The Commonwealth of Massachusetts

ANNUAL REPORT

OF

THE TRUSTEES

OF THE

MEDFIELD STATE HOSPITAL

FOR THE

YEAR ENDING NOVEMBER 30, 1925

DEPARTMENT OF MENTAL DISEASES

LIBRARY
OF
MASSACHUSETTS

OFFICERS OF THE HOSPITAL

TRUSTEES

George O. Clark, M.D., Boston
Danforth Comins, Winchester
Carolyn Beals Odell, Belmont
Walter Rapp, Chairman, Brockton
Eugene M. Carman, Somerville
Christian Lantz, *Secretary*, Salem
Bessie Edwards, Westwood

RESIDENT OFFICERS

Elisha H. Cohoon, M.D., *Superintendent*
————— *Assistant Superintendent*
G. Allen Troxell, M.D., *Senior Assistant Physician*
John F. Owen, M.D., *Senior Assistant Physician*
Seth F. H. H wes, M.D., *Senior Assistant Physician (Pathology)*
George E. Poor, M.D., *Assistant Physician*
Louis Brisset des Nos, M.D., *Assistant Physician*
————— *Assistant Physician*
Jube E. Pickering, M.D., *Assistant Physician*
Elton V. Faass, D.M.D., *Dentist*
Louis A. Hall, *Steward*
Josephine M. Baker, *Treasurer*

HEADS OF DEPARTMENTS

Myron D. Place, *Chief Engineer*
Arthur F. Smith, *Foreman Mechanic*
Leon E. Mayo, *Head Farmer*
Esther A. Owen, R. N., *Superintendent of Nurses*
Charles W. Browning, *Supervisor, Male Side*
Mary H. Holland, *Head Social Worker*
Hattie I. Troxell, R. N., *Matron*
Dorothea Nicoll, *Head Dietitian*
Mildred Macauley, *Head Occupational Therapist*

CONSULTING STAFF

George O. Clark, M.D., *Surgeon*
Albert Evans, M.D., *Physician*
Harold Tobey, M.D., *Laryngologist*
Fred Kingsley, M.D., *Ophthalmologist*
John Adams, M.D., *Orthopedist*

TRUSTEES' REPORT

To His Excellency the Governor and the Honorable Council:

The Trustees of the Medfield State Hospital herewith submit their thirtieth Annual Report. Detailed report on the condition and activities of the institution together with tabulations, classification, statistical comparisons, and specific recommendations are contained in the attached and approved report of the Superintendent, Doctor E. H. Cohoon.

Trustees' visits to the Hospital usually include inspection. The general appearance of the physical properties is satisfactory. All buildings and grounds reflect not alone good care but regard for aesthetic value. There is ample reason for both patients and employees to show the contentment that usually accompanies connection with any successfully conducted enterprise. Meetings and inspections have been matters of duty; efforts continue toward further standardization, as a guarantee of efficiency in general management—the only course leading to ultimate unity of effort between the State House and the Hospital.

Through reading, conventions, and interviews with hospital executives it has been possible to judge our own progress toward accepted standards. Each year provides a basis for comparison with the previous year, and to those Trustees of

long standing shows conclusively steady progress. Certainly there is an obvious contrast between the old times when isolation and restraint were so general and the present scientific program of psychiatric care, specialized therapy, and efficient administration. These comparisons carry the long service Trustees through the gamut of experience from depressing service to refreshing relationship with a hospital in which the State and its wards are advancing in practical co-operation.

The past year is the most notable of a series in which particular progress has been made through co-operation between the Executives of the Commonwealth and the Trustees of the Hospital toward the standardization of many fundamentals of hospital administration and operation. In some essentials concurrence of thought and action should be still further cultivated. For instance, while the number of patients suffering some degree of therapeutic neglect has markedly diminished, equipment for employing profitably the time of all patients has not kept pace with demonstration of its therapeutic value. To remedy this situation the Trustees request an appropriation for the extension of occupational therapy. Unfortunately, it is still necessary to convince the appropriating powers that a request for money for occupational therapy is not merely for the isolated items of basketry and weaving. In this great institution occupational therapy already pervades activities of household, farm and shop, but at that it is capable of far greater development, and we urge that adequate facilities be provided as soon as possible to extend its benefits to every patient. Patients in the Hospital are in excess of the hospital's listed capacity and the staff of physician executives is, and for long has been, below the recognized numerical requirement,—an unfortunate and dangerous combination. All persons familiar with hospital management realize that this shortage of personnel is related to finances. It is not possible to state this situation more clearly than it was emphasized in a former written report.

The Trustees are apprehensive that continued excessive pressure on the Superintendent and his medical staff may result in a condition for which no one will wish to assume responsibility.

Elisha H. Cohoon, M.D., Superintendent, through capacity and devotion, commands our admiration. To him and to his staff we owe the gratification of being able to submit a report of successful management.

GEORGE O. CLARK, M.D.
DANFORTH COMINS
CAROLYN BEALS ODELL
WALTER RAPP, *Chairman*

EUGENE M. CARMAN
CHRISTIAN LANTZ, *Secretary*
BESSIE EDWARDS

SUPERINTENDENT'S REPORT

To the Trustees of the Medfield State Hospital:

I have the honor to present to you the Thirtieth Annual Report of the operation of this hospital for the year ending November 30, 1925.

The Medical Statistical Tables and the Statistics as shown in the "Movement of Population" cover the year ending September 30, 1925.

MOVEMENT OF POPULATION

At the beginning of the year there was on the books of the hospital a total of 1805,—747 men and 1056 women. There were 37 men and 24 women on visit and escape and 5 women in family care. There were actually resident in the hospital 710 men, 1027, women, a total of 1737. There were received into the hospital a total of 121,—46 by direct commitment and 75 by transfer from other hospitals. Of this total, 54 were males and 67 females. The total under treatment was 1914 and the daily average number of patients actually in the institution was 1,727. The daily average number of patients in family care was 5. The total discharged during the year was 126,—there being 64 men and 62 women. Of these discharges, 82 were by death. Of the remaining, 4 were discharged as recovered; 25 as improved; 5 as unimproved; 3 by transfer and 6 as not insane. At the end of the year there were 63 on visit and escape and 5 in family care. Remaining on the books September 30, 1925 there was total of 1798,—and there were actually in the hospital 1730.

MEDICAL WORK

The general health of the hospital continued to be good and was not interrupted by epidemics.

We have been without an assistant superintendent for the whole year and this, to some extent, made it more difficult to maintain the usual standard of medical work.

In the report of the previous year I attempted to set forth the importance of having an adequate medical staff both from the standpoint of numbers and quality and I also suggested that increasing the salaries probably would tend to solve this problem. The experience of this past year is only additional proof that this matter is not only important but of real urgency.

During the year 15 patients and employees were given surgical attention as follows:—laparotomy, 1; herniotomy, 1; hysterectomy, 1; excision of growth from nose, 1; excision of carbuncle, 1; amputation of terminal phalanx right index finger, 1; incision of abscess, left umbilical region, 1; colostomy, 1; appendectomy, 1; reduction of humerus, 1; vasectomy, 1; opening and drainage of tubercular glands of neck, 1; operation for carcinoma of sigmoid flexure, 1; opening of large abscess in abdominal wall, 1; operation for infected hand, 1.

STAFF CHANGES

Dr. Alexandria Ameer who was appointed assistant physician May 1, 1923 resigned December 31, 1924 to enter private practice.

Dr. William T. Cluney, who was appointed senior assistant physician, March 7, 1923 resigned March 20, 1925 to accept the position of assistant superintendent at the Yankton State Hospital, Yankton, South Dakota.

Dr. James Levins who was appointed assistant physician December 16, 1924 resigned August 29, 1925 to accept a better position at the Blythewood Sanatorium.

Doctor Louis Brisset des Nos was appointed assistant physician January 16, 1925.

Dr. Seth F. H. Howes was appointed senior assistant physician April 18, 1925.

Dr. Juba E. Pickering was appointed assistant physician October 29, 1925.

For the whole year we have always had two and sometimes three vacancies on the medical staff.

DENTAL WORK

We were again fortunate in having the services of a dentist for the whole year.

The dental work is looked upon as an essential to the comfort and physical and mental welfare of the patients.

Following is a list of the dental work:—Examinations 268; cleanings 1684; scalings, 279; cement and amalgam fillings, 68; amalgam fillings, 514; cement fillings, 112; synthetic porcelain fillings, 143; temporary fillings, 31; pulp canal fillings, 48; removal of pulp (cocaine), 19; pulp canal treatments, 104; extractions, 518; swollen face (abscessed teeth), 39; pyorrhea treatments, 63; plates repaired, 16; plates rebased, 2; full plates, 4; partial plates, 5; bridges 9; bridges repaired, 8; Richmond crowns, 2; gold inlays, 1; nitrous oxide anaesthesia, 2; novocaine, 311; ether, 1; x-rays, 53; treatments (stomatitis, etc.), 194.

TRAINING SCHOOL FOR NURSES AND EMPLOYEE PROBLEM

A class of three was graduated. There has been no change in the nursing situation, there still being the same difficulty in obtaining suitable applicants to take the course.

The necessity for the service of a training school for nurses in the successful operation of a State Hospital cannot be questioned. Year by year it has become more difficult to operate a training school in a State Hospital. This condition is not local, but is quite widespread through the whole United States wherever State Hospitals are found. But a few years ago the general hospitals were also feeling the stress in relation to operating training schools for nurses. They learned to meet the situation, however, by shortening the hours of work, improving the general living conditions of the nurse and elevating her social position in the hospital organization. Probably because the

State Hospital is under more restrictions it has not kept pace with the general hospitals in its efforts to attract candidates for the training schools.

If we believe that a training school in a State Hospital is necessary for the best care of our patients, we must take steps to meet the competition in the General Hospital training school, otherwise the training school in the State Hospital will disappear. Shorter hours of duty, more attractive rooms, better dining room facilities, increased entertainment, better teaching facilities, I believe will go a long way toward the re-establishment of schools in Mental Hospitals.

As usual the course of lectures was given the attendants throughout the year.

There seemed to be a greater supply of the usual ward employee, both male and female, than for a number of years.

It is much easier to get all other employees with the exception of the mechanics. The present pay rate does not seem to attract the best carpenters, masons, painters and other mechanics.

FARM, GARDEN AND GROUNDS

A new road was constructed on the northeast side of the quadrangle and in another year we will complete the whole construction program about the quadrangle.

We have had a very successful season on the farm. There was a short hay crop and also a short potato crop, but the garden never before produced in such abundance. There was a good crop of all small fruits and a yield of apples of about nine hundred barrels.

REPAIRS AND RENEWALS

The piazzas on wards D-2, D-3, C-3 and E C-4, were practically all reconstructed.

The repair to the Benny cottage was completed.

New windows were made and placed in one cow barn.

All three silos were re-sheathed and were re-topped, being shingled with asbestos shingling. A new cement base was constructed under each silo and cement runways built from the barn into the silos. With the exception of a supervising man from the construction company the work was all done by the hospital employees and patients.

The farm house was re-shingled and a new tool shed built for the use of the farm.

An old building was remodelled and converted into a two car garage.

Extensive repairs were made on the cement walks about the grounds. A new cement floor was laid in the farmhouse.

The inside of one c w barn was painted and the three silos were painted. The five sedation suites and the hydiatric room were also painted. Ward R and the chapel building were painted outside.

Hand stokers were installed under the eight boilers, the most of the work being done by the hospital forces.

The following projects are recommended for the coming year to be paid for out of the maintenance appropriation under "Repairs and Renewals."

1. Repainting the water tower \$1,000.00

This amount was appropriated last year but on account of the low water level in Farm Pond this work had to be deferred.

- | | |
|--|----------|
| 2. Purchase of machinery | 1,000.00 |
| 3. Relaying floors, ward F-2 | 366.00 |
| 4. Recovering spring house | 275.00 |
| 5. Completion of retaining wall at Power House | 2,000.00 |
| 6. Cemetery fence | 1,296.00 |
| 7. Purchase of milking machine | 1,150.00 |
| 8. Repairing porches..... | 3,000.00 |

SPECIAL APPROPRIATIONS

The work under the appropriation for the rebuilding of the laundry has been completed and the laundry was put in operation about March 1.

The whole money allowed for fire protection was expended. New mains and standpipes with hose connections were installed in eleven of the twenty-

two buildings. The hot air heating pipes in the basements of twelve ward buildings were covered with standard asbestos furnace pipe covering. In the basements of five ward buildings electric mains were placed on iron conduits. With the exception of the employment of one mechanic this whole work was done by the hospital forces.

From the money appropriated for the Purchase of Land, namely \$3,000.00, two tracts of land totalling approximately forty acres was purchased for the sum of \$2,689.25. Thirty acres of this land will be used mostly for pasturage purposes.

Only a part of the money appropriated for the piggery was expended. It was planned to locate the new piggery on the above mentioned newly acquired land. As the acquisition of this land did not take place until late in the season the actual building of the piggery had to be deferred until the following year. Many of the cement blocks have already been manufactured, however.

From funds granted to be expended for Repairing and Enlarging Sewerage, three new sewer beds were completed and considerable excavating done for one other bed.

Out of the money appropriated for the purchase of food conveyors nine Monel Metal Wirco food conveyors were purchased.

The following special appropriations are requested for the year 1926:—

1. Laying terrazo floors \$39,000.00

This request in part was made last year. The floors in the patients' dining rooms are of wood construction and have gotten into a condition where they will either have to be repaired extensively or there will have to be new floors. Wooden floors are entirely unsuitable for dining room purposes. In addition, errazo floors are important from a standpoint of fire protection.

2. Purchase of Food Conveyors \$3,600.00

Last year a request was made for the purchase of eighteen food conveyors for the purpose of insuring the service of hot food to the patients in the general dining room. Half the money was allowed and the sum requested this year is simply to complete the purchase of the number required.

3. Remodelling bath and toilet rooms 6,969.00

The Nurses' Home, which is a very fine building, was not primarily equipped with sufficient bath and toilet facilities to meet modern demands. The regulations of the Board of Registration in Nursing require that before the graduates of a training school can be eligible to take the State Board examination there shall be a definite ratio of the number of bath and toilet rooms to the number of nurses in the training school. In addition, the woman physician has quarters in one of the ward buildings and does not have an adjoining bath and toilet room. It is planned to give her quarters in the Nurses' Home and this will require an additional bath and toilet room. The sum requested is to meet the conditions and requirements as set forth above.

RELIGIOUS INSTRUCTION

Catholic services as usual have been conducted Sunday mornings, the Protestant services in the afternoon and the Jewish services on Wednesday. The patients manifest the usual interest in these services.

AMUSEMENTS AND ENTERTAINMENTS

The usual arrangement of having moving pictures on Monday evenings and dances for the patients on Thursday evenings has obtained as in previous years.

Various organizations, and especially the American Legion Posts and Auxiliaries, have presented the hospital with entertainments.

As usual the week of entertainment at Christmas was successfully carried out and was greatly appreciated by the patients.

We had an excellent orchestra throughout the fall, winter and spring seasons. They played at the moving picture shows, dances, special entertainments and twice a week on the infirmary wards.

There were the usual baseball games during the summer.

OCCUPATIONAL AND INDUSTRIAL WORK

Unfortunately the hospital was again for several months without the serv-

ices of a head occupational therapist and as a consequence the work suffered. However, we were finally able to get a new head occupational therapist and the Department is being reorganized and it is hoped there will be a speedy return to the usual standard of occupational work.

Year by year, during the summer months we are increasing the number of female patients who work in the gardens. Practically all green vegetables and fruits are harvested by the female patients. It is the policy of the hospital to take out a rather slightly disturbed group of patients and the effect upon them from a standpoint of physical health and improvement in conduct is excellent.

For several years requests have been made for the construction of new buildings to carry on industrial work. Last year a request was made for an appropriation for a new building for mechanics. Also an appropriation was requested for the purpose of changing over the present building used by mechanics so it could be devoted to industrial purposes for patients. On account of more pressing requirements this year this request is not made, but the need for suitable accommodations for male patients and female patients to be trained along purely industrial lines is as great as ever and is one of the important needs of the hospital.

FINANCIAL

The total appropriation for maintenance for the hospital was \$598,849.44. At this moment it is not possible to determine the exact liabilities, but apparently the expenditures will be about \$580,000.00, leaving a balance of approximately \$18,800.000.

ACKNOWLEDGMENTS

Members of the consulting staff responded when called and Doctor George O. Clark, a member of your Board, performed his usual valuable service by giving general surgical advice and performing surgical operations.

As usual there were many friends of the hospital who gave gifts of various kinds.

The hospital is under obligation to Miss L. S. Atwood of Worcester, the Medfield Library, Mrs. Webb and Mrs. Pierce of Medfield, for providing magazines and other reading material.

To Mr. Edwin Mitchell of the straw shop is due thanks for sending a number of hats which added very much to the appearance and comfort of the female patients.

Beckwith Post and Dover Post of the American Legion sent Christmas remembrances to the soldier patients.

The American Legion Auxiliary of the Beckwith Post of Medfield visited the soldier patients several times and brought refreshments.

The American Legion Auxiliary of the Dover Post also brought refreshments and gave entertainments.

The members of the American Legion Auxiliary of Millis together with members of the Legion provided refreshments every other month and also provided several entertainments.

Mr. Howard Mott of Millis presented the Boggestowe Players.

The Medfield State Hospital Employees' Club presented their usual entertainment for the benefit of the patients.

Mr. Leroy Kiff of Attleboro presented a play for the patients.

The members of St. Paul's Episcopal Church, Brockton, again presented a very splendid play.

The Disabled Veterans Christmas Remembrance Committee, as usual, sent refreshments to every soldier patient at Christmas.

The representative of the Knights of Columbus made his usual monthly visits, bringing candy, cigars, cigarettes and games for the soldier patients.

On the whole the year has been successful. There has not been any one outstanding event, but there has been steady progress. I believe that year by year we are doing more for the welfare of the mentally sick.

Whatever measure of success we have had in the way of general accomplishments and in improving the welfare of our patients is due to the most

excellent co-operation and loyalty of the officers, heads of departments and employees. As usual, there has been a splendid spirit and morale.

The support and encouragement of the Board of Trustees have heartened all in the prosecution of the year's work.

Respectfully submitted,
ELISHA H. COHOON,
Superintendent.

REPORT OF THE SOCIAL SERVICE DEPARTMENT

To the Superintendent of the Medfield State Hospital:

The following is the report of the Social Service Department from October 1, 1924 to September 30, 1925:

I. -NUMERICAL SUMMARY OF CASES:

<i>Hospital Cases</i> (including House Patients and Out Patients)		<i>Community Cases</i> (including School Clinic Cases)
New Cases	124	41
Total, including new		294

II. SOURCES OF NEW CASES:

1. Number of cases referred by hospital physicians	124
2. Number of cases referred by Community Agencies	43

III. ANALYSIS OF WORK:

Purposes for which cases were referred:

1. Histories of patients (taken outside the hospital)	170
2. Investigations:	
(a) Conduct disorder including court record	6
(b) Employment record	5
(c) Home conditions	29
(d) Statements of patients	4
(e) Statements of others	8
(f) Community attitude towards' patient's discharge	3
3. Care of patients' families	2
4. Location of relatives	138
5. Miscellaneous	4
6. Supervisions	35
(a) Visits to patients on wards	46
(b) Visits to patients on visit	126
(c) Visits to patients in family care	20
1. Boarding homes investigated	2
2. Number of patients placed in family care	2
3. Number of patients replaced	1
4. Number returned to the hospital	1

IV. SPECIAL FEATURES

More cases have been referred for investigation of home conditions before patient is discharged from the hospital. This, we feel, is very desirable and should be of value to the physicians in considering the mater of discharge.

Lectures on the history, development and scope of Social Service to the senior nurses in the training school

Social Service conferences attended

Visits to other institutions

Special studies—Surveys have been made of the resources in Quincy, Fall River, Newton and-Framingham and of the attitude of these respective communities toward the possible establishment of a mental hygenic clinic.

The use of an automobile in our work has helped greatly in covering our extensive territory.

Respectfully submitted,
MARY H. HOLLAND,
Head Social Worker.

Balance carried to next year	22,667.16
Total as above	<u>\$23,124.59</u>

PER CAPITA

During the year the average number of inmates has been 1726.388.
 Total cost for maintenance, \$577,183.87.
 Equal to a weekly per capita cost of \$6.4294 (52 weeks to year).
 Receipt from sales, \$3,847.11.
 Equal to a weekly per capita of \$.0428.
 All other institution receipts, \$31,146.93.
 Equal to a weekly per capita of \$.3469.
 Net weekly per capita \$6.0397.

Respectfully submitted,

JOSEPHINE M. BAKER, *Treasurer.*

Total receipts and payments are in agreement with the Comptroller's books of accounts.

JAMES C. McCORMICK.
