Health System: Not Specified
Community Health Network Area (CHNA): Fitchburg/Gardner Community Health Network(CHNA 9),
Regions Served: Ashburnham, Gardner, Hubbardston, Templeton, Westminster, Winchendon,

Mission and Key Planning/Assessment Documents

Community Benefits Mission Statement:

: Heywood Hospital is committed to improving the health of our community, with special consideration of disadvantaged populations, by working collaboratively with community partners to increase prevention efforts, address social determinants of health, and improve access to care.

Target Populations:

Name of Target Population	Basis for Selection
Heywood Hospital is committed to addressing health disparities that exist in our region. We aim to improve access to care for populations adversely affected by social determinants of health. Especially targeting people living in poverty, racial and ethnic minorities, older adults, veterans, and disadvantaged youth and adolescents.	2018 Community Health Needs Assessment quantitative and qualitative data

Implementation Strategy:

Implementation Strategy Document: [2018-HEYWOOD-HEALTHCARE-COMMUNITY-HEALTH-IMPROVEME](#)

Key Accomplishments of Reporting Year:

Social Determinants of Health: Assisted 72 community members to overcome barriers and address psycho-social needs by providing information and referrals on issues related to housing, food, transportation, behavioral, and substance abuse. Provided financial and health insurance information and enrollment assistance to 4,048 individuals reducing financial barriers to accessing healthcare. Assisted and paid for legal services (such as healthcare proxy, guardianship, advanced directives) for 14 patients who did not have the means to pay. Assisted 260 patients with transportation, and as a result, they were able to follow up with their healthcare and prevented missed appointments. Provided over 30,000 hours of mentorship to 200 students pursuing careers in healthcare and subsequently hired six into permanent paid positions.

Interpersonal Violence and Injuries: Convened the Regional Behavioral Health Collaborative (RBHC), a multi-sector partnership of school, emergency responders, social service organizations, medical, and behavioral health providers. The RBHC organized the implementation of Handle With Care (HWC)- an initiative to address and minimize the adverse effects of childhood trauma. The RBHC hosted trainings to increase the partnership's knowledge of the HWC model, adverse childhood experiences, and how to provide trauma-informed care. Subsequently, the police, school districts, and community partners in the towns of Ashburnham, Westminster, Gardner, Templeton, Petersham, and Winchendon developed the processes for identifying, communicating, and providing appropriate trauma-informed supports for the student and family exposed to trauma.

Mental Health and Substance Use: Spearheaded the Montachusett Suicide Prevention Task Force - a multi-sector Task Force providing education, resources, and offering support groups. They trained 52 community members on Mental Health First Aid and increased their ability to identify, understand, and respond to signs of mental illnesses and substance use disorders. They trained 100 community members on opioid overdose prevention and Narcan administration. Offered support groups for military families, men who struggle with depression, for those who have lost loved ones to suicide and for survivors of suicide, providing peer exchange and coping skills for managing symptoms associated with mental illness and substance use. Community Health Workers, located in the Narragansett and Gardner School Districts, provided school-based care coordination and behavioral health supports. 271 youth with mental health counseling either in person or via tele-behavioral health and helped over 140 families with accessing community-based services such as food, fuel, and housing assistance.

Wellness and Chronic Disease: Partnered with the Gardner Public School District to distribute 7,600 backpacks with nutritious food for the weekend distributed weekly to 190 low-income youth and their families. Offered wellness instruction and self-care techniques to 240 individuals to manage symptoms associated with having a chronic condition.

Plans for Next Reporting Year:

In 2018, Heywood Hospital conducted a comprehensive community health need assessment (CHNA). In addition to doing the CHNA, the organization monitors hospital data. It actively engages with the hospital leadership team and Community Benefits Advisory Committee to continuously monitor and assess any changing or emerging community and healthcare needs. Heywood Hospital remains committed to addressing health disparities and the health needs of our region. The community health improvement plans for 2020 remains focused on under-resourced populations (low-income individuals and families, school children, elderly, minority, veterans, and the disabled) and prioritizes social determinants of health, mental health and substance misuse, wellness and chronic disease, and interpersonal violence and injuries. We also plan to address emergent issues related to the COVID-19 pandemic and to support the region to prepare for and prevent the spread of the virus. The Community Health Improvement Plan (CHIP) will align with the hospital's strategic plan and coordinated with the Community Health Network Area 9 of North Central MA (CHNA9) regional community health improvement planning process. Membership of the Community Benefits Advisory Committee will be reviewed to ensure representation from the CHIP's target population and priority focus areas.

Behavioral Health and Social Determinants of Health -Community Participation Community Building

Program Type	Infrastructure to Support CB Collaboration
Program is part of a grant or funding provided to an outside organization	Yes
Program Description	Heywood Hospital leads several coalitions that include bringing together multi-sector partners in the planning and implementation of strategies to reduce identified health needs and gaps in services. Additionally, hospital staff actively participates in and take leadership roles on a number of organization boards and committees.
Program Hashtags	Community Education, Health Professional/Staff Training,
Program Contact Information	Barbara Nealon; Michael Ellis

Program Goals:

Goal Description	Goal Status	Goal Type	Time Frame
GAIT (Gardner Area Interagency Team) Administered by Heywood, this well-established coalition has been working together for over 35 years to improve access to health and social services for the communities' most compromised populations. GAIT consists of over 50 members representing school departments, elected officials, health and human service providers, mental health providers, home care services and businesses.	Nine meetings held with a consistent, diverse representation of 30 community members. The meetings provided opportunities for networking, information on community services, and collaboration on addressing community health needs. Activities for the year include a Community Resource Service Fair with over 200 people attending and a Legislative breakfast.	Process Goal	Year 2019 of 1
The Montachusett Suicide Prevention Task Force - Spearheaded by HH, this multi-sector Task Force serves the City of Gardner and the surrounding 22 towns. In its fourth year, its mission is to prevent suicide by providing education and resources to help those who struggle with depression, survivors of suicide and those who have lost loved ones to suicide.	Approx 30 members participated in 11 meetings for resource sharing and educational events. Organized the annual Ride Of Your Life Suicide Prevention Event, which also included community media and billboards to raise awareness education on resources. Offered QPR training for community groups, organized and supported MENders and Suicide Loss Survivor support groups, and Military Families suicide prevention support group.	Process Goal	Year 2019 of 1
The Multicultural Task Force- This task force with community participation is focused on addressing health disparities and social determinants of health focused on under -represented populations	The Multicultural Task Force organized and participated in community events to raise awareness on issues related to diversity and health, including the Stand Against Racism and Martin Luther King Event.	Process Goal	Year 2019 of 1
Community Board and organization participation.	Heywood staff actively participated in the following coalitions/boards: Boys and Girls Club; CHNA9; Gardner Community Action Team; GAAMHA; Gardner Rotary; Gardner Chamber of Commerce; GVNA Healthcare; Fitchburg Human Rights Commission; Fitchburg Housing Authority; Clark YMCA; Growing Places; North Central Mass Minority Coalition; Greater Gardner Religious Council; North Central MA Chamber of Commerce;	Process Goal	Year 2019 of 1

School-based Care Coordination and Tele-behavioral Health

Program Type	Community-Clinical Linkages
Program is part of a grant or funding provided to an outside organization	Yes
Program Description	In conjunction with Gardner and Narragansett School Districts provide school-based behavioral health and social supports for high-risk, school-aged youth and their families.
Program Hashtags	Not Specified
Program Contact Information	Selena Johnson; Maureen Donovan

Program Goals:

Goal Description	Goal Status	Goal Type	Time Frame
School-based Care Coordination Program is supported by a grant			

from the Heywood Healthcare Charitable Investment Foundation. Community health workers (CHW) support students and family's psycho- social-emotional needs. The CHW assists families with accessing community-based services and link youth with appropriate mental health counseling.	This grant was given to the Gardner school district to fund two Community Health Workers. The CHW helped nearly 100 families with accessing community-based services such as food, fuel, and housing assistance and linked 239 youth with appropriate mental health counseling	Outcome Goal	Year 2019 of 1
School-based tele-behavioral health program offered in collaboration with the school district connects youth to behavioral health counseling via telehealth while at school. This program eliminates barriers to access services while reducing time away from learning.	Five hundred seventy-six behavioral health sessions were provided via video conferencing for 32 at-risk students. Forty-two referrals supported these students to community-based services.	Outcome Goal	Year 2019 of 1
