Data Submission Manual7

Background

CHIA received summarized contract-membership, commercial premiums, member cost-sharing, and benefit level data for calendar years 2015, 2016, and 2017 from the following payers:

- Aetna: Aetna Health, Inc. and Aetna Life Insurance Company
- BCBSMA: Blue Cross and Blue Shield of Massachusetts, Inc. and Blue Cross and Blue Shield of Massachusetts HMO Blue, Inc.
- BMCHP: Boston Medical Center Health Plan, Inc.
- Cigna: CIGNA Health and Life Insurance Company
- Fallon: Fallon Community Health Plan, Inc. and Fallon Health & Life Assurance Company, Inc.
- HPHC: Harvard Pilgrim Health Care, Inc.; HPHC Insurance Company, Inc.; and Health Plans, Inc.
- HNE: Health New England, Inc.
- NHP: Neighborhood Health Plan, Inc.
- Tufts: Tufts Associated Health Maintenance Organization, Inc.; Tufts Insurance Company
- THPP: Tufts Health Public Plans, Inc. (formerly Network Health, LLC)¹
- UniCare: UniCare Life & Health Insurance Company
- United: UnitedHealthcare Insurance Company

BMCHP has been added for the 2018 Submission.

Payer data was provided in response to the “2018 Annual Premiums Data Request,” which was developed with the assistance of Gorman Actuarial, Inc. This request included detailed definitions and specifications for membership, premiums, claims, and other pricing data. It specified that payers provide data on their primary, medical, private commercial membership for all group sizes, including the individual and small group segments of the merged market. Products that were specifically excluded from this report were: Medicare Advantage, Commonwealth Care, Medicaid, Medicare supplement, Federal Employees Health Benefits Program, and non-medical (e.g., dental) lines of business.

CHIA requested that payers submit summarized data for their fully- and self-insured lines of business as contracted in Massachusetts. Payers’ data submissions encompassed “contract members” who may have resided inside or outside of Massachusetts; out-of-state members were most often covered by an employer that is located in Massachusetts. Both in-state and out-of-state “contract members” were included in the “Private Commercial Contract Enrollment,” “Private Commercial Coverage Costs,” “Member Cost-Sharing,” and “Private Commercial Payer Use of Funds” sections of the report.

Payer-provided data was validated against reported financial data from the Supplemental Health Care Exhibit

¹ In previous years, data for THPP was reported under the “Tufts” parent company.

(SHCE), the Massachusetts Division of Insurance's Medical Loss Ratio Reporting Form, the CCIIO Medical Loss Ratio Reporting Form, and Prior CHIA Annual Premiums Data Request Submissions.²

CHIA collected aggregate enrollment, premiums, and claims data by funding type (fully-insured or self-insured), market sector (employer size), product type (health maintenance organization, preferred provider organization, point-of-service, and "other" plans), and benefit design type (high deductible health plans, tiered network plans, and limited network plans). Within the Individual Purchasers (non-group) market sector, data was further categorized into Unsubsidized and ConnectorCare membership.³ Data for student health plans sold through Massachusetts colleges and universities was not included in the main report but may be found in the accompanying dataset.

Private Commercial Coverage Costs and Member Cost-Sharing

Payer-reported data from the "2018 Annual Premiums Data Request" enabled CHIA to report on commercial premiums, benefit levels, and member cost-sharing.

Administrative Service Fees

Payers and their associated third party administrators reported the fees that they received from self-insured employers to provide services such as plan design, claims administration, and access to networks of negotiated provider rates. This was a voluntary section of the "2018 Annual Premiums Data Request." In 2018, HNE, HPHC, Tufts, UniCare, and United provided ASF data to CHIA. Together, these payers enrolled 42.5% of all Massachusetts self-insured members in 2017. This data was not included in the main report, as CHIA did not receive enough administrative service fee data in 2018 to calculate a market-wide premium-equivalent figure.

Benefit Levels

Benefit levels were measured as the percentage of total medical claims covered by the health plan, calculated as the ratio of the total paid (incurred) amount to the total allowed amount. For ConnectorCare members, Cost-Sharing Reduction (CSR) subsidies were included in total paid amount to reflect the plan's benefit level as experienced by the member.

Fully-Insured Premiums

For fully-insured lines of business, payers provided annual earned premiums by employer size, product type and benefit design type for 2015 through 2017, as well as their rating factors used in December 2017 and estimated

² The analysis in this report relies on premium, claims, and membership data submitted by major Massachusetts payers. Payer data submissions were reviewed for reasonableness but were not audited. When reported data was not consistent, revised data was requested and provided by the payers. To the extent that final payer submitted data was unknowingly incomplete or inaccurate, findings in this report may not align with other payer filings.

³ Within this report, non-ConnectorCare individual plans are classified as "unsubsidized"; however, some individuals purchasing these plans also received federal tax credits to lower their monthly premium contributions.

rebate amounts for the reporting years.⁴ Premiums net of rebates⁵ were scaled by the “Percent of Benefits Not Carved Out” and divided by annual member months to arrive at premiums per member per month (PMPM).

Massachusetts residents with household incomes less than or equal to 400% of the Federal Poverty Level and who are not eligible for MassHealth, Medicare, or employer-sponsored insurance may qualify for Advance Premium Tax Credits (APTCs) to reduce premiums. Reported premiums for Unsubsidized and ConnectorCare members include members’ monthly premium contributions as well as any federal and state tax credits and/or subsidies received on members’ behalf.

Member Cost-Sharing

Average cost-sharing PMPM was calculated by subtracting incurred claims amounts and CSR subsidy amounts, if applicable, from allowed claims amounts (all of which were scaled by the “Percent of Benefits not Carved Out”) and dividing by annual member months.

Percent of Benefits Not Carved Out

Payers estimated the approximate percentage of a comprehensive package of benefits that their corresponding allowed claims covered. This value was less than 100% when certain benefits, such as prescription drugs or behavioral health services, were carved out and not paid for by the plan. These percentages were used to scale premiums, cost-sharing, and claims in order to estimate the costs of the full benefits package.

Private Commercial Payer Use of Funds

Payer-reported data from the “2018 Annual Premiums Data Request,” along with payer-reported data from the SHCE, allowed CHIA to report on how payers used the premium revenue that they collected from their fully-insured lines of business.

Premium Retention

Premium retention was calculated as the difference between the total premiums collected by payers⁶ and the total spent by payers on incurred medical claims. Total retention amounts were based on premium and claims data reported by payers in the “2018 Annual Premiums Data Request.”

In the merged market, adjustments were made for the impact of the Affordable Care Act’s “3R” programs—Risk Adjustment, Reinsurance, and Risk Corridors. Risk Adjustment data was available all three years; however, the Reinsurance and Risk Corridor programs were discontinued after 2016.

⁴ Per federal and Massachusetts regulations, payers must provide rebates when their Medical Loss Ratios (MLRs) fall below certain thresholds.

⁵ 2017 premiums were not adjusted to account for MLR rebate payments, which had not been finalized at reporting time. In its 2017 Supplemental Health Care Exhibit filing, THPP estimated that it would ultimately owe \$33 million in rebates for 2017. If accurate, this estimated rebate payment would lower THPP’s 2017 premiums by approximately \$21 PMPM.

⁶ Including APTCs, where applicable.

Retention Decomposition

Findings related to retention breakdown into its components (retention decomposition) were based on SHCE data from 2015, 2016, and 2017, as analyzed by CHIA. Results are shown for only non-merged market membership. SHCE data for merged market business included estimates of 3R amounts, which may have deviated significantly from actual amounts.

Data Submission Manual

957 CMR 10.00: Health Care Payers Premiums and Claims Data Reporting Requirements

March 12, 2018

1. Introduction

M.G.L. c. 12C, § 10 requires the Center for Health Information and Analysis (CHIA) to report on changes over time in Massachusetts health insurance premiums, benefit levels, member cost-sharing, and product design. CHIA collects this data under Regulation 957 CMR 10.00. While the Regulation contains broad reporting guidance, this Data Submission Manual provides technical details to assist with data filing.

2. Data Submission Manual Changes: 2017

I. Content

A. Additions/ Alterations

- Funding Type reported as “Fully-Insured” or “Self-Insured.”
- Industry factors should be included in reported rating factors.
- Member Months to be collected by Standard Industrial Classification (SIC) Code for Merged Market plans only.

B. Deletions

- Federal Employees Health Benefits Program (FEHBP) reporting has been eliminated.
- “Average Group Subscriber Count” tab has been eliminated.

C. Terminology

- “APTC + CSR Subsidies” category renamed “ConnectorCare.”
- “Direct Purchasers” category renamed “Individual Purchasers.”
- Student Health is now a separate market category and no longer included within Individual Purchasers.
- 3R payment reporting has been modified due to the phasing out of temporary premium stabilization programs. Risk corridors and reinsurance programs will apply to 2015 and 2016 only.

3. Required Submitters and Submission Instructions

Per 957 CMR 10.00, only payers with at least 50,000 Massachusetts Private Commercial Plan members for the latest quarter, as reported in CHIA's most recently published [Enrollment Trends](#), are required to submit. As of February 15, 2017, this includes the following payers:

- Aetna: Aetna Health, Inc. and Aetna Life Insurance Company
- BCBSMA: Blue Cross and Blue Shield of Massachusetts, Inc. and Blue Cross and Blue Shield of Massachusetts HMO Blue, Inc.
- BMCHP: Boston Medical Center HealthNet Plan
- Cigna: CIGNA Health and Life Insurance Company
- Fallon: Fallon Community Health Plan, Inc. and Fallon Health & Life Assurance Company, Inc.
- HPHC: Harvard Pilgrim Health Care, Inc.; HPHC Insurance Company, Inc.; and Health Plans, Inc.
- HNE: Health New England, Inc.
- NHP: Neighborhood Health Plan, Inc.
- Tufts: Tufts Associated Health Maintenance Organization, Inc.; Tufts Insurance Company; and Tufts Health Public Plans, Inc. (formerly Network Health, LLC)
- UniCare: UniCare Life & Health Insurance Company
- United: UnitedHealthcare Insurance Company

BMCHP has been added for the 2018 Submission.

The Health Care Payers Premiums and Claims Data Reporting Workbook (Workbook) must be used for data submission. It is available at: <http://www.chiamass.gov/information-for-data-submitters-premiums-data/>. A Workbook must be completed for each legal entity of a payer. Payers are responsible for notifying CHIA of additional legal entities not listed here that may meet filing requirements.

General questions can be submitted anytime to CHIADData@gormanactuarial.com. Completed Workbooks should be sent to CHIADData@gormanactuarial.com no later than Thursday, May 10, 2018.

Beginning with the 2018 Submission, payers are instructed to report Funding Type as either "Fully-Insured" or "Self-Insured." CHIA will provide an alternate Workbook for payers wishing to continue submitting data under the previous "Fully-Insured" and "Total" classification system.

4. Population Specification

Regulation 957 CMR 10.00 requires payers to report aggregate membership, premiums, and claims data for all primary fully- or self-insured members in Private Commercial medical plans situated⁷ in Massachusetts. Members of medical plans purchased through the Massachusetts Health Connector and all comprehensive Student Health membership should be included.

Plans Not Included:

- Commonwealth Care
- Federal Employees Health Benefits Program
- Indian Health Service
- MassHealth Managed Care
- Medical Security Program
- Medicare Advantage
- Medi-gap
- One Care, PACE, Senior Care Options
- Tricare
- VA Healthcare

Members Not Included:

- Medical plan enrollees using plan as secondary coverage

⁷ "Situs" of a policy is defined as the jurisdiction in which the policy is issued or delivered as stated in the policy. Insurers are instructed to apply the same consideration when determining situs for this report as they do when preparing the NAIC Supplemental Health Care Exhibit. Third party administrators (TPAs) shall determine situs of their contracts in a similar manner. Massachusetts situated members may not necessarily be residents of Massachusetts.

5. Workbook Overview

Regulation 957 CMR 10.00 requires payers to report aggregate membership, premiums, and claims data by market sector, product type, and benefit design type for the previous three calendar years in the Premiums Workbook (.xlsx). The 2017 Workbook contains the following worksheets:

A. Payer Verification

Worksheet A calculates aggregate and per member per month (PMPM) values based on payer-submitted data (worksheets B-E) for payer verification. A submission contact is required.

B. Membership by Geography and Gender & Age Group

Worksheets B1 & B2 request Member Months data by Geographic Area (3-digit zip) by Year, Funding Type, Product Type, Benefit Design Type, and Market Sector.

Worksheets B3 & B4 request Member Months data by Age Group & Gender by Year, Funding Type, Product Type, Benefit Design Type, and Market Sector.

C. Membership by Rating Size Bands

Worksheet C1 requests the size bands that correspond to a payer's rating bands, excluding individual policies in the Merged Market. These values are then automatically populated in worksheet C2.

Worksheet C2 requests Members Months data only for small group, fully-insured accounts by Product Type and Benefit Design Type, by the size bands inputted in C1. For employer groups with multiple product types, the size band used should be based on the total employer size, not the size of the population enrolled in each type. For example, for an employer group of size 20 that has 5 employees enrolled in a PPO for the entire year and has 15 employees in an HMO for the entire year: 60 member months would be reported in size band "20" under "PPO", while 180 member months would be reported in size band "20" under "HMO."

D. Member Months by Standard Industrial Classification (SIC) Code

Worksheet D requests Member Months data by SIC code only for fully-insured individual (sole proprietor) and small group accounts, where available. Payers who use industry factors in their rating formula are requested to provide this data for calendar year 2017 only.

Member Months should be reported for distinct, four-digit SIC codes. Payers should use the "Unknown" designation to report Member Months for which industry classification is unavailable (e.g., members purchasing individual plans through the Health Connector).

Worksheet E1 requests the following aggregate financial data for fully-insured plans by Year, Product Type, Benefit Design Type, and Market Sector:

- Earned Premiums (incl. APTC, excl. MLR Rebates)
- MLR Rebates [Amounts for Direct Purchasers need not be allocated to the three subsidy categories; instead, enter the total amount for the individual market for the applicable year in the 'No Subsidy/Unknown' column.]
- Percent of Benefits Not Carved Out
- Claims
 - Allowed
 - Incurred

- Payer “3R” Totals [2017 Totals Not Needed w/ May 10th Submission; amounts for Direct Purchasers need not be allocated to the three subsidy categories; instead, enter the total amount for the individual market for the applicable year in the ‘No Subsidy/Unknown’ column.]
 - Risk Adjustment Transfer Amounts
 - Federal Transitional Reinsurance Amounts
 - Risk Corridor Amounts
- ACA/ Health Connector Subsidy Amounts
 - Advance Premium Tax Credit Amounts
 - Cost-Sharing Reduction Amounts

Worksheet E2 requests the following aggregate financial data in total by Year, Product Type, Benefit Design Type, and Market Sector:

- Earned Premiums (incl. APTC, excl. MLR Rebates)
- MLR Rebates [Amounts for Direct Purchasers need not be allocated to the three subsidy categories; instead, enter the total amount for the individual market for the applicable year in the ‘No Subsidy/Unknown’ column]
- Percent of Benefits Not Carved Out
- Claims
 - Allowed
 - Incurred
- Payer “3R” Totals [2017 Totals Not Needed w/ May 10th Submission; amounts for Direct Purchasers need not be allocated to the three subsidy categories; instead, enter the total amount for the individual market for the applicable year in the ‘No Subsidy/Unknown’ column]
 - Risk Adjustment Transfer Amounts
 - Federal Transitional Reinsurance Amounts
 - Risk Corridor Amounts
- ACA/ Health Connector Subsidy Amounts
 - Advance Premium Tax Credit Amounts
 - Cost-Sharing Reduction Amounts

Worksheet E2 requests the following aggregate financial data for self-insured plans by Year, Product Type, Benefit Design Type, and Market Sector:

- Percent of Benefits Not Carved Out
- Claims
 - Allowed
 - Incurred
- Administrative Service Fees [Voluntary]

F. Rating Factors

Worksheet F requests rating factors for fully-insured plans with effective dates in December 2017. Please input rating factors that are applied to base rates to develop premiums by market segment (when no employer-specific experience is available for Mid-Size and Large Groups), including but not limited to age/gender, area, group size, retention, and contract type. Benefit plan factors may be excluded. Payers should define group

size ranges as they would apply their rating factors, which should include the same bands as reported on Worksheet C.

G. Reconciliation

Worksheet G requests data reconciliation checks between inputted data and other payer data submissions. Please explain major discrepancies with:

- Massachusetts Division of Insurance's Medical Loss Ratio Reporting Form
- Center for Consumer Information and Insurance Oversight's Medical Loss Ratio Reporting Form
- National Association of Insurance Commissioners' Supplemental Health Care Exhibit (SHCE)
 - Within the Merged Market (individual and small group), payers should compare 2017 SHCE earned premiums ("Health premiums earned") to those reported in this Annual Premiums Data Request submission.
- Prior CHIA Annual Premiums Data Request submissions

A detailed reconciliation is not required. Rather, a listing of reasons for potential discrepancies should be provided.⁸

For payer convenience, referenced and public payer data may be made available upon request.

⁸ CHIA understands that certain Affordable Care Act provisions (e.g. Premium Stabilization programs) may make comparisons between May submissions and financial statements difficult for individual and small group sectors. CHIA will follow up with payers for final 2016 amounts in July.

6. Definitions

“3 R” Amounts [2017 Totals Not Needed w/ May 10th Submission; amounts for Direct Purchasers need not be allocated to the three subsidy categories; instead, enter the total amount for the individual market for the applicable year]

- Risk Adjustment Transfer Amount: The amount that is received (+) or owed (-) as a result of the risk adjustment program that was put into place in Massachusetts’ individual and small group markets effective in 2014. Risk adjustment transfers should reflect the year in which the amount was incurred, not when the payment was received. For example, if a payment was received in 2016 for the 2015 benefit year, then it would fall under 2015 for CHIA’s collection purposes.
- Federal Transitional Reinsurance Amount [2015 and 2016 only]: The amount that is received (+) as a result of the federal transitional reinsurance program that was put into place in the individual market effective 2014. This amount includes only recoveries received and not any required contributions to the program. Reinsurance amounts should reflect the year in which the amount was incurred, not when the payment was received. For example, if a payment was received in 2016 for the 2015 benefit year, then it would fall under 2015 for CHIA’s collection purposes.
- Risk Corridor Amount [2015 and 2016 only]: The amount that is received (+) or owed (-) as a result of the risk corridor program that was put into place in the individual and small group markets effective in 2014. Amounts owed by the payer should be reported in the year for which the amounts were owed. If reporting amounts received, please report the actual amount received after the reduction of the originally calculated amounts. CHIA expects no positive payments received from the risk corridor program for 2015 or 2016, as funds collected during these two years went towards fulfilling risk corridor payments due to payers based on 2014 claims experiences.⁹

Affordable Care Act/ Massachusetts Health Connector Subsidies

- Advance Premium Tax Credit (APTC) Amounts: The total amount of tax credits individuals received to lower their health insurance payments while enrolled in qualifying Massachusetts Health Connector plans. Eligibility determined based on expected annual income, and credit may have been taken in advance to lower monthly payments.
- Cost Sharing Reduction (CSR) Amounts: The total estimated reductions payers received to lower individuals’ health insurance deductibles, copayments, and coinsurance payments while enrolled in qualifying Massachusetts Health Connector plans. Eligibility determined based on expected annual income. Maximum out-of-pocket amounts may also be reduced.

Administrative Service Fees: The fees earned by a payer or Third Party Administrator for the full administration of a self-insured health plan excluding any premiums collected for stop-loss coverage. This data is appreciated, though submission is voluntary.

Claims: Total medical, pharmacy, and behavioral health claims, as described. Amounts should include estimates of completed claims for any period not yet considered complete. For the 2018 submission, run-out beyond the date through which claims were paid when the claims data were accessed, as available, should be estimated and

⁹ “Risk Corridors Payment and Charge Amounts for the 2016 Benefit Year.” <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/Risk-Corridors-Amounts-2016.pdf>

incorporated into results. Amounts should not include expenses for medical management performed in-house or by third parties other than providers, or any other payments to entities besides providers.

- **Allowed Claims:** The claim cost to be paid by the payer (Incurred Claims) and the member (Cost-Sharing) and the federal or state governments (CSR Amounts) to the provider after the provider or network discount, if any. Total Allowed Claims should include capitation payments, withhold amounts, and all other payments to providers including those paid outside the claims system.
- **Incurred Claims:** The claim cost to be paid by the payer to the provider after the provider or network discount, if any. Total Incurred Claims should include capitation payments, withhold amounts, and all other payments to providers including those paid outside the claims system. Incurred Claims should reflect only those amounts that are the liability of the payer, i.e., net of payments by both the member (Cost-Sharing) and the federal or state governments (CSR Amounts), such that the Incurred Claims are reported in a manner consistent with amounts expected to be funded by the Premiums earned.

Funding Type¹⁰

- **Fully-Insured:** A plan where an employer contracts with a payer to cover pre-specified medical costs for its employees and employee-dependents.
- **Self-Insured:** A plan where employers take on the financial responsibility and risk for their employees' and employee-dependents' medical costs, paying payers or third party administrators to administer their claims. These employers may or may not also purchase stop-loss coverage to protect against large claims; stop-loss premiums and employer-reimbursements should not be included in this Request.

Geographic Area: The 3-digit zip code of the member.

Market Sector: Market Sector includes four employer-sponsored plan categories, one student health category, three individual-purchaser plan categories, and one category for state employee plans, as described below.

Market Sector	Category	Description
Individual Purchasers	No Subsidy/Unknown	Health insurance plans purchased by individuals either directly from a payer or through the Massachusetts Health Connector without public subsidy.
	APTC Subsidy Only	Health insurance plans purchased by individuals through the Massachusetts Health Connector and qualified for an Advance Premium Tax Credit (APTC) subsidy <u>but not</u> qualified for a Cost-Sharing Reduction (CSR) subsidy.
	ConnectorCare	Health insurance plans purchased by individuals through the Massachusetts Health Connector and qualified for an Advance Premium Tax Credit (APTC) subsidy <u>and</u> a Cost-Sharing Reduction (CSR) subsidy.
Student Health	Student Health	Health insurance plans purchased by students through their school for primary, medical coverage. The ACA considers student health insurance purchasers to be non-group purchasers.
Employer-	Small Group ¹¹	Fully-Insured: health insurance plans purchased through employer

¹⁰ CHIA will provide an alternate Workbook for payers wishing to continue submitting data under the previous "Fully-Insured" and "Total" classification system.

Sponsored Plans		groups with 2-50 <u>eligible</u> enrollees, and that meet the definition of an “Eligible Small Business or Group,” per Massachusetts Division of Insurance Regulation 211 CMR 66.04, except as otherwise noted in the Massachusetts Division of Insurance Bulletin 2016-09. Includes any Small Groups that may have purchased health insurance through the Massachusetts Health Connector. Includes any Small Groups that may have purchased health insurance through an association. ¹² Non Fully-Insured: plans purchased through employer groups with 2-50 <u>enrolled</u> employees.
	Mid-Size Group	Fully-Insured: health insurance plans purchased through employer groups with 51-100 <u>enrolled</u> employees, and those employer groups with fewer than 51 enrollees that would not otherwise meet the definition of a Small Group (e.g., an employer with 150 total employees but only 40 enrolled employees). Non Fully-Insured: plans purchased through employer groups with 51-100 <u>enrolled</u> employees.
	Large Group	All: health insurance plans and non-fully insured plans purchased through employer groups with 101-499 <u>enrolled</u> employees.
	Jumbo Group	All: health insurance plans and non-fully insured plans purchased through employer groups with 500+ <u>enrolled</u> employees.
Government Employee Plans ¹³	Massachusetts Group Insurance Commission (GIC)	Health insurance plans and non-fully insured plans purchased by individuals from the selection negotiated and administered by the Massachusetts Group Insurance Commission.

Medical Loss Ratio (MLR) Rebates: Massachusetts health insurers are required to submit data on the proportion of premium revenues spent on health care services and quality improvement initiatives for several business lines, including for private commercial fully-insured groups. If state- and federal-MLR ratios or thresholds are not met, payers must provide members rebates for the excess premium retention. Across this three year period, the Massachusetts MLR threshold for fully-insured plans was 88% in the Merged Market and 85% for larger group plans outside the Merged Market.

Premiums, Earned: Represents the total gross earned premiums earned prior to Medical Loss Ratio (MLR) rebate payments incurred, though not necessarily paid, during the year, including any portion of the premium that is paid to a third party (e.g. Connector fees, reinsurance). Do not include any amounts related to risk adjustment. Premium amounts should include any advance premium tax credit amounts.

¹¹ Fully-Insured small employers that met the definition of an Eligible Small Group Business or Group under 211 CMR 66.04 but became large employers under the full-time equivalent counting method implemented by the ACA and further discussed in Bulletin 2016-09 (<http://www.mass.gov/ocabr/insurance/providers-and-producers/doi-regulatory-info/doi-regulatory-bulletins/2016-doi-bulletins/bulletin-2016-09.html>) should be reported under the Small Group category during the time they were covered by a plan marketed and regulated as a small group plan, and reported under the applicable category (e.g., Mid-Size Group) during the time they were covered by a plan marketed and regulated as a large group plan.

¹² Small Groups that purchase coverage through an association are to be included in the Small Group category per Massachusetts 211 CMR66 and federal CCIIO guidance.

¹³ Non-GIC municipal employer groups should be counted under “Employer-sponsored plans” for the purposes of this request

Product Type: A mutually exclusive categorization of enrollment by members' selected health insurance products: Health Maintenance Organization (HMO), Preferred Provider Organization (PPO), Point-of-Service (POS), and "Other" plans. All Private Commercial plans should be included in one of these four categories, such that summing values across all Product Types produces totals equal to those for a given Market Sector. For plans that may be considered under more than one Product Type, the plan should be reported under the Product Type wherein most care is provided, as measured by Allowed Claims value.

- Health Maintenance Organization (HMO): Plans that have a closed network of providers, outside of which non-emergency coverage is not provided; generally requires members to coordinate care through a primary care provider.
- Preferred Provider Organization (PPO): Plans that have a network of "preferred providers", although members may obtain coverage outside the network at higher levels of cost-sharing; generally does not require members to select a primary care provider.
- Point-of-Service (POS): Plans that require members to coordinate care through a primary care provider and use in-network providers for the lowest cost-sharing. As with a PPO plan, out-of-network providers are covered, though at a higher cost to members.
- Other: Plan types other than HMO, PPO, and POS, including, but not limited to, Exclusive Provider Organization (EPO) plans and Indemnity plans.

For additional membership categorization examples, please see the 2018 Premiums FAQ.

Percent of Benefits Not Carved Out: The ratio of a membership's actual Allowed Claims, as compared to that membership's estimated Allowed Claims, had all members administered had a comprehensive benefit package (i.e. all Essential Health Benefit, and benefit claims, administered and paid by the submitted payer). This value will be less than 100% when certain benefits, such as prescription drugs or behavioral health services, are carved-out and not paid for by the plan.

Payers should provide their best estimates based upon available data for similar populations. For example:

- A payer administers 1,500 members: 1,000 members have comprehensive coverage; 500 members have comprehensive coverage minus pharmacy
- Based on comprehensive coverage member experiences, the payer estimates that approximately 20% of Allowed Claims PMPM are for pharmacy services (with variations across years, market sectors, funding types, product types, and benefit design types, per Workbook requirements)
- CHIA or Gorman Actuarial will use best-estimate member experiences to "scale up" estimated Allowed Claims for members where pharmacy claims data is not available
- Percent of Benefits Not Carved Out: $[(1,000 * 100\%) + (500 * 80\%)] / (1,000 + 500) = 93\%$

Benefit Design Type: Benefit and network design characteristics that are not exclusive to a given Product Type. These categories are not mutually exclusive, nor exhaustive. Benefit Design Type should be determined at the member level.

- HDHPs (as defined by individual deductible level only): Plans with an individual deductible greater than or equal to the qualifying definition for a high deductible health plan, which is \$1,300 for 2015-2017 (for the most preferred network or tier, if applicable). The plan does not need to be a qualified high deductible health plan in order to be considered an HDHP for this purpose. Only a plan's individual deductible level must be satisfied to be included in this breakout for our purposes. For example, four

members of a family plan would only be considered to be in an HDHP in 2015 for this data request's purpose if the individual deductible for that product is equal to or exceeds \$1,300 in 2015; the deductible for the family plan itself is inconsequential.

- **Tiered Networks:** Plans that segment their provider networks into tiers, with tiers typically based on differences in the quality and/or the cost of care provided. Tiers are not considered separate networks but rather sub-segments of a payer's HMO or PPO network. A Tiered Network is different than a plan only splitting benefits by in-network vs. out-of-network; a Tiered Network will have varying degrees of payments for in-network providers.

A plan that has different cost-sharing for different types of providers is not, by default, considered a Tiered Network (i.e., a plan that has a different copay for primary care physicians than specialists would not be considered a tiered network on that criterion alone). However, if the plan has different cost-sharing within a provider type depending upon the provider selected, then the plan would be considered a Tiered Network plan.

A plan need not have all provider types subject to tiering in order to be considered a Tiered Network plan for this Request (i.e., a plan that tiers only hospitals is a Tiered Network; a plan that tiers only physicians is also here considered a Tiered Network).

For additional Tiered Network information, please see the 2018 Premiums FAQ.

- **Limited Networks:** A limited network plan is a health insurance plan that offers members access to a reduced or selective provider network that is smaller than the payer's most comprehensive provider network within a defined geographic area. This definition, like that contained within Massachusetts Division of Insurance regulation 211 CMR 152.00, does not require a plan to offer a specific level of cost (premium) savings in order to qualify.
