local businesses included on the list of awarded vendors. The solar powered trash and recycling compactors on the contract increase the amount that can be handled by one or two containers and save time and labor for staff.
- **Cost Savings:** Even though the vendors on this contract are providing products at very competitive rates, cities, towns, agencies, schools and others are encouraged to request lower pricing, particularly in situations where high volume is involved. Contract users can also negotiate delivery times and other aspects as needed.
- All pricing information is posted in COMMBUYS as an attachment to the contract titled **Master Price File**.

5. On the Vendors tab click “Look up and Change Vendor.” This is where you will select the vendor you have chosen.
6. On the Attachments tab, upload the order description with product quantities and order total and any other pertinent documents, making sure to check the box that says Show to Vendor.
