

CITY OF SOMERVILLE

MASSACHUSETTS

ANNUAL REPORTS

1925

SOMERVILLE PRINTING Co.
1926

REPORT OF THE CITY AUDITOR

OFFICE OF THE CITY AUDITOR,

January 28, 1926.

To the Honorable, the Mayor, and the Board of Aldermen of
the City of Somerville.

Gentlemen:—In accordance with the requirements of Section 3 of Ordinance Number 44, I herewith submit a report of the expenditures and receipts during the year 1925, showing in detail the appropriation and expenditures and the receipts from each source of income. Also a statement of the funded debt and temporary loans, table relative to maturities and interest, a balance sheet showing the assets and liabilities at the close of the fiscal year and a statement of the treasurer's cash.

Respectfully submitted,

HOWARD E. WEMYSS,

City Auditor.

I hereby certify that in accordance with section 50 of chapter 41, General Laws as amended by chapter 33, Acts of 1924, I have verified the treasurer's cash as of December 31, 1925 by actual count, and have verified by reconciliation of the bank accounts the amounts on deposit in the banks as of the same date.

The total cash balance December 31, 1925 was \$298,507.19, as follows:—

Somerville National Bank	\$109,265.76
Old Colony Trust Company	44,020.53
Commercial Security National Bank	68,813.51
Somerville Trust Company, Benefits	16,186.71
Somerville Trust Company, Teachers	39,811.74
Highland Trust Company	16,826.00
Cash in office	3,582.94
	<hr/>
	\$298,507.19

I further certify that in accordance with the requirements of section 53 of said chapter 41 as amended by chapter 33, Acts of 1924, I have examined the Trust Funds Securities in the hands of the city treasurer and find them to be correct, as follows:—

Caroline G. Baker Fund	\$300.00
S. Newton Cutler School Fund	5,322.22
S. Newton Cutler Library Fund	1,064.45
Isaac Pitman Library Fund	5,314.58
Olive C. Cummings Fund, Poor	1,751.45
Frances A. Wilders Childrens Fund, Library	100.00
Martha R. Hunt Fund, Library, Books	14,105.25
Martha R. Hunt Fund, Library, Art	1,299.77
Sarah Lorane Graves Fund	400.00
	<hr/>
	\$29,657.72

I further certify that I have examined the cash and accounts of the city clerk and have verified the cash on hand December 31, 1925 by actual count and find same to be correct.

HOWARD E. WEMYSS

January 28, 1926.

MIDDLESEX, S.S.

Then personally appeared the above-named Howard E. Wemyss and made oath that the foregoing statement was correct and true to the best of his knowledge and belief.

JASON M. CARSON,

Justice of the Peace.

REPORT OF THE TREASURER AND COLLECTOR OF TAXES

Somerville, Mass.

January 30, 1926

To the Honorable, the Mayor and the Board of Aldermen of
the City of Somerville:

Gentlemen:

I herewith present the annual report of the City Treasurer and Collector of Taxes for the year 1925. The outstanding feature of the report is the statement showing uncollected taxes, the balance uncollected prior to the 1925 commitment being \$334.44 for the year 1924. The amount allowed for Overlay & Abatement in the commitments of 1922, 1923 and 1924, was \$87,475.00, being approximately 1% of the total warrant for these years. Of this amount there was saved for and credited to Reserve, Surplus from Overlays the sum of \$27,364.05 because of the prompt collection of the taxes. This saving was equal to 31% of the total allowed for Overlay & Abatement account for the years referred to. The taxes of 1925 show satisfactory collections. The total poll commitments were \$61,872.00, outstanding December 31, \$2,696.00, or approximately 4½%; personal tax commitments \$267,297.96, outstanding December 31, \$27,392.35, or approximately 10%; real estate commitments \$2,649,876.06, outstanding December 31, \$412,574.48, or approximately 16%, which would seem to be a fairly good record.

Respectfully submitted,

JOSEPH S. PIKE,

City Treasurer and Collector of Taxes.

---------------------------	----------------------------------------

CITY OF SOMERVILLE, MASSACHUSETTS

February 19, 1926

To the Honorable, the Mayor and the Board of Aldermen :

The Public Welfare and Recreation Commission submits this report of its work for the municipal year 1925 with recommendations for the development of the interests committed to its care. The municipal appropriation for the work of this Commission during the past year was \$8,000. An itemized statement of the expenditure of this money is given in a table in another part of this report. The Commission has carried on during this last year the general undertakings which have been established in previous years and which have heretofore been reported upon by the Commission and by the Director of Recreation, employed by the Commission. All of these branches of work have been carefully managed and developed as far as public interest and the resources at the command of the Commission have warranted. As the Commission has no control over outdoor areas or over buildings or parts of buildings, its work has been mainly in providing service. During the winter it has carried on recreational activities in certain schoolhouses; during the summer it conducted supervised playgrounds on certain parks and school grounds, and during the open season it has also provided supervisors of play for certain localities and on certain days of the week. A full account of these activities for the year 1925 will be found in the report of the Director of Recreation, presented herewith. In its concern for the development of recreational opportunities in the City of Somerville, the Commission notes with pleasure the advances made by the City during the year 1925 in the erection of a commodious Field House for Dilboy and Somerville Fields and the purchase of additional land for the Burns School playground. It recognizes also the interest in playgrounds shown by the Planning Board and approves of the recommendations made by that body for increasing the play areas under control of the city. It gives approval to the proposal of City Engineer Ernest W. Bailey to devote the northeasterly end of Saxton C. Foss Park to playground purposes, affording for the eastern part of the city opportunities equivalent to those now provided by Dilboy and Somerville Fields. In connection with these actual and proposed additions to the playgrounds of the city, the Commission calls attention to the fact that practically the only play areas now open to the use of

children are those owned or controlled by the city. Vacant lots have almost entirely disappeared. Backyards no longer furnish room for the play of children, such spaces now either being occupied by dwellings or by garages. The streets are unsafe and the sidewalks are too narrow for children's play. Hence, the only chance they have for play is upon the public areas. Therefore, it is important that these areas shall be numerous enough to provide room for all the children and shall be in such a condition as to furnish a fit place for children to play all the year round. Neither of these conditions is true at the present time. There are not enough play areas and those that we have are not properly and adequately conditioned. Such being the case, the Commission conceives it to be its duty to call the public attention to this situation and to offer a reasonable plan for escape from it. With this purpose in view the Commission presents the following program of improvements to be undertaken progressively during the next five years. This program is expressed in two parts. The first contains a minimum statement of things which ought to be accomplished within that time; the second contains a list of things which it is desirable to have provided within five years but which, owing to their greater cost, the Commission does not urge as a part of its five-year minimum provision.

The Commission recommends that an appropriation be made this year for a part of this work and that in succeeding years appropriations be made to carry on the improvements continuously until the whole undertaking is accomplished. The Commission is convinced that it is necessary for the City to do this work before its recreational areas can yield their full value. Never before has there been such urgent need of places of safety and refuge for children from the dangers of the street as exist today. Moreover, the urgency of this need will grow with the increase of building and with the increase of traffic congestions in the streets of the city. The Commission believes that the adoption of the following program of improvements would, in five years, go a long distance in the direction of providing adequate outdoor recreation for the whole community.

Program I The Commission urges that the following improvements be made progressively during the next five years.

1. Resurfacing parks and playground areas and certain schoolyards.
2. Fully equipping all playground areas with apparatus varying according to the size and nature of the playground. Specifically it is urged that suitable out-

door permanent equipment be installed on Lincoln Park, Trum Field, Cherry Street Grounds, and Dilboy Field.

3. Enlarging the wading pool at Lincoln Park, repairing the wading pool at Trum Field, and providing wading pools in other localities.
4. Constructing running tracks at Somerville Field and Lincoln Park.
5. Converting the northeasterly end of Foss Park into a playground in accordance with plans of the City Engineer approved by the Somerville Planning Board.
6. Providing a new Public Bath House on the Mystic River to take the place of the one now located at the Wellington Bridge. This Bath House and Beach is no longer suitable for public use because of a new storm drain which has recently been constructed on account of the Ford plant located nearby. This drain crosses the bathing beach to empty into the Mystic and greatly reduces the amount of free space available for beach purposes.

Program II

1. Erecting recreation houses to contain storage rooms, showers, toilet, etc. at Cherry Street Playground and Foss Park.
2. Acquiring additional play areas for neighborhood playgrounds.

CONCLUSION :

There are many evidences of a new and increasing interest among the people of Somerville in improving the recreational opportunities of the city. This condition encourages the Commission to believe that the adoption by the City Government of this plan of progressive improvement would have the approval of citizens generally. In this hope and belief the Commission makes this report and asks for it the thoughtful consideration of those in authority as well as of all persons to whose benefit and enjoyment these improvements would greatly contribute.

Respectfully submitted, for the Commission,

CHARLES S. CLARK,
Chairman.

REPORT OF DIRECTOR OF RECREATION

To the Public Welfare and Recreation Commission:—

In addition to the customary annual statement covering the year's activities, undertakings, and accomplishments under your Commission, the Director has been required by vote of the Commission at its December 1925 meeting, to present, as supplementary to such report, a further statement,

(a) analysing the present status of the Commission's general undertakings;

(b) setting forth the Director's judgment regarding provisions which are necessary or highly desirable for the future success of Recreation and Welfare in the City;

(c) offering suggestions and information that may assist the commission in defining its policies and elaborating and reorganizing its service.

Accordingly this communication, in form and in content, varies somewhat from previous reports by the Director, and from the more common form of routine statement that is connoted by the term "Annual Report". Whereas customarily the emphasis is placed upon presentation of statistics, records, comparison with previous records, and specific details of the work in hand, the emphasis in this Report is transferred to the other divisions of the Report, mentioned above as additional, and distributed among them. For more complete and more specific information concerning the details of the work carried on during the year, reference is made to the Annual Report of the Director of Recreation for 1924, contained in the Annual Report of the Public Welfare and Recreation Commission for 1924. The details given in this previous report explain the system, the methods, the conditions of carrying on the work, etc. The extension of this system and these methods, the improvement or mastery of these conditions, and the initiating of entirely new enterprises for Public Recreation, have been the business of the year 1925, just closed.

The customary record of the year's activities under my supervision is submitted first; and the other business of the report comes later in this communication.

STATEMENT OF 1925 ACTIVITIES

It seems wise, in presenting this report, to give separate consideration to the various branches of the Recreation work. They include

- I. The Summer Playgrounds
- II. The Spring-and-Fall Supervised Athletics
- III. The Saturday Playgrounds for Small Children
- IV. Evening Adult Recreation Centers
- V. The Neighborhood Center
- VI. The Preserving and Canning Activities of School Children
- VII. The Recreational Activities Involving the General Public
- VIII. The Experiment in Community Recreational Drama
- IX. Public Celebrations.

Summer Playgrounds

The essential character and general mode of the Summer Playgrounds Season are the same as those of the 1924 season, reported a year ago by the Director.

Features

But some new features of the season of 1925 are conspicuous to the observation of the Director, and are judged worthy of special mention under this caption. More detailed reference to them, each under its proper heading, will follow.

New units of supervised play, added to the Summer Playgrounds system this year to serve the interests of children in sections of the City hitherto served most meagerly or not at all, have, in the Director's estimation, been so successfully operated as to constitute one of the most beneficial accomplishments that can be cited under consideration of Summer Playgrounds for some time.

Enlargement of the supervisory corps, consequent on the expansion of the system, has increased and complicated the Director's task of unifying and vitalizing the work, standard-

izing objectives, co-ordinating the various units, superintending details, supplying materials where and when needed, assisting in training the workers to highest efficiency, and evaluating the relative efficiency of the workers.

A marked public interest in playground work, noted and reported last year, has continued to express itself this year, even to more marked degree and in greater variety of ways, especially among citizens in those sections of Somerville where new playground units have been supervised this past Summer for the first time.

The zealous corps of play-supervisors and assistants whose previous accomplishments have brought forth many favorable comments of public officials, private citizens and the public press, has undergone some important changes in personnel for 1925, without any lowering of efficiency, in the Director's opinion. While regretting the withdrawal from the ranks of several well-qualified, trained, loyal workers, whose contributions to the system make the community their debtor, the Director reports an asset in the addition to the corps of an even larger number of equally valuable workers.

Grounds

Fourteen areas were used for playground purposes during the past Summer. Seventeen units were conducted, however, some of these areas having separate units for boys and girls. The various units are named as follows, and the names suggest the areas utilized:

Bennett School Ground	(for girls)
Central Hill Park	(for girls and boys)
George Dilboy Field	(for boys)
Fellsway East	(for boys)
Saxton C. Foss Park	(for girls)
Glen St. Playground	(for girls and boys)
Hodgkins School Grounds	(for girls)
Joy St. Playground	(for boys)
Kent Street Boys' Playground	
Kent Street Girls' Playground	
Lincoln Park	(for boys)
Morse School Grounds	(for girls and boys)
Perry School Grounds	(for girls)
Richard Trum Boys' Playground	
Richard Trum Girls' Playground	
Tufts College Old Campus	(for girls)
Western Playground	(for boys)
(At Western Junior High School Grounds)	

Two of these units were new this year to the Playgrounds system:—those at Glen Street Playground and at Tufts College Old Campus. We have already stated that they have been

operated with complete success, in the Director's opinion, and that, in service to the play needs of Somerville children, their operation seems to be a very considerable development in Playgrounds system.

The Playground at Tufts Old Campus had been originated in 1924, and financed in greater part not by the City, through this Department, but through the private initiative and enterprise of citizens in the upper Clarendon Hill section, led by the Mothers' Circle. These ladies had enlisted the interest of parents and children and sought assistance and encouragement from the Public Welfare and Recreation Department. This year the activities of this playground were more completely incorporated into the City-wide system maintained under the Commission. New permanent play equipment, including swing frames, swings, sand boxes, etc., was installed at expense from the Commission's funds, and the Commission and the Mothers' Circle shared the expense of Supervision. The local supervisor was paid by the Circle for 5 weeks. The Commission financed the remainder of the payment of this position,—and provided the services of the Director and the special supervisors in dancing and handwork; while workers under the Commission attended to publicity for the enterprise and co-ordination with other playground units. The City supplied also the portable play materials. In this enterprise a third cooperating agency was the Trustees of Tufts College, who in public spiritedness granted the use of an attractive, ample and suitable section of its grounds.

The Glen Street Playground unit was entirely new. It is located on the vacant land (a large part of which is City property) at the junction of Glen and Oliver Streets,—a piece of land which the Director urges upon the Commission as extremely desirable for complete ownership by the City and for very thorough-going conversion into a playground. Its operation during the past Summer was a boon to hundreds of children who reside in an area hitherto totally unserved. The immediate district, within four minutes of this land, has a child population of several hundred, and the districts outlying are also unequipped with playgrounds. Several main thoroughfares for motor vehicles—Franklin Street, Cross Street, Washington Street, Medford Street, Glen Street and newly paved Pearl Street—pass within one or two minutes' walk of this playground, constituting a menace to so many hundred children who might be freed from danger by means of a properly equipped, active and attractive playground. Regardless of more detailed plans the Director urges complete fencing of this area by a 12 ft. wire screen fence; provision of drinking-

water facilities and seats; resurfacing; re-placement of baseball back stop; provision of shelter or shade trees or both.

In the Director's fourteen years of experience with City supervision of play no such response on the part of children and their families has been shown, when supervised play opportunities have been provided, as was shown during the past Summer when this unit was first operated. Scores of expressions have come to the Director from residents of the neighborhood, to the effect that this operation has supplied a much felt need of long standing and that even in the opening weeks very tangible evidence of good had resulted. The spontaneous response of the children was inspiring to all connected with the enterprise. (The Director feels an urge to express at this point admiring appreciation for the enthusiastic leadership supplied by the two persons assigned to supervision at the Glen Street Playground: Miss Mary Eaton and Mr. William Koen.) Further comments on the grounds, their conditions, etc., are made in the supplementary statement later in this report.

Supervision

Twenty-six persons including the Director were employed in the supervision of the Summer play. Of this number, four were assigned to individual playgrounds; two acted as special supervisors of folk dancing; and one as supervisor of hand-work.

All but three of the supervisors are residents of Somerville. This statement is made to indicate that despite the Civil Service requirements as to qualifications, it is possible to secure from our own residents efficient supervision. The Director feels that this policy should be continued in Somerville unless its continuance should in any way handicap the effects of the playground organization. All of the three non-residents were specialists, specially trained, for whose positions no trained Somerville applicant could be found in spite of thorough investigation.

New problems in organizing the supervisory corps, gradually presenting themselves previously, have now become major problems of the whole undertaking, as a result of the increased number of playgrounds and the increased number of children under supervision.

During 1924 and 1925 the number of summer units has increased from eleven to seventeen, and the number of children under supervision has increased about 40 per cent. Direct superintendence, by the Director, of individual supervisors' work among their own groups of children is more difficult. Administrative problems are larger and more com-

plicated. Special supervision for special activities can no longer be delegated to part-time specialists, but requires full-time special supervision. Any progress, and in fact maintenance of present efficiency, urgently demands

- (a) Employment of Assistants to the Director, who shall not be attached to any given playground in particular.
- (b) Increased provision for interplayground visitation and transportation of supplies.
- (c) Increased provision for expense of coordinating supervision through central headquarters.
- (d) Employment of additional persons to assist in supervision on larger units,—Lincoln Park, Foss-Fellsway, Glen Street.

Attendance

Attendance has been high and regular at all the playgrounds, with a significant uniformity throughout each week and throughout the season on any given playground. The City-wide aggregate attendance this season, partly because of the increased number of play units, was greater than that of the 1924 season by about ten per cent; and the same is true of the average daily attendance. Most noticeable in increased attendance among the older playgrounds were the Fellsway and Morse grounds.

Activities

The activities conducted on the playgrounds may be grouped under six heads and distinguished as Games, Handwork, Dancing, Safety Campaign, Miscellaneous Activities, and Special Events including the Final Play Festival and Display of Handwork. For the sake of brevity, the activities are not discussed in detail. The Report of the Director for 1924 gives a detailed explanation of them.

CLOSING PLAY FESTIVAL. The closing festival held on the Wednesday evening of the final week of the season, at twilight, was calculated to serve a four fold purpose, namely:

1. The purpose suggested by its name.
2. To demonstrate organized play to the public, and exhibit its results, with a view to securing wider public interest.

3. To encourage the children in their play activities, and to provide free public recreation for adults.
4. To give the children an opportunity to repay the community in part for the benefits they had received from the supervised playgrounds.

The Festival attracted several thousands of the public in addition to the three thousand five hundred boys and girls who participated in the twenty events on the program. It was conducted on Central Hill Park, in the area in front of the High School Buildings and the City Hall Annex. The program of events included competitive games for boys and girls, folk dancing accompanied by music furnished by a brass band, relay races, marches, drills, a doll carriage parade, and a procession of the participating children.

This festival furnished a fitting close to the playground season.

Finances

The total expenditure from the City Treasury for the Summer Playgrounds program under your Commission was \$3,550.00. Of this amount the expense of the supervision was \$2,229.00, not including salary paid to the Director during the summer, which is elsewhere included as a part of the all-year item of Director's Salary; for supplies, maintenance and labor, \$1,321.00.

The Somerville Playgrounds Association has been of great financial assistance (for some years past), in providing equipment, particularly on those areas not under control of the City Engineer's Department.

Further financial assistance came, of course, from the fact that the cost of supervision on the Tufts Old Campus Playground was met by the Mothers' Circle.

As a result of these facts, and of the additional fact that new equipment and repairing of old equipment must be provided to cope with the results of wear and deterioration through several years, it seems wise to point out here that in anticipating the year 1926 from the financial standpoint a fairly substantial increase in expenditure for equipment, and for City supervision of the Tufts unit, must be considered. And at this point, too, the Director, regarding finances, calls attention to the possibility of still additional cost involved in the proposed increase of number of playgrounds to be operated in the Summer and at other seasons. This increase is proposed in the series of Recommendations later in this report.

Recommendations—Summer Playgrounds

Based on thoughtful study and thirteen years of intimate experience with the playground situation in Somerville, the following recommendations for the future are submitted at this point, as belonging most especially to the Summer season's interest; they will be included again in a series of recommendations later in this report, covering the general Recreation work of the entire year. Other recommendations prompted by experience in the Summer Playgrounds season of 1924, are purposely omitted at this point and reserved, on the ground that they have application beyond the Summer season, for inclusion in the General Recommendations near the close of this General Report.

1. The early completion of the Playground at the Western Junior High School.
2. Improvement (and possibly extension) of the playground at Joy Street.
3. Providing a playground surface and equipment on the vacant land (a large part of which is City property) at the junction of Oliver and Glen Streets, the equipment to include fencing, replacement of baseball back-stop, swing-frames, seats, shelter house and shade trees.
4. Early completion of Saxton C. Foss Park, with a view to utilizing the lower end of it for athletic purposes, or the alternative suggested later in this report under the caption, "Playgrounds."
5. Resurfacing the playground at the Morse School; and completing the enclosure of the area by adding erection of a screen fence, on the westerly side, like that on the southerly side.
6. Installing of more permanent framework for swings and teeters at the Morse Playground.
7. The planting of shade trees on some of the playgrounds to provide a natural shelter for the future.
8. Provision for a male supervisor at Central Hill Playground to serve the athletic interests of the boys at that center and to give part time supervision to older boys' activities at the Morse School Playground in Summer. (No male supervisor has ever been assigned to either playground.)

9. Operation in Summer of additional units on the grounds of the Union Square branch of the Public Library; at the Cherry Street grounds recently purchased for play uses; and on the grounds of the Northeastern Junior High School.
10. Increasing the length of the period of supervision by at least one week.
11. Provision of musical accompaniment for folk dancing.
12. Provision for increase in the supervision corps to meet the needs mentioned earlier in this report under the caption, "Supervision."

Saturday and Afternoon Playgrounds

Conduct of supervised play on Saturdays is calculated specifically to encourage active play of children under eleven years of age. Still further expansion of the supervised play plan, a program of after-school supervised athletics, aims to serve the older boys and girls,—those of the Junior High School and High School age.

For details of the work in this branch, reference is made to the 1924 report.

For outlining the methods, the activities, and the results in both these fields, it is well to emphasize the distinctive characteristics of each of these activities as they are to be differentiated from each other and from the Summer activities.

Specific Objectives

In the Saturday Playgrounds supervision:

- (1) The "Neighborhood Playgrounds" idea is emphasized, as expressed in the selection of smaller and less pretentious play areas, close to the homes of the children of districts somewhat limited in area, rather than the larger play centers, such as the public parks, which are intended to serve larger districts.
- (2) Special emphasis is given to the attempt to interest and provide activity for smaller children—those below eleven years of age.

In the After-School supervised athletics:

- (1) More active and less varied organized games, adapted to play by older boys and girls are encouraged.
- (2) The larger areas, intended to serve larger districts, are operated; and fewer units have therefore been organized.

Saturday Playgrounds

Gradually, eight units of organized play have
GROUNDS: been under supervision. They are listed in the Director's 1924 report.

It should be noted that no Saturday playground is west of the summit of Spring Hill; and that all units are located within approximately only one-third of the City's area; and that all but those at the Morse School are located within one-quarter of Somerville. This limitation has been necessary because funds were not available for any expansion. The Director is decidedly of the conviction that the number of Saturday playgrounds to be supervised in 1926 should be at least twice as great as the number supervised in 1925. There is a present demand on the part of children and adults in several sections for added units.

Repetition is here made of the analysis offered in the 1924 Report, regarding the value of this branch of the work and the Director's judgment regarding desirable future policy:—

1. The Saturday Playground is entitled to a position of great importance in developing a Municipal Recreation program.

2. The "Neighborhood Playground" plan enlists the activity of quite as many children—though in a larger number of units—as does the Summer Playgrounds plan of organization, within the sections of the City thus far provided for.

3. The "Neighborhood Playground" plan has the important merit that it reaches very many children who otherwise might not acquire the habit of utilizing the City's playground facilities.

4. The "Neighborhood Playground" plan enlists the more intimate interest of a great number of parents.

5. The "Neighborhood Playground" plan must result in a greater attendance on the large playgrounds later, inasmuch as it "educates" children in their early years to the Municipal Playground idea.

6. The Saturday Playground plan contributes largely to a "carrying over" from summer to summer of the desirable results obtained in following the objectives of the Playground work.

Afternoon Supervision

The after-school supervision of athletic activities for boys and girls of High and Junior High School age, two afternoons a week during the 18 weeks of Spring and Fall seasons, was conducted on the same basis as during the preceding year. No funds being available for expansion of, or further experiment in, the idea, there are only a few matters to be reported as new. These are mentioned immediately below and reference is here made, for complete statement on this branch of this work, to the Director's 1924 report.

Attendance at the boys' units has increased about 40 per cent beyond that of 1924, without increased cost, indicating growth in appreciation and utilization of their opportunities among the boys of the city; also the need and demand for this branch of your Commission's service; the increasing value to the Community to be realized from this undertaking as time goes on without proportionate increase in cost; and the worthiness of the expenditure that would be involved in extending the service to sections of the City not now reached.

Attendance and activity at the Girls' Centers, reported at the close of 1924 to be far less satisfactory than that of the boys' centers, was not much increased during 1925, in spite of persistent effort and study by your Director and the responsible supervisors; and the experiment in this phase of the work was discontinued by action of the Commission, at the Director's recommendation, at the close of October, 1925. This discontinuance was made partly because of the need for transference of funds to other branches of the Commission's work where more immediate results were possible.

In explanation of the apparent temporary failure of the experiment here, it should be recalled

1. That this experiment had been launched considerably later than that among the boys, and had therefore not had time to develop to the same degree;

2. That between September 15, 1924 and October 25, 1925, not more than \$220 was expended on the supervision for the girls, while some actual physical and recreational value came during this time to a small number of girls who took advantage. All of them, according to the Commission's view, were fully entitled to these advantages.

3. That the inherent difficulty of enlisting the interest of present-day post-adolescent girls in this kind of activity is very great, especially when all of the centers of possible activity are so public and unsecluded.

Finances—Saturday and Afternoon Playgrounds

Expenditure in the field of Saturday and after-school supervised play amounted to \$1,505.01; of which \$1,339.50 was expended for supervision and \$165.51 for supplies, etc.

Recommendations—Saturday and Afternoon Playgrounds

The following recommendations regarding future conduct of the Saturday and Afternoon Supervised Play are respectfully submitted. They are repeated later in this report among the General Recommendations concerning the Recreation work as a whole:—

1. Increasing the number of Saturday "Neighborhood" Playground units from 8 to at least 16, making this branch of the work City-wide in scope, beginning immediately with the Kent Street Grounds.

2. Increasing the number of units of boys' supervised after-school athletics from two to four.

3. Increasing the number of sessions per week at after-school playgrounds,—from two to three afternoons.

4. Provision of the necessary field equipment for Tennis, Field Hockey, Soccer, etc., for use at these after-school sessions.

Girls' Canning and Preserving Activities

A most efficiently administered and supervised branch of the undertaking of the Public Welfare and Recreation Commission is the activity among girls who during spare time in Spring, Summer and Fall preserve fruits, vegetables, etc. Though this branch is perhaps less spectacular and is less known publicly, a high degree of efficiency in preserving has been attained among many girls of Somerville, whose ages range from 10 to 15 years; and a highly enjoyable and profitable form of recreation has been provided them.

This work has been carried on in 1925 more extensively than ever before. Girls were enrolled earlier and in larger

number; and a larger numerical proportion of them completed the season's exercises and requirements.

The organization of the work requirements made upon participating girls, schedule of sessions, centers, etc., and the details of the work are carefully presented in the Director's Report for 1924 to which reference is again made. (See pp. 28-30. Annual Report of the Commission for 1924.)

INCREASED ENROLLMENT. One hundred thirty-five girls were enrolled in the Clubs.

The products of their activity included approximately 8,000 jars, glasses, etc. These contained fruits, vegetables, jellies, jam, soups, fish, and pickle products.

EXHIBITION. On September 25, 1925, a central exhibition was held at the High School. About 800 jars were attractively displayed. First, second and third prizes were given for the best work in each year of enrollment. Honorable mention was given to ten others. Over 75% of the parents of children enrolled in the clubs were present at the exhibition showing more decidedly than ever the widespread interest which is growing from year to year in this home-making work.

FINANCES. The total cost of carrying on this work was \$568.81, of which \$420. was expended on salaries of supervisors; \$48.81 on supplies and prizes; and \$100 for dues paid to the Middlesex County Bureau of Agriculture and Domestic Science Division of Junior Extension Work, for securing the County cooperation defined and described in the 1924 Report, page 29.

Public Evening Recreation Centers

The Public Evening Recreation Centers aim at profitable recreation—indoors—for adults. The scope of the work thus far has been limited to young men. No elaborate or intensive program has been carried out, because of a variety of reasons, which are here indicated. But in general summary the Director submits as his estimate that results have been proportionate to the City's financial expenditure (about \$430.00 for the year); proportionate to the possibilities of an undertaking in which appropriate indoor recreation facilities are almost totally lacking and the workers in supervision all part time or occasional workers; and proportionate to the time during which this branch of the work has had opportunity for evolution.

CENTERS. The three centers are located in the buildings of the Bennett, Bingham and Morse Schools. In each building a room (a double room at the Bennett Center), used during the day by children of the lower primary grades, is at the disposal of the young men in attendance, with sessions from 7:30 to 9:30, two evenings each week. The evenings vary with the various centers. A piano is available at each.

ATTENDANCE. The average attendance for all centers has been thirty young men an evening, with a maximum attendance of 175 at the Bingham; 85 at the Bennett, and 65 at the Morse. The average age of those in attendance has been 19 years. The minimum age for participation is 17 years. Very few above the age of twenty-one have been attracted, though it has not been the intention to restrict the activity for the benefit of youths.

ACTIVITIES. Since the whole enterprise has not passed the experimental nature, the program of activities is still in process of evolution. Naturally, a diversity is found among the local communities to which the centers cater; and accordingly there is a diversity in the nature of the activities.

Among the activities carried on may be mentioned:

1. Group singing and the organization of Glee Clubs.
2. Some reading.
3. Table games, puzzles and pastimes.
4. Half-hour "talks" by prominent athletes.
5. Indoor athletics (in the Bingham School only.)
6. Discussion of current topics of interest, as radio.
7. Informal, unpretentious, improvised entertainments.
8. Whist and checker tournaments.
9. An orchestra.
10. Initial steps in developing activities in drama.
11. Debating.
12. A movement to arouse interest and organization leading to out-of-door activities, after the indoor season, among the same young men, and their friends, who frequent the indoor centers. This movement crystalized itself in organization of a baseball league for Somerville young men, which operated successfully in the Summer. The members and followers of each team held occasional meetings in the buildings where the centers are located in the hours of

the center sessions. Some of the teams have conducted recreational enterprises, such as whist parties, to finance the outfitting of the baseball teams, and in this way they have provided recreation for parents and friends in their respective communities; and have also enlisted the interest of persons in those communities in the Recreation Centers and in the general program of the Public Welfare and Recreation Department.

SUPERVISION. In the conduct of this undertaking three persons besides the Director have been employed for supervision; one being the Supervisor of one center, one a leader in the musical activities in all three centers, and one a general assistant employed according to need in one center or another.

An analysis of the values of recreation centers to Somerville, the provisions that are necessary for any further development and the difficulties of the work at present, is given in the Director's 1924 report. Definite Recommendations, on this study and analysis are submitted at the close of this present report.

Neighborhood Center

For the Welfare and Recreation work at the Anne McCarthy Neighborhood Center, located in the Bennett School building, report of operations for 1925 would be very much the same as for 1924. All of the work outlined in the previous report (pages 35-37) has been carried forward and the organization and methods have continued the same until the usual closing in May.

With the resumption of the Fall Season, however, an important change was made necessary in the Commission's policy with regard to this Center. The entire financial responsibility for this center, or, as alternative, minimizing its operations, was made necessary by the withdrawal from the enterprise of the representatives of the Committee on Ways and Means of the Somerville Federated Women's Clubs, who had for several years shared in the administration and financing of this center to such degree that the control of the Center was largely in the hands of these ladies.

Since the Commission was without funds for assuming the entire burden, and since any continuance of operation opened up the problem of developing a new organization under City administration, the Commission adopted a policy of de-

liberation as to its future program; and thus the usual fall reopening of the center's activities has been postponed in 1925, and only in December was any decision reached. In accordance with this decision, an experimental reopening is to be made in the beginning of January 1926, with greatly reduced activities.

Community Drama in Recreation

The work under the Commission in Recreational Drama, in which experimental beginnings were made late in 1924, has been carried somewhat further in 1925, still without any expense to the City.

The general theory in this experiment has been

- (1) that a city of Somerville's size has a goodly number of young men and women who are interested in dramatic expression and its kindred arts of aesthetic dancing, pageantry, choral activities, scenic lighting, stagecraft, public speaking, etc.;
- (2) that such interest can be stimulated into organized activity encouraged by the Municipal Department controlled by your Commission;
- (3) that cultural and recreational value to the community at large would result from any considerable activity by groups thus organized, to be affected by amateur theatricals and pageants, organization of district dramatic clubs, etc.;
- (4) that the Public Recreation Centers, Church and Parish Associations and Clubs, the High School Players' Club, etc., constitute a ready medium of organizing activities;
- (5) that public observances of such holidays as Christmas, Independence Day, etc., can furnish another medium.

In addition to the beginnings reported a year ago, the outstanding feature has been the organization of about 75 persons from various sections of Somerville and of widely varying ages, into "The Somerville Little Theatre," which has held monthly meetings and some special meetings, at which several one-act plays have been staged; and which fur-

nished the cast, coaching, lighting, etc. for a very creditable performance of a modern comedy in High School Hall during May for financial benefit to the Somerville Amateur Baseball League, organized under the auspices of your Commission and discussed later in this Report.

General Public Activities

Under head of General Public Activities, the promotion of an amateur baseball league for young men is reported as the outstanding feature of the year. Eight teams were members, each with a large following of young men; and there was conducted successfully a ten-week schedule of games in which each team played twice a week in the league.

Hundreds of Somerville people besides the participants were furnished recreation by the activities of the league, including the preliminary preparations during February, March and April. In this pre-season period were held various meetings for organization, Committee meetings, etc., which have had, the Director believes, great social-civic value to Somerville as a community. The great social and recreational values of organized public recreation were brought to the attention of hundreds of residents. Groups from distant sections of the City met in common enterprise. Exchange of ideas and reflection on the recreation possibilities available and needed in Somerville were some of the products of this business. So strongly have the possibilities been demonstrated that the Director is fully convinced that with workers and facilities provided, and with very small expense, there could be rapidly developed in Somerville a far-reaching organization of young men who would be actively interested in an all-year-round program of indoor and outdoor sports, with great profit to themselves physically, socially, and morally, and with immeasurable benefit to the Community at large.

Such development is, of course, impossible with the present limited organization of workers, and with the extreme limitations of time at the disposal of present workers under the Commission.

Significant as to future possibilities, not only in this, but in other branches of this work, is the fact that this league was very largely financed from the proceeds of the play conducted for the league's benefit by the Little Theatre, as mentioned above under "Recreational Drama." One recreation activity promoted another with mutual benefit and benefit to

the Community at large. No expenditure was incurred by the city for either, other than the Director's time and effort, indicating that expenditure by the City would be negligible in promoting this kind of activity to its greatest possibilities.

Public Celebrations

Somerville concentrated into its special 17th of June activities its observance of the historic events of 1775 in which this City's territory so prominently figured. A major part of the program for June 17 was in charge of the Recreation Commission, which thus cooperated with the Committee of Aldermen directing the observance.

The program carried on by the Commission at Central Hill Park was for children and adults. It included children's games, athletic contests, procession, doll carriage parade, etc.

This undertaking was financed by special appropriation from the Celebration's Fund.

The preparations and the program itself were directed by workers under your Commission.

In the Director's 1924 report is contained a detailed account of the Community Christmas Observance for that year, directed by agents of your Commission. The objectives, program, results, and estimated values are stated in this previous report. (Pages 40-42.) A similar observance was conducted at Christmas time, 1925, with this difference in the procedure:—that the financial burden was assumed to larger degree by the City in 1925 than in 1924. The expenditures were shared by the Commission's fund and the Celebration's fund controlled by His Honor the Mayor.

Summary of 1925 Activities

This report, up to the present point, has dealt with all of the important divisions of the work during 1925:—(1) The Summer Playgrounds, (2) The Spring and Fall After-School Playgrounds, (3) The Saturday "Neighborhood" Playgrounds, (4) The Girls' Canning Activities, (5) Evening Recreation Centers, (6) The Neighborhood Center, (7) The General Public Activities, (8) The Experiment in Community Recreational Drama, (9) Public Celebrations. In summary it may be said that a secure footing in all of these fields of undertaking has been secured and that the future will show that the year 1925 has seen far-reaching, effective work for

community welfare in Somerville. While some of the beginnings have been necessarily modest and slow, this is a natural condition attendant upon the limitation of resources and equipment at the disposal of your Commission. Experiences during the past year prompt the expression of the estimate that the near future will demonstrate that an effective basis for future work has been set up.

Finances

A complete general financial statement for 1925 is appended to this report.

ANALYSIS, OUTLOOK, AND RECOMMENDATIONS

Five years have passed since the establishment, by City Ordinance, of the Public Welfare and Recreation Commission. Its predecessor, The Playgrounds and Recreation Commission, had been established three years earlier. Eight years of legal recognition of Recreation as a distinct element of public welfare have passed. Naturally the Commission's first duty has been that of exploring—investigating the nature of its task:—studying the general relation of Recreation to a Community's well-being, discovering the peculiar needs of Somerville, devising means for coping with local needs and problems; and organizing its policies, corps of workers, and mode of procedure. Its financial expenditures have been extremely small, averaging during these eight years about four and one-half cents per capita a year. During this eight-year period, your Commission and the workers under its direction have eagerly and ceaselessly studied the problem in hand. From time to time your Commission and these workers have defined their conclusions and offered their recommendations for use by the City Government in discharging its duty to Somerville in the field of this well-recognized department of modern public welfare. In all of these repeated recommendations, proposals for financial appropriations have been notably modest. The most severe economy has been practiced always.

During this time a well-organized system of outdoor recreation for children, limited, unfortunately, to certain sections of Somerville, restricted to a comparatively few days of each year, and seriously impeded by lack of facilities not within the Commission's power to provide, has been evolved;—

a system whose results, it may be affirmed without hesitation, are far beyond the proportions of the money expended. And beginnings have been established in a recreation program for adults.

That the exploratory time has passed, and that no further considerable progress can be made in meeting the very great recreational needs of this Community without a far-reaching movement on the part of the City Government calculated to extend this system to the entire Community, to remove the impediments in the lack of facilities mentioned, and to make unnecessary the limiting of the benefits from your Commission's work to a small fraction of the year, is the central idea of this supplementary statement, offered by the Director in response to the Commission's direction.

The considerations on which this conclusion is based are here set forth, with an effort at brevity.

To understand the situation it is necessary to keep in mind the paradoxical arrangement whereby the Recreation Commission has no jurisdiction over the facilities, which might be styled the tools, of Recreation. The play areas, maintained and controlled by two other Departments; storage places; basins for wading pools; and the municipal bathing beach, are examples. Skating facilities and regulation in allotment of baseball fields to users, are other examples. While the officials of these other Departments have practised cooperation within the limits of possibility, the resources at their disposal are so extremely limited and the business of providing and conditioning these "recreation tools" is so decidedly incidental to their general jurisdiction, that little is being accomplished in way of first-class Recreation service, in spite of the apparent desire to cooperate on the part of the officials concerned.

Putting together the two propositions stated above, namely

- (1) that a far-reaching movement by the City Government, calculated to bring service to the entire Community and to remove present limitations and impediments, is imperative for progress; and
- (2) that the distribution of responsibility for, and control of, recreation facilities among several departments, is essential in the Somerville Recreation situation; the conclusion is obvious that the present situation demands from the City Government

- (a) Provision for increased emphasis on those branches of the work under the City Engineer's, Building, Water, and other Departments that have to do with Recreation facilities;
- (b) Recognition of the essential fact that the grounds for play, buildings for storage, basins for wading pools, baseball diamonds, etc., are of the nature of "Recreation tools" the utilization of which should be largely directed by the Recreation Department;
- (c) Substantial increase in appropriation of funds to all of these Departments, with specification that the Recreation Commission's intentions and plans be regarded and consulted in the disposition of these funds;
- (d) Substantial increase in appropriation of funds to the Public Welfare and Recreation Commission.

The foregoing generalization is reduced, in the following paragraphs, to specific enumeration of needs and difficulties; and specific recommendations are given. In the presentation of these the order of consideration coincides with the division of the Commission's activities, as outlined in the earlier part of this Report.

Playgrounds

Progressive cities are obtaining a minimum standard of 50 square feet per school child for play area. In Somerville, if those improvised play areas under supervision in the Summer of 1925 be included, there are available about 10 square feet per child. Of the acreage included, more than half is in poor condition and without play-provoking equipment. If some of the school yards were conditioned, if the newly-purchased Cherry-Street site were made usable, and if the extensions were provided at Kent St., Joy St., Glen St., and Fellsway Playgrounds as recommended by the Director in the 1924 Report, and again recommended in this Report, the additional areas would, at maximum, raise the play area to about 25 square feet per school child.

For play supervision on the already available areas only a seven-weeks program in Summer, and Saturday morning supervision in that end of Somerville east of Spring Hill, can be carried on because of the limitation of money available.

No playground in Somerville is fully equipped to meet the needs of both boys and girls of various ages.

Lincoln Park, Richard Trum Field, and Dilboy Field are the only playgrounds affording good baseball fields. More than one-half of Somerville's boys of baseball age must walk from points ranging from a half-mile to a mile away from these spots.

Shelter houses are totally lacking on Somerville playgrounds.

Constructive suggestions for remedying the situation are mentioned in the Director's comments earlier in this Report under the caption, "Summer Playgrounds—Grounds." They are here summarized and others are added :

The Glen Street Playground is located on the vacant land (a large part of which is City property) at the junction of Glen and Oliver Streets,—a piece of land which the Director urges upon the Commission as extremely desirable for complete ownership by the City and very thorough-going conversion into a playground. Its operation during the past Summer was a boon to hundreds of children who reside in an area hitherto totally unserved. The immediate district, within four minutes of this land, has a child population of several hundred, and the districts outlying are also unequipped with playgrounds. Several main thoroughfares for motor vehicles—Franklin Street, Cross Street, Washington Street, Medford Street, Glen Street, and newly paved Pearl Street—pass within one or two minutes' walk of this playground, constituting a menace to so many hundred children who might be freed from danger by means of a properly equipped, active and attractive playground. Regardless of more detailed plans the Director urges complete fencing of this area by a 12-ft. wire screen fence; provision of drinking-water facilities and seats, re-surfacing, re-placement of baseball backstop; provision of shelter or shade trees or both.

The surface of the Joy Street grounds has been somewhat improved by operations by the City Engineer's Department. But there is imperative need of still further improvement of the ground, providing of shade trees, and the erection of a durable screen fence for the triple purpose of protecting the children at play from the extreme danger of intense commercial traffic through the adjoining streets (which are among the narrowest in the City,) protecting neighboring property, and affording a touch of attractiveness to the grounds which at present have a most cheerless and unattractive appearance. Equipment is lacking.

Even under conditions of great improvement the total area of the Joy and Bennett playgrounds is so small that the provisions would be extremely inadequate for this locality, which has a greater child population within the immediate vicinity of the playground than can be found in any other district of similar size in the City. It seems, therefore, that the City would do well to make some approach to providing attractive safe, and play-provoking features on the present area, and to consider seriously the possibilities of increasing or even multiplying the area of both of these playgrounds.

At the Morse School Playground, there is need of resurfacing the ground. One section was formerly surfaced with concrete, which is now higher by inches than the remainder of the area; and that part which is not concreted is uneven and stony, with here and there uncovered parts of tree roots. Another screen fence along the Craigie Street side is almost a necessity both from the standpoint of safety on the playground and for the interest of the abutting property.

The grounds of the Western Junior High School, where the area affords possibilities for the play of active games, but where the City has long delayed in providing presentable surface and any play equipment, meet only to a feeble degree the needs of an ever-increasing population in a district where no playground suitable for active boys' play is nearer than a mile almost in any direction. The Western Playground for boys and the Hodgkins School-yard unit for girls were jointly supervised. The combination has proved effective in spite of the wretched condition of both grounds.

Equally desirable, in my opinion, would be the carrying out of plans contemplated some time since for the improvement of the rear end of Saxton C. Foss Park, with a view to getting the maximum use from this area for recreation purposes. In the light of the rapid development of recreation activity on this playground, the urgent need of early attention to this improvement is still more apparent.

Saxton C. Foss and Fellsway Playgrounds are in fact conducted on the same area, with segregation and separate supervision of boys and girls for sectioning off the area. The attendance and the activities have so increased as to place both the girls' and boys' units among the most successful playgrounds.

As an alternative to the course recommended above, should there be question on the advisability of using a corner of Foss Park for a playground, attention is called to the

land that comprises the so-called Fellsway playground. This land is owned in part by the City, and was formerly a part of a much larger open space that is gradually being used up by the erection, in various spots, of unsightly buildings. While the location is highly desirable for a play area, the city-owned land is too small and poorly surfaced; and the privately owned land is hilly, weedy and unkempt. The two taken together would afford possibilities, provided that further encroachment for building be forestalled.

Whether anything additional is to be considered or not, the Director urges the imperative necessity of immediate provision of a high screen fence along the Boulevard side of the Fellsway grounds, both to protect children from the great number of speeding automobiles on the Fellsway East, and to protect motorists from flying baseballs, etc. Several cases of shattered windshields and flying bits of glass have come to the Director's notice recently.

The attention of the Commission is again respectfully called to the necessity of more space for playing in the district served by the Kent St. Playground. This ground caters to a very populous section of our city, and is at present inadequate for the playing of active games.

Play Supervision

Following is an excerpt from the report of the Somerville Planning Board, 1923:—

“Supervision is crucial in playground operation. An un-supervised playground is for the child, hardly better than a vacant lot. On an un-supervised playground the large boys and rowdies will keep the girls and small boys off. There will be little play, and that ordinarily of poor quality, except for baseball; and there is a tendency for boys' gangs to congregate and smoke, engage in low conversation or shoot craps. A situation of this sort is most regrettable where there are thousands of children needing the peculiar moral and physical help which supervised play has to offer, for play provides one of the major opportunities for moral development on the part of the youth of the land. Family supervision of play is generally not possible, particularly in those sections where the mother in her second or third story kitchen cannot watch the play or choose the associates of her child. A good playground director is a Godsend to the children of such families. There is supervised play during only about two months of the twelve on the Som-

erville playgrounds and on some playgrounds there was no supervision of play at all. In visiting the playgrounds, it was found that there was no play of value going on, as a rule, outside of the days and hours and places where supervision was provided. This finding, however, is in accordance with the experience of American cities in general. During six months of the year play can be directed during the daylight hours when children are not at school, to the enormous advantage of the children and of all citizens."

Under our present system, the greatest asset is a zealous and competent corps of part-time supervisors, who, in the Director's judgment, are underpaid. The problem of directing this corps is increasing with the growth of the system.

During 1924 and 1925 the number of summer units has increased from 11 to 17, and the number of children under supervision has increased about 40 per cent. Direct superintendence by the Director of individual supervisors' work among their own groups of children is more difficult. Administrative problems are larger and more complicated. Special supervision for special activities can no longer be delegated to part-time specialists, but requires full-time special supervision. Any progress, and in fact maintenance of present efficiency, urgently demand

- (a) Employment of Assistants to the Director, who shall not be attached to any given playground in particular.
- (b) Increased provision for interplayground visitation and transportation of supplies.
- (c) Increased provision for expense of coordinating supervision through central headquarters.
- (d) Employment of additional persons to assist in supervision on larger units,—Lincoln Park, Foss-Fellsway, Glen Street.

A problem that confronts us annually is that of "breaking in" new workers as a result of the fact that our skilful play leaders are attracted by higher salaries to other communities. The energy and time expended by your Director in this "breaking in" process might be diverted into channels leading to improvement of the system by new enterprise, if there were available the very small fund necessary for advancing the salaries of the experienced workers.

For Supervision of Saturday play, the present Saturday corps should be doubled, as only about one-fourth of the City's area is now reached by the Saturday opportunities.

Playground Equipment

The report of the Planning Board, 1923, is again quoted:—

“It is necessary that there should be sand boxes for the very young; swings, slides, the Giant Stride, and similar apparatus for the somewhat older but pre-adolescent boys and girls; and there should be small ball fields for the younger adolescent boys and larger fields for the larger boys and men. In addition to these, provision for golf, tennis, wading, bathing, boating, outdoor basket ball or volley ball, skating, tobogganing, and a variety of other games and sports should be made. Of the existing playgrounds, Lincoln Park and the Richard Trum Playground are the only ones physically adequate in size to meet the needs of children, young and old, of their districts, even after they have been properly organized and equipped.

“Often it is good policy to separate the playgrounds for large children from those for small children.”

TYPES. In general it may be said that there should be small playgrounds for little children, that is children under school age, ranging from a city lot to a quarter of an acre in size, equipped with sand boxes for the very young children, and seats under the trees for their mothers and nurses. There should be one of such playground within one-eighth of a mile of every home. For children of elementary school age, there should be a larger playground equipped with apparatus, wading pool, volley ball and basket ball courts, and an outdoor gymnasium, within a quarter-mile of each home. For children over 12 years of age, a play field is necessary upon which several games of baseball may proceed at the same time. Other games as tennis, football, soccer, volley ball, should also be provided for. This playground should also be at least several acres in size and should be located within one-half mile of every home. To meet these standardized needs of the populace of Somerville, it would be then necessary to increase severalfold, both the playground space and the amount of supervision available.”

“In the above suggestions, no criticism of the quality of the present supervision of playgrounds is intended, for the investigators have been most favorably impressed with the character of supervised play so far provided. What is suggested, is an increase in quantity, which means eventually a several-fold increase of the appropriation for play purposes in the city. Such an increased appropriation should come back to the city many-fold in the form of healthier, happier and better citizens.”

The same Planning Board reported in 1923 the following general recommendation regarding establishment, equipment, and supervision of playgrounds:—

“The program for Somerville’s playground improvement should include three things: first, the provision of apparatus for the playgrounds already established and supervised; second, provision during six months of continuous supervision for all the playgrounds already existing; and third, the provision of supervised playgrounds with adequate apparatus for areas not yet served.”

More specific recommendations have been made in this report under the captions “Summer Playgrounds” and “Saturday—and afternoon Playgrounds,” and they are included near the close of this report in a general list of recommendations.

Drama and Dramatics in Community Recreation

Regrettable from the civic point of view is the inability of the Recreation organization to respond to the opportunities for developing Somerville’s local social-civic spirit through the medium of recreational community drama, pageantry, and allied arts of expression. That the possibilities are great, and that hundreds of adult persons in the City are eager for municipal encouragement and leadership has been amply demonstrated by the experiment reported in 1924 and continued as reported in 1925.

Voluntary leadership has carried the experiment to the present conclusion. But voluntary leadership on the part of a non-resident cannot be had always. And it is physically impossible for the present part-time paid workers under the Commission to carry on this work in addition to the other work discussed in this report. A very moderate increase of funds could make possible a worthwhile program of Recreation

in Somerville that could add a much-needed aesthetic note to Somerville life; offer an antidote for some modern commercialized pleasure-habits that are more dissipative than recreational; serve the City by its performances on such occasions as the observance of public holidays, etc; and furnish a medium for financing other recreational activities, so as to enable the City Government to promote varied Recreation without paying for it. An example of this last possibility is found in the financing last Summer of the young men's baseball league from the proceeds of the Little Theatre's dramatic production.

The Director recommends urgently the appropriation of not more than \$100 for initial expenditure for promotion of this branch of Recreation during 1926 as encouragement to non-official, non-governmental agencies, who can easily meet the financial needs of its continuance, if the City will lend, through your Commission, its official leadership.

General Public Activities

In general public activities during the past year the outstanding feature is the Twilight Amateur Baseball League promoted by your Commission. Two such leagues could be organized during the coming year, with greater results in each.

So strongly have the possibilities in this direction been demonstrated that the Director is fully convinced, with workers and facilities provided, and with very small expense, that there could be rapidly developed in Somerville a far-reaching organization of young men who would be actively interested in an all-year-round program of indoor and outdoor sports, with great profit to themselves physically, socially, and morally, and with immeasurable benefit to the Community at large.

Such development is, of course, impossible with the present limited organization of workers, and with the extreme limitations of time at the disposal of present workers under the Commission. Accordingly, in the proposed budget of 1926 needs, there is included an item calling for a small sum for promotion of this business.

That there is equal demand for and equal value to the Community in, similar leagues for Hockey and Basketball in season, the Director has had ample evidence during study of the local situation. For these, provision should be made by providing the physical facilities through the proper departments and by appropriation of a small sum for promotion of these activities by your Commission. Examples of a mode of procedure and of noteworthy success at moderate cost are at hand, in the experience of several near-by municipalities.

General Recommendations

To meet in part the needs of Recreation in Somerville, the following recommendations are enumerated. They are based on the considerations given in this report, and divided into two groups. Group 1 has to do with those branches of the work to which, by the present activities, your Commission is definitely committed. Group 2 includes suggestions looking toward expansion of the plans to raise municipal recreation from its hitherto undefined level, to the more definite and comprehensive plans to which it is destined if Somerville is to meet the problem presented by the large and congested population.

I

- (1) Employment of a part-time, all-year clerical worker to assist the Director and to act as clerk for the Commission.
- (2) Expansion of the Summer Playgrounds organization to include new units for boys at the newly purchased City land at Elm and Cherry Sts.; the Southern Junior High School grounds; the Northeastern Junior High School grounds; and the Brown School premises.
- (3) Providing a playground surface and equipment on the vacant land (a large part of which is City property) at the junction of Oliver and Glen Streets, the equipment to include fencing, replacement of baseball back-stop, swing-frames, seats, shelterhouse and shade trees.
- (4) Early adjustment of Northeast corner of Foss Park to use for athletics purposes, or the alternative suggested earlier in this report under the Caption, "Summer Playgrounds—Grounds."
- (5) Securing more adequate play space and improved conditions of present areas at Joy Street, Bennett, and Kent Street grounds.
- (6) Early completion of the playground in the rear of the Western Junior High School.
- (7) Resurfacing the Morse School Playground and erection of high screen fence on westerly side of this area.

- (8) Purchase of land for additional playgrounds, especially for serving smaller children near their homes.
- (9) The planting of some shade trees on several of the playgrounds to provide natural shelter for the future.
- (10) Provision for a male supervisor at Central Hill and Morse playgrounds jointly.
- (11) Installing of additional permanent framework for swings and teeters at the Morse Playground.
- (12) Increasing the length of Summer supervision period by at least one week.
- (13) Provision for increase in the Summer supervisory corps to meet the needs mentioned earlier in this report under the heading "Summer Playgrounds—Supervision."
- (14) Increasing from 8 to 16, the number of Saturday "Neighborhood Playground" units, so as to make the organization City-wide. (See "Saturday and Afternoon Playgrounds" above.)
- (15) Expansion of the After-School supervision of playgrounds to provide three sessions per week at each unit instead of two sessions, and 4 units instead of 2.
- (16) Provision of the necessary field equipment for tennis, Field Hockey, Soccer, etc., for use at these after-school sessions.
- (17) Provision for outdoor active recreation in winter, for children and adults, such as hockey, tobogganing, and skiing.
- (18) Provision of additional skating rinks for the general public in winter.
- (19) Providing a Recreation Center, with others to follow (for women) on parallel lines with those of the young men's centers.
- (20) Provision for additional facilities for indoor athletics and physical exercise in all Recreation Centers for men.
- (21) Employment, in the Recreation Center undertaking, of special leaders for special activities.

- (22) Provision for securing workers for the Evening Recreation Centers who have the special qualifications for that work, to overcome the present lack of applicants for this work.
- (23) Provision for increased publicity and public information concerning the objectives and opportunities of the Recreation Centers.
- (24) Appropriation of funds for promotion of Adults' Athletic Leagues, in Baseball, Hockey, Basketball, etc.
- (25) Appropriation for promoting Community drama and kindred activities as Community Recreation.

LILLIAN E. GOULD, R. N.

Office of the Board of Health,
City Hall, January 2, 1926.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen:

We respectfully submit the following as the forty-eighth annual report of the Board of Health in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1925.

Nuisances

A record of the nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:

Complaints referred from 1924	1
Complaints received during 1925	649
	650
Complaints received with no just cause	19
Complaints abated on verbal notice of Agent	124
Complaints abated on notices sent	497
Complaints referred to 1926	10
	650
First notices sent	496
Second and third notices sent	56
	552
Total notices sent	552

Annually the cellars and alleyways of the city are examined and the owners of property where unsanitary conditions exist are required to remedy the same.

Record of Licenses and Permits Issued

GOATS. Eight applications were received for permits to keep eight goats, all of which were granted. One application to keep one goat was refused. The fee is one dollar for each goat.

HENS. Twenty-seven applications for permits to keep 302 hens were received. Sixteen to keep 205 hens were granted and eleven permits were refused.

COWS. Two applications for permits to keep two cows were received, which were granted.

GREASE. Fifteen applications were received for permits for eighteen teams to collect grease, which were granted. The fee is two dollars for each team.

MELTING AND RENDERING. Three parties have been licensed to carry on the business of melting and rendering, for which a fee of one dollar is charged.

MASSAGE AND MANICURE. Seventy persons have been licensed to practice massage and manicure. The fee is one dollar for each license.

SALE OF ALCOHOL. The statutes provide that no person, firm or corporation other than a registered druggist shall engage in the business of manufacturing, buying, selling or dealing in methyl alcohol, or wood alcohol so called or denatured alcohol, or any preparation containing more than three percent of any of the said alcohols, without being licensed so to do by the board of health.

Under the provisions of this act thirty licenses have been issued. A fee of one dollar was received for each license.

BOTTLING. CARBONATED BEVERAGES. Chapter 303, Acts of 1921 provides that no person shall engage in the manufacturing or bottling of carbonated non-alcoholic beverages, soda waters and mineral and spring water without a permit from the board of health. Five such permits were granted, a fee of ten dollars being charged in each case.

Stables

No person has the legal right to erect, occupy or use any building in this city, as a stable, without obtaining a license from the board for such occupancy. Each application is referred to the Agent of this board and no license is granted unless all regulations of the board are complied with. The following is a record of applications received and licenses granted:

Applications pending from 1924	0
Applications received during 1925	7
	<hr/>
	7
Licenses granted	3
Licenses refused	4
	<hr/>
	7

Board of Infants

Twenty applications having been made to the State Department of Public Welfare for licenses to care for children in this city were referred to this board under provisions of Chapter 119 of the General Laws, and were approved.

Lying-In Hospitals

Two applications having been made to the State Department of Public Welfare for licenses to maintain lying-in-hospitals in this city were referred to this board under the provisions of Section 71 of Chapter 111 of the General Laws and were approved.

There were 1110 deaths and sixty-one stillbirths in the city during the year, as specified in the following table.

Deaths at Somerville Hospital	122
Deaths at hospital for contagious diseases	8
Deaths at home for aged poor (Highland Avenue)	41
Deaths at city home	7
Deaths at other institutions	54

Mortality in Somerville in 1925

Diseases Dangerous to the Public Health

This board has adjudged that the diseases known as actinomycosis, anterior poliomyelitis, anthrax, Asiatic cholera, cerebro-spinal meningitis, chicken pox, diphtheria, dog-bite, (requiring anti-rabic treatment), dysentery, German measles, glanders, hookworm disease, infectious disease of the eye, influenza, leprosy, malaria, measles, mumps, pellagra, plague, pneumonia, (Lobar only), rabies, scarlet fever, septic sore throat, small pox, tetanus, trichinosis, tuberculosis (all forms), typhoid fever, typhus fever, whooping cough, yellow fever, are infectious or contagious and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases coming under their care and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the principal of the school in the district in which the patient resides, the librarian of the public library and state board of health are notified.

Specimens and Supplies

Outfits for specimens to be examined for tuberculosis, diphtheria and typhoid fever, and diphtheria anti-toxin, vaccine lymph and nitrate of silver solution may be obtained at the laboratory and at the following places:

Edward Edwards, 25 Union Square
R. A. Peckham, 154 Perkins Street
Ernest M. Vose, 310 Broadway
Ernest B. McClure, 529 Medford Street
George E. Wardrobe, 716 Broadway
Willis S. Furbush & Co., 1153 Broadway
Hall Drug Co., Hobbs Building, Davis Square
John B. Maitland, 288 Highland Avenue

Hereafter the Agent of this Board will collect, daily, at five o'clock p. m., all specimens left at culture stations for examination, prior to that hour.

Physicians desiring reports on the following day, of specimens taken after this collection has been made must deposit same at the City Hall, in the receptacle provided, before nine-thirty p. m.

Results of all examinations of specimens received at the City Hall prior to nine-thirty p. m., will be reported to the physicians on the following morning.

Medical Inspection at Schools

The medical inspection of the schools of Somerville which was instituted in December 1907, has been continued during the year. The value of the system has been constantly demonstrated, and the work has been done in a very satisfactory manner. There has been harmony of action between the board of health and the school board, and the school principals and teachers have very generally co-operated with the inspectors in making the system as successful as possible.

The inspectors make daily visits to the schools under their charge, and to them are referred all children who show evidences of disease or abnormal conditions. Children who are found to be unfit to remain in school are sent home, accompanied by a slip properly filled out advising that the family physician be consulted. The inspectors also make an annual inspection of all the children in the schools, and any defects discovered are called to the attention of the parents. Monthly inspections of the school buildings and premises are made, and suggestions or criticisms are referred to the proper authorities. Every effort is made to protect the health of the children and to co-operate with the parents in keeping the children in as normal a condition as possible.

In accordance with the provisions of the statute, tests of sight and hearing are made by the principals or teachers.

District No. 1

Inspector Dr. Francis Shaw, 57 Cross Street.
Schools Prescott, Hanscom, Edgerly and Boys' Vocational Schools.

District No. 2

Inspector Dr. Edward J. Dailey, 46 Bow Street.
Schools Baxter, Knapp, Perry and Southern Junior High Schools.

District No. 3

Inspector Dr. Walter Jellis, 1028 Broadway.
Schools Bennett, Pope, Cummings and Proctor Schools.

District No. 4

Inspector Dr. W. L. Bond, 322 Highland Avenue.
Schools Morse, Carr, Durell and Burns Schools.

District No. 5

Inspector Dr. H. M. Stoodley, 283 Highland Avenue.
Schools Brown, Bingham, Forster and Northeastern
 Junior High Schools.

District No. 6

Inspector Dr. H. Cholerton, 94 College Avenue.
Schools Western Junior High, Lincoln, Highland,
 Cutler and Lowe Schools.

District No. 7

Inspector Dr. E. F. Sewall, 281 Broadway.
Schools Glines and High Schools.

District No. 8

Inspector Dr. M. W. White, 21 Walnut Street.
Schools Parochial.

During the year 9,976 children have been referred to the inspectors during their daily visits, and 475 have been sent home because of illness.

The following list will show the classes of diseases and defects which have been found in the schools, except defects of sight and hearing:

List of Diseases and Number of Cases Reported

1. Infectious Diseases:—		
Chicken Pox	86	
Measles	41	
Mumps	17	
Scarlet Fever	1	
Whooping Cough	9	
Total		154
2. Diseases of the nose and throat:—		
Enlarged tonsils and adenoids	787	
Inflammatory diseases	331	
Other abnormal conditions	1	
Total		1,119
3. Diseases of the eyes:—

Bacteriological Work

The report of the work of this department is made by Frank L. Morse, M. D., on a subsequent page and becomes a part of this report.

Undertakers

Under the provisions of Section 49 of Chapter 114 of the General Laws, twenty-four persons have been duly licensed as undertakers.

Examinations of Plumbers

The public statutes provide for a board of examiners of plumbers, consisting of the chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Green, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

Health Nurses

There are at present five nurses employed by this board. Two of these are employed as school nurses and the work of the others consists of follow-up work regarding tuberculosis cases and post-natal baby hygiene work.

The reports of the school nurses are made a part of the report of the School Committee and those of the other nurses are made a part of this report being submitted in detail in subsequent pages.

Infant Hygiene Clinics

During the past year under the supervision of this board, clinics have been held every Thursday afternoon at the Bennett Schoolhouse and every Friday afternoon at the Bingham Schoolhouse except when those days were holidays. On September 29, 1925 a new clinic was established at the Edgerly Schoolhouse at which fourteen clinics have been held on Tuesday afternoon. The attendance for the year at these three clinics was 5,101. The average weekly attendance at the Bennett Schoolhouse was 30, at the Bingham Schoolhouse 64 and at the Edgerly Schoolhouse 22.

This work is of inestimable value and the results are very far reaching.

C. A. C. RICHARDSON,

JAMES A. KILEY,

LIZETTE L. VORCE,

Board of Health.

Attest:

LAURENCE S. HOWARD, Executive Clerk.

REPORT OF HEALTH NURSES

Somerville, Mass.
January 2, 1926.

To the Board of Health,
Somerville, Mass.

Gentlemen:

We submit the following report of work performed by us in infant hygiene, post natal and tuberculosis cases for the year ending December 31, 1925.

Infant Hygiene

Infants reported as born in Somerville during 1925.....	1,487
Infants born elsewhere resident in Somerville	420
Pairs of twins born in Somerville	14
Sets of triplets born in Somerville	1
Still-births in Somerville	61
Infants who moved away from Somerville	115
Infants reported with Ophthalmia Neonatorum	9
Infants reported with Conjunctivitis	14
Infants reported with Infantile Paralysis	1

There were one hundred and three deaths of infants under one year of age in Somerville during the past year as shown in the following table:

Prematurity	35
Congenital diseases	39
Intestinal diseases	5
Accidental Injury	3
Pneumonia and other diseases	21
Total	103
Infants dying in Somerville residence elsewhere	23
Total attendance at Baby Welfare Clinics during 1925	5,101
New registrations during 1925	532
Average attendance during 1925	40

Tuberculosis

Pulmonary tuberculosis cases reported in 1925	116
Other forms of tuberculosis reported in 1925	28
Patients admitted to Sanatoria	51
Patients previously reported in Sanatoria	48
Deaths in Somerville (Pulmonary 39-Other Forms 13)	52
Deaths in Sanatoria 18-Discharged 46	64
Patients now in Sanatoria	46
Patients temporarily out of Somerville	25
Patients who have moved away from Somerville	36

Tuberculosis

During 1925 there were 52 deaths from Tuberculosis including all forms, 39 of which were of the pulmonary type. This record shows an increase from the previous year when 46 deaths were reported.

All patients ill with the disease coming to the attention of the board have either been supervised at their homes by the Public Health Nurses, or have been placed in sanatoria when such treatment was needed.

The tuberculosis ward at the Contagious Hospital which was closed on September 1, 1921 on account of the small number of patients in the hospital, was reopened during July and August as a Preventorium for children who were undernourished or lived in families where tuberculosis cases existed.

In this work the board was assisted by a contribution provided by the Tuberculosis Seal Sale.

During these two months 105 children were residents at the Preventorium for a total of 1278 days, the average stay being 12 days. Much good was accomplished among these children, marked improvement being observed in their physical condition, and it should be maintained each summer.

Infant Hygiene Clinics

On January 1, 1922 the board with the approval of His Honor the Mayor, assumed the care of the Infant Hygiene Clinics previously maintained by Somerville Chapter of the American Red Cross. These clinics have been held on Thursday afternoon at the Bennett School and Friday afternoon at the Bingham School thruout the year. On September 29, 1925 a clinic was established at the Edgerly School and has been held on Tuesday afternoon weekly. An average attendance of 64 at the Bingham School, 30 at the Bennett School and 22 at the Edgerly School has been attained. 532 new babies have been under supervision at the clinics where advice has been given to the mothers by the attending physician, and in many instances the infants have been visited at home by the Public Health Nurses in order that the advice may be properly followed out. This work is unquestionably of great value in conserving the health of new born infants.

Respectfully submitted,

FRANK L. MORSE,

Medical Inspector and Bacteriologist.

REPORT OF THE INSPECTOR OF ANIMALS AND PROVISIONS

Somerville, Mass.,
January 2, 1926.

To the Board of Health
Somerville, Mass.

Gentlemen:

I submit the following as my report for the year ending December 1, 1925.

Inspections

The following table shows the number of inspections made during the past year. In order to safeguard the consumer, all establishments handling foodstuffs are under constant supervision. Lunch cars and restaurants have been inspected weekly.

Under the provisions of the General Laws of 1920 all bakeries are required to register with the board of health. The law provides that all doors and windows shall be properly screened and that all food exposed for sale shall be kept covered. Careful inspections of all bakeries have been made to see that this law has been complied with.

All the factories in the city have been inspected monthly.

The Barber Shops are under very careful inspection and must be kept in a sanitary condition, and the barbers are required to keep themselves neat and clean and to properly sterilize their instruments.

Number of Inspections

Bakeries	534	Milk and Cream plants	103
Barber shops	532	Pedlers and Wagons	
Billiard Halls and Bowl- ing alleys	86	and stock	2,061
Blacksmith's shops	5	Public Halls	85

Total	1,377	24	0	24

Respectfully submitted,

CHARLES M. BERRY,
Inspector of Animals and Provisions.

REPORT OF THE INSPECTOR OF MILK AND VINEGAR

Chemical and Bacteriological Laboratory,
City Hall,
Somerville, Mass.

To the Board of Health,
Somerville, Mass.

Gentlemen :

I herewith present my annual report for the year ending December 31, 1925.

On the above date there were licensed to sell milk, 793 stores and 56 dealers; and 176 stores were registered to sell oleomargarine; an increase over the previous year of 70 stores selling milk and 45 dealers handling oleomargarine. 4 dealers who were distributing milk either discontinued business or ownership was transferred.

Of the 56 dealers handling milk and cream, 26 were located in Somerville and 30 were located in neighboring cities. 46 were pasteurizing according to the General Laws. 10 dealers sold cream exclusively, 2 were wholesalers, and 4 small producers sold milk from T. B. tested cows. There were approximately 37,000 quarts of milk and 1,900 quarts of cream distributed in Somerville daily.

The following tables 1, 2, 3, and 4 are a summary of the work of the department for the year.

Table 1.

In April 1925 Georgia H. Moreland was Appointed technician in the Board of Health Laboratory and Francis W. Small was appointed a Collector of Samples (part time). Both took up their duties May 1, 1925.

During 1925 license fees and fees for analyses amounted to \$2797.50 an increase over the previous year of \$127.50. There were in 1925, 8695 laboratory examinations of milk and milk products, an increase over 1924 of 1260 samples examined. There were 3566 miscroscopical examinations of milk specimens by the Slack Method.

There were during 1925, 4 dealers prosecuted for selling milk of inferior quality and all paid their fines amounting to \$125.00.

Income for Department

Fees for issuing milk licenses	\$515.00
Fees for analyses	2,282.50
Fines paid in Lower Court	125.00
Total	\$2,922.50

Each month during the year pint samples have been taken from every milk dealer and analyzed for food value (fats and solids) and cleanliness, (bacterial count and sediment).

The higher the fat and solids the greater the food value. The lower the bacterial count, the greater care of production, better handling, or more efficient pasteurization is shown.

By calling the office of the milk inspector these figures will be cheerfully quoted.

Recommendations

1. There should be provided a suitable method of medical supervision of employees in milk plants.
2. A regulation should be formulated requiring automatic thermostat control of all pasteurizing machines.
3. Some sort of registration should be required for all operators of pasteurization machines.

Respectfully submitted,

HERBERT E. BOWMAN,
Inspector of Milk and Vinegar.

Report of the Trustees

To the Honorable, the Mayor, and the Board of Aldermen of
the City of Somerville:

Gentlemen: The fifty-third annual report of the trustees of the public library is herewith respectfully submitted; being the report of the librarian and tables of statistics of operation.

Very respectfully,

The Board of Trustees, by

THOMAS M. DURELL,

President.

REPORT OF THE LIBRARIAN

Gentlemen of the Board of Trustees:—

The fifty-third annual report of the Somerville Public Library, being that for the year 1925, is herewith submitted.

It is fitting that we should chronicle with profound regret the loss of two members of the Board during the year. Dr. Giles W. Bryant died unexpectedly on November 8. He had served continuously since his appointment in 1915, with an almost unbroken record of attendance. An appropriate expression of appreciation of his services has been adopted for the records of the Trustees. William H. Dolben, a former trustee, was appointed November 25 to fill out the unexpired term. The resignation of Leon M. Conwell was received in December. Mr. Conwell was appointed to the Board in 1923 to succeed Frederick W. Parker, deceased. The regret of the Board at Mr. Conwell's departure will be mitigated by the mandate of the citizens of Somerville drafting him for service as the chief executive of the city. He was succeeded by William J. Ennis, appointed December 31 to fill out the unexpired term.

A perusal of the statistics of operation for the year 1925 does not reveal any feature of unusual significance, except the book problem at Union Square branch to which more extended reference will be made. We should be derelict in our duty if we failed to call attention again to the marked discrepancy between the advancing cost of books and the amount of money allowed by our appropriation for book purchase. During the period since the outbreak of the World War the cost of books has advanced fifty-five per cent., as compared with an increase in our book funds of sixteen per cent. We have been recently notified that additional advances in the price of books may be expected immediately after the beginning of the new year. In the same period our population has increased from 86,000 to 100,000. Whatever may be the demands for economy in the administration of municipal affairs it certainly is worthy of our very serious consideration whether a restriction of the facilities devoted to education and to the training of youth in citizenship can ever be justified on the grounds of economy. Wherever a survey or other estimate of the social condition of a municipality is attempted one of the invariable indexes of community intelligence is the support and use of the public library.

We have had occasion frequently to allude to the peculiarly valuable work of the Union Square Branch in advancing the interests of good citizenship among new Americans. Nothing could be a more vital factor in promoting the welfare of our city. We are pleased to record that during recent months there has appeared in this neighborhood a new spirit of appreciation and cooperation, and that there is evident a greatly improved morale among the numerous juvenile visitors to this branch.

The branch book collection has never been adequate, and one of the discouraging features of the work has been the almost constant necessity to send away children empty handed because of this lack. "Pitiful" is the word used by an observer. Due to long continued use and the passage of time a large proportion of the present collection of books has been read and re-read and has become badly worn, filthy from much handling, and in many cases superseded by more recent material. A decline of 9,952 in the circulation in 1925 bears eloquent witness to the pressing need. During the same period the rest of the system gained 30,920. The problem is one that requires immediate attention. Your librarian, therefore, strongly urges that a request be made for a special appropriation of three thousand dollars outside of, and in addition to, the regular annual appropriation for the purchase of books, which of itself barely suffices to provide current publications.

We desire to express our appreciation of the cooperation of the Department of Public Buildings in giving the Union Square building a thorough cleaning, and painting it inside and outside.

Our city is especially fortunate in the possession of branch libraries so completely equipped and so efficiently staffed. The policy of the trustees and librarian has been to make each of these buildings as far as possible a library in every respect complete for the service of its own community. The special features upon which this service is based are as follows:

EIGHT POINTS OF A SOMERVILLE BRANCH

- (1) Independent, separate budget and appropriation making the branch entirely self-supporting;
- (2) Permanent, separate building entirely controlled by the trustees for library purposes only;
- (3) Permanent collection of books with separate reference and children's collections;

- (4) Separate children's room;
- (5) Staff and work rooms;
- (6) Separate and permanent staff, the standard minimum force consisting of branch librarian, 1st assistant, children's librarian, one or more senior or junior assistants, and part time attendants as needed;
- (7) Open every week day and evening at least seven hours;
- (8) Daily express interchange service between all buildings.

Inquiry will show that the foregoing are standards for cities of the first class. Even in the face of such an unfortunate calamity as the total destruction of the Central library by fire our branches would carry on complete and uninterrupted service as usual. This would appear to be the ultimate test.

In this connection it may not be amiss to direct the attention of our citizens to the important work that the library carries on in conjunction with the public schools. The library maintains a carefully selected collection of books, numbering approximately nine thousand, for the purpose of providing circulating school room deposits. During the year just ended there have been circulated from this collection, distributed in 223 deposits, 66,135 volumes in the homes of pupils. The return, as measured by the use of books per unit of expenditure, is the largest shown by any department of the library. The public school is the only agency whereby contact with the whole or approximately the whole juvenile population can be secured. The fundamental purpose is not primarily to assist the schools, but to penetrate the home of the child, to demonstrate the delights and profits of reading to children who then if ever acquire the reading habit. For this reason the one condition to which the library does not make exception is that the school room deposit shall be used for home loans. We hope by this means to plant the seeds of a taste for reading and for the best in literature; to introduce books into homes not otherwise reached; to reveal the permanent availability of the public library in after years as a workshop and continuation school, and a source for the materials of culture; to teach pupils how to use books as tools; to implant in their minds the idea, which shall persist in the later years of adult citizenship, that the public library is an institution which as a matter of course is to

be supported as a part of the educational establishment of the city; and finally to supplement the educational work of the schools by supplying collateral material for both pupil and teacher. During the course of the year the school librarian, with the cordial cooperation of the superintendent of schools and the executives serving under him, brings to the library in convenient groups under the leadership of teachers the entire upper class of the junior high schools. These pupils are instructed in the use of the library, its catalog, the arrangement of its books, and the use of the better known works of reference. This instruction is emphasized by practical examples, and tests. More than one thousand pupils are given this course, which is continued by further instruction when they enter the high school. Even those who complete their school work with the junior high acquire at least an elementary understanding of the use of the library and its contents, that will be a potential asset for after years.

The year upon which we are now entering is one of especial significance in library history. In 1876 the famous survey by the United States Bureau of Education published its voluminous report upon the library situation in the United States. In the same year was founded the Library Journal, the first and perhaps still the leading organ of the profession. Most significant of all was the founding of the American Library Association. Probably no single factor in the library history of the last fifty years has been so influential in determining the direction and progress of our work. This influence has been exerted through its large and active membership, its well-attended annual conventions, and especially its professional publications which have largely determined the standards of modern library practice. The semi-centennial year now at hand will be suitably observed by the A. L. A. with a special program of activities that will tend to give a still further stimulus to library service. In order to finance this work it will be necessary to raise a fund of \$30,000 or more. Every library in the country is invited to make a contribution toward this fund ranging upward from a minimum of \$25 from small libraries. Already some of the larger libraries have indicated their intention to give as much as \$1000.

Two standards for determining a normal contribution have been suggested. First, that the library shall contribute one tenth of one per cent. of its annual appropriation. Second, that members of the staff shall contribute, as far as their circumstances permit, the amount of one day's pay each. The librarian is informed that a ruling has already been

made to the effect that this library can not legally contribute money from its appropriation for any purpose. Needless to say we desire to maintain a reputation as a progressive library. The second plan seems our only hope of securing a creditable sum, namely to give an opportunity for our staff to contribute upon the basis suggested, one day's pay each. Several have already indicated their intention of doing this. It will not be placed upon anybody as an obligation, but will be offered as an opportunity to participate in a national professional activity.

An interesting and valuable piece of work that has been under way for a considerable period and is now approaching completion is the compilation of a textbook of professional and technical methods prevailing in this library under the title, *Approved Library Methods of the Somerville Public Library*. This is a step by step description of all the numerous policies, rules, and processes involved in the control and management of our library system. It provides not only a complete method, but an approved authority to be followed by employees in the discharge of whatever duty or process is incumbent upon them. Every employee, either in an executive or a special position, has been provided with such a portion of the entire textbook as applies to her particular work, and copies of the complete compilation are available for reference to all members of the staff.

On March 10 the library received a gift of \$400 from Miss Sarah L. Graves of New York City, formerly a resident of Somerville, "this gift being in grateful memory of her teacher and principal, Mr. Henry H. Babcock." "The income is to be devoted to the purchase of new books and periodicals. It is Miss Graves' desire that the Library be enabled thereby to make purchases in addition to and beyond that which it would ordinarily be able to make with its regular appropriation, it being understood that the possession of this particular fund shall not be taken into consideration in the annual appropriation as made and that the amount thereof shall not be thereby diminished."

The library has also received "a bequest of income from the remainder trust of \$3000 under the will of Edward C. Booth." This trust is to be administered by the Old Colony Trust Company from whom the income will be received when and as it shall become available. This income is not restricted but may be used for general library purposes at the discretion of the Trustees.

Among the several economies and restrictions of library service consequent upon the reduced support and increased

costs resulting from the World War was the closing of the Central children's room in the evening. This threw a serious additional burden upon the reference department, as it was necessary to take care of a considerable volume of work coming in from the junior high schools in the evening. Not only did this work interfere with the service to the adult users of the library, but it added an element of disturbance and crowding which reduced the attractiveness of the library to the older readers. It is, therefore, with much satisfaction that we now feel ourselves able with the beginning of 1926 to resume the normal service in the children's room. During the school year the Central children's room will be open daily from 2 until 9 p. m. and in addition on Saturday mornings. During the long summer vacation the hours will be from 9 a. m. to 6 p. m.

In October 1924, by instruction of the Board, the Librarian addressed a request to the Public Buildings Department for the replacement of chairs at the Central library, the number of which had been so depleted by the wear of the past ten years that the public seating capacity had been seriously reduced. Not having been able to secure these replacements the request was repeated on April 14 and on December 10, 1925 by further instruction of the Board.

For some time there has been a growing need at the Central library of additional protective shelving for the accommodation of books which by reason of value, or of certain special features, can not properly be placed on the open shelves. All the shelving provided for that purpose in the original plan of the building has been filled, and a rapidly increasing overflow must be accommodated. The librarian is, therefore, by authorization of the Board asking the Department of Public Buildings to enclose a small section of the stack for this purpose.

It is hoped that both of these much needed improvements may be given attention at an early date.

Changes of personnel in the staff during the year have been as follows:

Appointments to the Graded service: Ruth M. Woodman, 1st Assistant at East; Florence A. Bolster, Evelyn J. Emery, Angela Q. Marchese, and Ethel B. Lewis, Senior Assistants; Hilda O. Eastman, Irene Smith, Frances Brown and Helen L. Hosmer, Junior Assistants.

Resignations from the Graded service: Katherine E. Hunt, Chief Cataloguer; Elsie K. Wells, Acting Branch Libra-

rian at East; Elsie G. Umpleby, Reference Assistant; Marion J. Meserve, School Librarian; Edna L. Hartwell, Children's Librarian at East; Maurene Chenoweth, Margaret Wentworth, Angela Q. Marchese, C. Evelyn Bamford, and Decima I. Doyle, Senior Assistants.

Promotions in the Graded service in regular course under the provisions of the Scheme of Service: Mabel E. Bunker to Chief Cataloger; Desier C. Moulton to Branch Librarian at East; Alice W. Hamilton to Children's Librarian at Central; Irma P. Traphagen to 1st Assistant at Union Square; E. Marion Akerley to Children's Librarian at East; Elsie L. Knox to Children's Librarian at Union Square; Elsie G. Umpleby to Reference Assistant; Miriam G. Howard, Elsie G. Umpleby, Margaret Wentworth and C. Evelyn Bamford to Senior Assistants.

Appointments to the Ungraded service: Edythe T. Reynolds; and in addition there were employed for temporary summer vacation work: Anna C. Keating, Mary Goodhue, Basil R. Mills, and Marston C. Sargent.

The annual library training class was selected from a list of about forty applicants. Of those whose applications were received in time, thirteen were deemed eligible to take the examination. Six pupils were desired for the training class, and exactly that number received a passing rank in their examinations. After the final rating was determined the sealed envelopes containing the names of the candidates were opened, and not until then were the successful ones known. Of these six, five were Somerville girls.

The appended statistics of operation for the year 1925 are submitted as a part of this report.

Respectfully submitted,

GEORGE H. EVANS,

Librarian.

The Public Library of the City of Somerville

REPORT OF THE SUPERINTENDENT OF SCHOOLS

TO THE SCHOOL COMMITTEE:

Herewith I submit the report of the conditions of the schools for the year now closing which, under the practice of your Board, the Superintendent is required to make each year. As this report serves the purpose of a report of the School Committee as well as of the Superintendent of Schools, I have provided the usual statistical information so that citizens may be informed fully about the operation of the schools.

MEMBERSHIP

The total number of pupils in the membership of the schools in December, exclusive of the Continuation Schools, was 15,203. This is an increase of 350 pupils over the membership of last year and is a larger gain than was made during that year. The membership in the elementary schools, including kindergartens, is 363 pupils larger than last year but there has been a small falling off in the membership of the high and junior high schools, a loss of 20 in the high school and 11 in the junior high schools. There was a gain of 15 in the membership for the Vocational School for Boys. These changes in membership of pupils have been too small to make any material effect upon school conditions.

ACCOMMODATIONS

Every child attending the elementary schools in Somerville is provided a seat and a full-day schooling. This should be a cause for gratification to the parents of our children. While some of our school buildings are old they are, in the main, pleasant places for our children and are well provided with furniture and other classroom furnishings. In one respect, however, immediate improvement should be made. There are rooms which are too dark on cloudy or stormy days. Such a condition can work a great injury to the eyesight of pupils. A sufficient provision of artificial lighting should be made so that these schools can be made light enough for the children to do their work in safety on the darkest of days. While there have been seats enough for all the pupils this year, attention should be given to the likelihood that in the near future additional school facilities will be needed in the northwestern part of the city and in the

eastern part of the city. The rapid growth in the population of the former and the prospect of new homes being constructed upon the Ten Hills Farm Property indicate that additional school accommodations will soon be needed for those sections of the city.

The building situation of the high school continues unsatisfactory. During the year, the Public Property Committee of the Board of Aldermen, after carefully examining the high school building, came to the conclusion that a substantial addition should be made to it but as the year closes no definite action has been taken to start such a work. It is necessary, therefore, for me to call attention again to this need. The work of the school is seriously hindered by lack of sufficient room. At the present time, every room is occupied so constantly that the only opportunity that now remains for increasing undertakings or for the accommodation of additional pupils is to use rooms for such work during the afternoon. The school must undertake certain additional activities in the near future even though to do so it becomes necessary to resort to afternoon classes. This undesirable expedient, however, will not satisfactorily meet the needs of the school for the reason, among others, that it is unwise to make interior alterations such as would be demanded to provide suitably for new activities until it is definitely known whether any alterations will be made to the present building. Neighboring communities have been confronted with the problem of providing suitable accommodations for high school pupils and many new and expensive high school buildings have, as a consequence, been erected in this region during recent years. Wherever such new and modern buildings have been provided, the community has evinced pride in the accomplishment and has called attention of neighboring towns and cities to its new high school building as a monument to civic devotion and enterprise. Our high school is the city's chief contribution to the development of the youth of secondary school age. If this contribution is insufficient the youth must bear the loss. Therefore, it is important that suitable enlargement of the high school be undertaken in the near future.

COST

What do the public schools cost the people of this city? What part of the revenue of the city is this cost? How does the conduct of the schools compare with other communities of the State in cost and in efficiency? Do the schools cost too much? What are the chief elements of the cost of the schools? While these questions are pertinent at any time they are

especially so now as another financial year closes. There is prevalent everywhere a tendency to criticise the cost of government and to include the cost of education in such criticism. According to this criticism, the conduct of the schools requires too much money to be raised for its support by public taxation. A good deal has been said in public and private discussion to the effect that education has too ambitious a program, covers too much ground, and attempts too much for children. The remedy for this condition is never clearly stated by the proponents of this view. Beyond a general clamor for reduction in cost of education, there is little discussion of the means by which an educational program adequate for the needs of the community can be carried on with any substantial reduction of cost. In the meantime, various influences are at work whose inevitable and sure tendency is to increase the cost of education. The first of these is the demand of the parents that their children shall have as good educational opportunities as are given to the children of other communities. There is no mistaking the existence of this sentiment. Parents in every community demand that their high school shall provide as good training for their pupils as is given by high schools of other communities. They demand that the children below the high school shall have good teaching, adequate provision of books and supplies, and that they shall be given the varying experiences which today are deemed essential to the proper development of youth through the agency of public schools. The second influence is the increasing cost of everything that comes from the market of the world, including the cost of personal service. The third element is the effect of increasing scientific knowledge concerning the human mind. This element shows its influence in the demand for variations in provisions for the training of pupils to meet variations of need which increased professional knowledge discloses. So important are some of these variations that the legislature has, by law, compelled communities to make them. Instances of such variations are vocational education, continuation school, provision for special instruction for retarded pupils, physical training, manual training, household arts, Civics, United States History, etc. Lest the communities under the impulse of saving money at the expense of education should fail to provide these elements of education, the State has made them all compulsory by legal enactment. These, then, are general conditions affecting the cost of education which bear upon all communities and which are so much a part of the undertaking as to be beyond the power of a community to control materially.

Turning now to an examination of the cost of the schools of Somerville, we find that the total cost for the maintenance of schools for year ending June 30, 1925 was \$964,261.00. This is \$30,489.27 more than was spent for the same purpose in 1924. This sum includes the amounts spent for the care of school buildings, including janitors' services, fuel, light, school telephones, and the salaries of officers, the amount spent for school supplies, and the sum paid for salaries of teachers. The first step in discovering whether this large sum is a disproportionate expenditure for education is to find out what part of the city's revenue is devoted to that purpose. The City Auditor has made a functional division of each dollar of expenditure from revenue for 1924 which shows that 26.4% has been expended for education. Of this amount, 21.8% was controlled by the School Committee. In addition to the 26.4% expended for education, the City Auditor reports that 5% of the revenue has been expended for debt and interest upon loans for school building construction, making a total of 31.4% of the dollar of revenue expended upon education.

While it is evident that this is the largest fractional part of the dollar of expenditure from revenue devoted to any one purpose, it is equally evident that the business of the schools is the largest single enterprise in which the city is engaged. It is not, therefore, a significant statement to say that education takes the largest fraction in which this dollar is divided. The real question is: "Is the fraction of each dollar of expenditure from revenue devoted to education too large?" Some help in the answering of this question can be gained from a comparison with the corresponding facts taken from the experience of other cities. The best evidence available on this matter is found in "Financial Statistics of Cities", published by the United States Department of Commerce in the year 1923. On page 40 is a comparative summary of percent distribution in departmental expenses of 146 cities, giving the average expenditure in each department for a period of years to 1923. This table gives 37.8% as the average for expenditures for schools for 1923. In this average for schools, however, are not included two items which are included in the Somerville table and which increase, therefore, the Somerville percentage. These items are Debt and Interest. While, therefore, it is not possible to make a comparison between exactly identical facts for Somerville and the average of the 146 cities quoted in Financial Statistics of Cities, there is usefulness in the comparison of the two tables as they stand. It is evident that the average proportion of expenditure for education in the

146 cities quoted in this report is considerably larger than the proportion devoted to the schools of Somerville. Such is the answer to the question "Is too large a part of the revenue of the city given to education?" But the question arises "Is this expenditure too large for the number of pupils educated?" The way to find the answer to this question is by comparing the pupil cost of education in Somerville with that in other cities. The report of the Massachusetts Department of Education furnishes a basis for such comparison with the other communities of the State. According to this report, the per capita cost of the schools of our city for the school year ending June 30, 1925 was \$65.71, one cent less than last year. Of the 39 cities in Massachusetts 34 had a higher per capita, the highest being \$121.20. Only four of the cities of Massachusetts had a lower per capita expenditure than Somerville. From this examination of the facts taken from local, State, and National authoritative financial statistics, the answer to the questions already propounded is that the fractional part of each dollar of expenditure from revenue in 1924 devoted to the schools of Somerville is smaller than the average of 146 cities of the country and that the per capita cost of the schools of Somerville for the school year ending June 30, 1925, was lower than that expended in 34 of the 39 cities of the State.

ORGANIZATION

After considering the cost of the educational program of the City, it is to the point to examine the organization of the school enterprise to see in what way this affects the answers to the questions about cost. Our schools have 12 grades divided on the 6-3-3-plan, 6 grades of elementary schools, 3 grades of junior high schools, and 3 grades of senior high school. There are 9 kindergarten classes. There is a Vocational School for Boys and a Continuation School. The special enterprises of the schools are classes for retarded children, a Sight Saving Class, and a Dental Dispensary. In the evening organization there is a high school, two elementary schools, practical and household arts classes for women, and Americanization classes. The organization of the day schools is in accordance with the advanced and growing tendency of the time. The special undertakings are limited in number and are of the general nature fostered or compelled by state legislation. Adequate provision for the needs of the pupils will necessitate additional special classes. In administering the program of studies, the cost of such an educational program is in part determined by the number of teachers and

supervising officers, the salaries paid to them, and the amount spent for supplies and equipment. Comparison between expenditures of Somerville and the expenditures of the other cities of the State shows that we are extremely economical in these particulars, there being only four cities of the State with a lower per capita expenditure for the maintenance of schools for the last school year. The conclusion is, therefore, that while the cost of education in Somerville does take one third of the revenue of the city, this expenditure is within five of being the smallest per capita expenditure among the cities of the State.

Some changes in the organization and in the provision of classes were made at the opening of schools in September. A new kindergarten was opened in the Perry School and another in the Highland School, while owing to a change in the plan of conducting kindergartens additional classes were formed in six other kindergartens. In pursuance of a general plan to relieve overcrowding in certain classes, it was decided to use additional rooms in the Edgerly and Forster School buildings. Consequently the atypical class at the Knapp School was transferred to the Edgerly School and the room so vacated was used for an elementary class. Two new classes were opened in the Forster School, thereby giving relief to certain grades in the eastern part of the city.

TEACHERS

Thirty-two teachers have dropped out of the service during the present year, about 7% of the total number. Of this loss two were by death, four by retirement, and the rest by resignation. Of the resignations, eight women teachers resigned to be married and four for professional advancement. During the same time thirty-four persons were elected to positions as teachers. Of this number seventeen were trained in the schools of Somerville and seventeen were drawn from other places. Nine of these newly elected teachers were college graduates, 19 were graduates of State Normal Schools, and three of private schools. Thirteen had only one year's teaching experience while twelve had more than five. All of the thirteen elected after only one year's teaching experience, were Somerville girls. The training that the latter have received during the one year since their graduation from college or normal schools has been obtained in our schools under the supervision of masters, principals, and other supervisory officers. These young teachers necessarily lack some of the qualities of older teachers. They are, however, first-rate material out of which to make successful teachers.

It is the problem of the School organization to afford them such assistance and supervision as will insure their growth in professional understanding and in teaching skill.

PROFESSIONAL IMPROVEMENT

In the last report a full explanation was given of the plan adopted by the School Committee to encourage the professional improvement of teachers in service by giving additional pay to teachers who will pursue approved courses of study. It is pertinent to report how that plan has carried on during the present year. Of the 449 teachers, 354 are now pursuing some course of professional study approved by the Superintendent of Schools or have taken such a course during the present calendar year. Only 95 teachers have taken no part in this plan since its inception. At this time last year there were 124 teachers who had taken no courses. The range of studies pursued by the teachers has been wide and the means of instruction have been varied. Again this year the School Committee established several courses to be given in Somerville. Among these are the following:

Voice Placement and Reading, 2 classes (Pts. I and II), Harriet M. Bell, teacher in the Somerville High School.

Health Education, Mabel C. Bragg, Assistant Superintendent of Schools, Newton.

Classroom Teachers' Problems of Administration, 2 classes, James A. Crowley, Master, John Winthrop District, Boston.

Educational Psychology, 2 classes, Francis A. Ryan, Supervising Principal, Knapp, Baxter, and Perry Schools, Somerville.

The total amount paid to teachers this year as increases earned under this Plan is \$10,524.37. The number of teachers receiving from \$50 to \$300 as a result of this plan is 248; 46 of these have received two increments.

KINDERGARTENS

For a number of years our kindergarten classes have been conducted on the plan of a session in the morning and only one class in a room. These classes have accommodated 50 pupils under the care of a teacher and an assistant. On June last there were 7 classes having a membership of 314 pupils. For a number of years there have been requests for additional kindergartens in various parts of the city. Lack of vacant rooms available for this purpose has prevented

the establishment of such classes in certain localities. To extend more widely the benefits of the kindergarten without greatly increasing the cost, the School Committee at its April meeting voted to change the plan of conducting kindergartens and set forth the details of the change in the following order:

That the kindergartens of the school system be reorganized beginning September 1, 1925, upon the following plan:—

1. That kindergarten teachers be put on a full-day teaching program of two sessions.

2. That the kindergarten classes shall continue in a half-day program, but that the number of children taught during the day by a kindergarten teacher, without an assistant, shall not exceed 50, the limitation that is at present put upon the size of the first grade classes.

3. That kindergarten classes be conducted on either of two plans, (a) a group not exceeding 25 in charge of a kindergarten teacher without an assistant; or (b) a group not less than 30, nor more than 50, in charge of a kindergarten teacher with an assistant.

4. That a group of kindergarten children, not exceeding 25, shall be taught by a person with the rank of teacher, and having the salary rating of kindergarten teacher.

5. That the salary rating of a kindergarten teacher be the same as that of an elementary school teacher, with a maximum of \$1,500; that kindergarten teachers be placed in this salary schedule beginning September 1, 1925, in accordance with their years of service, and that the maximum pay of assistants working a two session day be increased \$100.

6. That elected kindergarten teachers and assistants now teaching in the kindergartens of the city be employed next September in accordance with this plan and that new classes for kindergarten instruction be organized to the extent of the resources made available by the adoption of this plan.

The outstanding points of this change are the following: Kindergarten teachers, like teachers of other grades, now teach a whole day and are paid on the same basis as elementary teachers. Kindergarten rooms are used in the morning and in the afternoon, a different set of pupils attending each session. A larger number of children secure the advantages of kindergarten training from the same resources. Under the present arrangement where two classes occupy one room,

one half of the pupils attend in the morning from 9 to 12 and the other half attend in the afternoon from 1:30 to 3:30. This arrangement will continue until midyear when the classes will change sessions.

VOCATIONAL SCHOOL FOR BOYS

The attendance at the Vocational School for Boys has been somewhat larger than a year ago. As the year closes the membership of the school is over 100. During the fall the master of the school has urged the establishment of a class in electricity and one in carpentry, having a number of boys in the school now who want such courses and being convinced that others would come into the school were such classes established. Meanwhile there is a request pending from the Master Painters' Association for the opening of a class in house and interior painting. Attention should be given to these proposals very soon. The Department of Education which shares with the School Board the direction and expense of this school favors starting the class in electricity and in general favors the building up of the school by the addition of new classes whenever possible. The school, though small, is efficient in the departments which it maintains. It is well equipped for the work now being done but any extension of that work will require additional equipment. The school operates as far as possible upon a commercial basis, getting real work to do and covering the cost of the materials used through the returns from the jobs done. This fact applies to a larger extent to the automobile department than to any other. In November 1924, the Superintendent addressed to 60 patrons of the school the following note printed upon a postcard with a return card for reply:

CITY OF SOMERVILLE, MASSACHUSETTS

School Committee

November 6, 1924

Dear Sir:

Knowing that you had work done last year in the Automobile Department of the Boys' Vocational School, I am writing to you to get your opinion of the service given you. This inquiry is made in an effort to check up on our work in the interest of

conducting it in such a way as to give satisfaction to our patrons. Will you, therefore, please fill out the attached card and return it to me at your early convenience.

Very truly yours,

Charles S. Clark

Superintendent of Schools.

REPLY CARD

November 1924

Reply of.....to inquiry concerning work done for him in the Automobile Department of the Boys' Vocational School.

1. Was the work satisfactory to you?.....

.....

2. Do you consider the price charged fair?

.....

3. Remarks.....

26 cards were returned. Of these replies all expressed satisfaction with the work which had been done for them in the school. In these days when fault is so easily found with everything rendered by way of service for pay and when the dissatisfaction of patrons with automobile repairs is so common as to be almost proverbial, it is rather surprising to find such unanimity of approval for the work which this school has done for its patrons. The fact is so outstanding as to deserve statement in this place to give the school publicly the credit which is its due.

DIRECTOR OF THRIFT

One of the distinguishing features of the record of this year is the recognition given to thrift instruction as a part of the work of the schools by the appointment of an official whose sole duty will be to promote the work of thrift. In June the School Committee created this position and appointed a director to exercise its functions. Since September this official has been engaged in making plans for a more general and energetic carrying on of this work. These plans include

establishing the School Savings Bank on a more efficient basis, increasing the ways and means for training pupils of all grades from the kindergarten through the Senior High School in conserving their resources and in saving their money, and lessening the work of record-keeping so that teachers shall not be burdened with that feature of the undertaking but may give their time to the more vital part of the work to be found in training pupils to a proper understanding of the value of making a right use of their resources.

The School Savings Bank system was set up in our schools under the authority of the School Board in March, 1912. In nearly every school in Somerville there is now a School Savings Bank. Since that time the work has progressed creditably with the result that total deposits have shown an increase from year to year. This growth is shown by a comparison between the work of the School Savings Bank in 1912 and that of 1924. In the former year, there were 1,963 depositors. In the latter, there were 5,116 depositors. In 1912 the number of deposits was 7,388. In 1924, there were 88,553. This increase in the number of deposits is in greater ratio than is the increase in the number of depositors and would seem to indicate a development in the habit of saving greater than the increase in the number of those who were depositing. Again there is even greater increase in the amount deposited. In 1912, the sum was \$3,917.16. In 1924, it was \$58,688.74. The ratio of the amount deposited in 1924 as compared with the amount deposited in 1912 is far greater than the ratio of growth either in the number of depositors or in the number of deposits. The amount deposited during the first four months of the present year is \$20,283.91. During the same months last year the amount was \$15,913.53, an excess for the present year under the new plan of \$4,370.38.

There is, therefore, a good foundation for the larger effort now to be made. The real objective of this matter is the improvement of the attitude of individual pupils of the schools in respect to habits of thrift; this is one element of character building. As such, it needs to be understood and valued by all teachers. Character is not formed by fiat; it is formed mainly by repetition of volitions of the individual and acts proceeding therefrom; it is a slow growth. To continue the development of a right habit requires unremitting perseverance. In order for the teaching of thrift to reach a worthwhile objective, children once started on the way to the forming of a proper habit of thrift must be kept going along that path throughout the whole school course. It will amount to little to start the children in a habit of depositing in the School Savings Bank in the lower grades unless equal or

greater efforts to continue the practice are made in the upper grades. The full result of such instruction, therefore, should be manifested in the High School, the last stage of a child's training in the public schools before he goes out to stand or fall upon the training that he has received and upon the character which he has formed.

The following report from the Director of Thrift gives interesting details of the plans already put into effect as well as some of the results:

December 24, 1925

Mr. Charles S. Clark
Superintendent of Schools
Somerville, Massachusetts

Dear Mr. Clark:

I herewith submit a report of the work in Thrift Instruction carried on in the schools since the beginning of the school year.

Since the thrift work in the city had not been organized prior to this year, it was necessary to find some direct means for stimulating interest, as well as to facilitate the distribution of such information, materials, and suggestions as would help in carrying out a thrift program. To gain these ends, a teacher thrift representative was appointed in each building to serve as a center through whom other teachers might be reached and receive instructions.

The thrift program, as a whole, resolved itself into the following objectives:— to develop a thrift sense among the pupils through right habit training; to afford the pupils the benefit of the practice work contained in the operation of school banking through pupil participation; to relieve the teachers of a burden of work with respect to record keeping in the banking; to create an interest and desire for thrift through motivation, and in general not only to put before the pupils thrift principles but rather to offer them the opportunity to practice the principles so that these may become habits of living to guide them in their course of action during their school term and in later life.

Upon the suggestion of a committee of five masters representing the Senior High, Junior High, and Elementary schools, it was decided that efforts to bring about these objectives be concentrated in one school in order to perfect plans which could be introduced throughout the system as found practical. Many experiments have, therefore, been carried on at

the Bingham School, especially with reference to the school banking. The following has proved the most expedient and successful. The collection of the money for the banking with the necessary data accompanying it is taken care of entirely by sixth grade pupils within the school under the supervision of a Senior High School pupil. The actual recording and bookkeeping, however, is conducted at the High School with a view to incorporating the work as part of a regular course in business training. The interest in banking has been promoted by personal talks to the classes on the value of thrift, by the formation of a council from pupil representatives of the rooms, and also by the excellent work of the teachers in correlating the regular school work with banking and thrift principles in general. Rivalry created between the rooms in various ways has resulted in a healthy competition and consequent growth. Under this system, the pupils have been afforded the opportunity to benefit from participation in the banking process, while the teachers have not been burdened with detailed work incident to school banking. It is significant to note the results on the banking this year as compared with those of the previous year. The total amount of deposits to date this year at the school are \$1909.23, while in the same period last year they were \$1377.87. During this time, the number of deposits in 1925 were 3,832 while in 1924, they were 2,466.

In the Western Junior High School, there has been concentration of another order in the development of the thrift idea. Pupil representatives were appointed from among the bank depositors to form a Directors' Board which formulates thrift plans for the school. Through frequent bulletins, the tabulation of statistics, thrift news in the school paper, personal efforts by directors in the individual rooms, and various other ways, they have succeeded in making their influence felt and the results of the awakening of a thrift sense has been apparent. The qualities of leadership, initiative, responsibility, brought to the fore in this way, are important factors in the education of our future citizens.

While the Grammar and Junior High School pupils have been developing thrift in their respective schools, the Senior High School has not been idle. Aside from the work being carried on through the Bookkeeping Department, in connection with the record keeping of the lower schools, the Students' Council has undertaken the project of advancing interest in thrift as part of their program for the year. At present they are planning an intensive campaign to enroll the students as depositors in the school bank. Their efforts

are to be directed throughout the year in emphasizing the various phases of thrift.

In addition to the concentrated work in the individual schools, there have been distributed throughout all the schools a series of slogans together with a series of posters in an endeavor to center the pupils' attention upon such thoughts and ideals as will lead to the cultivation of good and thrifty habits. In many instances, the teachers have furthered the work by interesting their pupils through thrift songs, poems, poster work, dramatizing stories, all of which help to build up for the pupils concrete ideas on thrift. With a view to extending the sphere of influence of the thrift work by reaching the pupils through all possible contacts, a thrift shelf has been established at the public library. The cooperation of the Women's Clubs of the city has been secured and they have manifested their active support by offering two prizes to the schools for thrift work.

By the inculcation of thrift principles, the pupils are being trained to discriminate values which shall lead to a proper evaluation of all the resources at their command. In this way, the wise use of time, the proper regard for health, the conservation of energy, and the careful use of material resources, including money, must all receive attention. To be able to use wisely, and to expend carefully, one's resources is a matter of long training and practice. The whole school course should aim to further this training. A beginning to establish it in the curriculum has already been made. Plans to enlarge the scope of the work are being formulated. The value which can come to the pupils and the results which may be attained from this work are in direct proportion to the cooperation and intensity of purpose with which the teachers approach the subjects in their relation with the pupils through their classroom work.

I wish to take this opportunity to express my appreciation for the helpful spirit, the kind cooperation and willing assistance given me thus far by Mr. Clark, and all those with whom it has been my pleasure to plan and work in our new endeavor.

Respectfully submitted,

E. BELLA WISEMAN,

Director.

SCHOOL ATTENDANCE

Regular attendance of pupils at school has always been recognized by teachers and school officers as a matter of great importance. Among the most carefully maintained records of the schools are those which show the attendance of individual pupils and the percentage of attendance of classes, schools, and school systems. A low percentage of attendance indicates a lessening of efficiency of the school organization. Hence school teachers and school officers use all proper efforts to secure regularity and punctuality of attendance on the part of all pupils. For a number of years the causes of absenteeism have seemingly been increasing and the task of the schools in preserving a good rate of attendance has been growing harder. During this time no statistics have been available to the public showing the annual per cent of attendance for the school systems of the State. Recently, however, the Department of Education issued a statement giving the per cent of attendance and the rank of towns and cities in Massachusetts for the school year ending June 30, 1924. This shows the average of the State to be 93.3%. In a letter accompanying the statistical sheets, Commissioner Smith says, "the percentage of attendance for the State as a whole seems very creditable." Somerville with a percentage of 93.9% is in the first third of the cities and towns. Only seven of the larger cities have a higher percentage of attendance than Somerville. The standing of our city in this State list is a good one. It is creditable alike to the character of our people, to the disposition of our pupils, and to the successful management of our principals and teachers.

WORK OF THE SCHOOLS

As there have been no changes during the year in the program of studies of the schools, the report of the work of this period is much like that of last year. A few comments, however, may well be made which will give some idea of the work which has been done in each division of the schools.

The High School

The usual number of pupils passed successfully from the high school to higher institutions of learning at the end of the last school year. Among the institutions which graduates of the high school entered were:

Amherst College	Mass. School of Pharmacy
Bates College	Mass. Inst. of Tech.
Boston College	Mt. St. Mary's College
Boston University	Normal Art School
Brown University	Northeastern University
Dartmouth College	Radcliffe College
Fitchburg Normal School	Salem Normal School
Georgetown University	Simmons College
Harvard University	Skidmore College
Holy Cross	Tufts College
Jackson College	Tufts Pre-Medical School
Lehigh University	

Notwithstanding the good record of our high school in the matter of fitting for higher institutions, the criticism is occasionally heard that "the high school does not prepare for college." The facts of the local situation disprove this criticism. However, there is nothing original about this criticism when it is made in Somerville. It is indigenous to every clime and to every community. What high school principal has not heard it more than once? Against this unjust criticism it is pleasant to be able to place a statement of a graduate of last year's class in our high school written from college to his parents with no expectation of its coming to the eye of school officials. It will be of interest to our citizens to hear it. The first extract is from a letter written to the boy's parents shortly after he entered college. In this the student pays tribute to his preparation. The second quotation is from a letter written after he had taken a placement examination in Latin and shows that as a result of his examination he was placed in the highest Latin group. The two extracts are as follows:

Extract from First Letter

I am playing tennis a good deal and am not studying too hard. Perhaps not hard enough, because they mark awfully hard up here. No resemblance to high school. I find, however, that the Somerville High School has prepared me well. From a comparison of my basic knowledge with that of others even from Prep. Schools I find I do not suffer. In other words the S. H. S. has a high standard and admirably fits one for college, if he will allow himself to be so fitted.

Extract from Second Letter

And now a little about college. A few days ago we took a placement examination in Latin.

If we failed it we were to be dropped back a year and take Vergil all over; if we did fairly well we were to stay where we were; and if we did very well we were to be advanced to Latin VII. I worried a good deal after I took the exam for fear I had been careless. So much depended on it! But the results were given out today and I was told that I have been advanced to Latin VII. Only about five or six others in the class were so advanced.

Our high school, like all other high schools, is going through the experience of dealing with a student body presenting great variations of racial derivation, cultural background, intellectual ability, and scholarship attainments. This condition has approached the school stealthily without any advance notice of its coming, but the faculty of the school is aware of its arrival. The present day problem of high school administration and teaching is very unlike that even of a decade ago. To meet the present problem adequately, readjustments and rearrangements must be made. These readjustments will not fail in the preparatory courses so much as in courses of a more general nature. In recognition of this problem, certain expedients have been used during the present year. Among these are the following: A class of first year over-age pupils has been organized under special instruction. Achievement tests have been given in United States History under the direction of Prof. Edwin A. Shaw of the Harvard Graduate School of Education. Intelligence and achievement tests have been given in English for the purpose of readjusting divisions. A questionnaire has been given to all pupils in the school, under the direction of the English Department, for furnishing information to be used in a better classification and direction of the pupils of the school.

Junior High Schools

These schools have continued to work under the schedule of studies adopted several years ago. While modifications have been made of the subject matter in several of the studies since that time, the general program of studies has not been fundamentally changed. Under the direction of the Superintendent of Schools, a plan of revision has been made this fall which will involve the cooperation of all the teachers of the Junior High Schools. It is intended to scrutinize the whole field of Junior High School undertaking and to modify our curricula of study wherever that can be done to the advantage of our Junior High Schools.

The work of this year has been characterized by enthusiasm shared by the faculties and pupils of the schools. There are abundant evidences of this enthusiasm in each of the three Junior High Schools. If the function of education is to provide a medium in which youth may live, grow, and learn, then the Junior High Schools of Somerville are doing that work well. Among the outstanding features of these schools is the training given to the pupils to exercise initiative, self-direction, self-control, and independent action. These characteristics are manifested in various kinds of school work. They are shown in contributions to the school paper. They are shown in various extra curriculum activities. They are shown in classroom exercises. In brief, life more abounding is evident in all of the activities of our Junior High Schools. An interesting evidence of the opportunity which these schools present was shown by an incident which occurred this year. Prizes had been offered to the High School and to the Junior High Schools for the best compositions on City Zoning. The winner of the second prize in the Junior High School was a lad born in a foreign country, who came to this country in his fourth year and has received all his education in the schools of Somerville. The language of his home is mainly a foreign language. The children alone speak habitually English outside of the home. Yet this boy, so derived and trained, has secured in competition a prize for one of the best essays on City Zoning awarded to pupils in the Junior High Schools of the city of his adoption.

Elementary Schools

As no important changes have been made in the course of study for the first six grades the effort of the year has been to do well the things which constituted the so-called fundamentals of education. Various methods have been employed by supervising principals to improve the work of their schools. In the early part of the year one supervising principal in connection with the Harvard Graduate School of Education examined the children of the 5th and 6th grades of his district, using for that purpose the Dearborn Group Intelligence Test. As a result of this examination he arranged the children in classes according to mental ages. This grouping has proven very satisfactory and will be continued as the working plan of the school. A striking instance of the benefit of this change was given in the case of a boy who had been the most troublesome pupil in the school. The test gave him a high I. Q. and a high mental age. After he had been put in a class with others of corresponding mental age

his conduct became entirely normal and satisfactory and has continued to be so. Increasing attention is being given by principals and teachers to all the conditions which tend to create differences of attainment among the pupils of the schools and attempts are being made constantly to adjust the teaching methods to the differing needs. The transfer of the 7th and 8th grades to the junior high schools has given to the 6th grade the importance of a terminal position, an importance which is shared to some extent by the 5th grade. There is noticeable in these grades a degree of power for self-direction and initiative which was not apparent in children of these grades when they were occupying a position subordinate to the 7th and 8th grades in the same building. Special emphasis has been given throughout the year to those studies and exercises which have for their purpose the development of character. Among these are the work in Civics, (conduct), in Health (forming right habits), Safety Education, and Thrift.

Evening Schools

The evening schools embrace the high school, elementary classes, classes in Americanization work, and practical arts classes.

Evening High School—The Evening High School has maintained throughout the present school year the large increase of membership which it secured during the previous year. A change in program has been made giving three forty-minute periods each evening in the place of two sixty-minute periods. This change was made as a consequence of some experimenting during the previous year. Under the new plan a pupil may take more subjects, a fact which has appreciably increased interest.

Elementary Classes—Elementary Classes are conducted in the Bell School building and in the Cliff building. While these classes are not large, having an average membership of about 110 pupils, the interest is keen and the work is earnest and useful.

Americanization Work—Twenty-two non-English speaking nationalities are represented in the Americanization work being carried on by the schools. Each of these nationalities is contributing in a helpful way to the development of our city. While the number of foreign-born coming to Somerville is decreasing, there remains the intensive work of introducing those who are here more fully into the cultural, industrial, and civic life of the city. There is an increasing

number of these foreign-born men and women attending the Americanization classes for the purpose of preparing for Citizenship.

Evening Practical Arts Classes—Classes in Millinery and Dressmaking were continued this year in the Cliff and High School buildings. In the two schools 134 women have regularly attended the Dressmaking Classes while the Millinery Classes have had a membership of 48. This work has been followed with interest by the members of the class and has given the women practical instruction in making their own apparel.

Continuation Schools

The Continuation Schools of Somerville, now in the sixth year of their existence on a compulsory basis, are continuing the development of children who have become workers to the end that they may live well with themselves and with their fellow men. This year the follow-up work carried on by the teachers has been made more effective by the inauguration of a system of job analysis. The schools have good attendance and the pupils maintain an attitude of interest which is favorable to their getting the most from the opportunities which the schools afford.

Special Classes

Four classes are conducted for children three or more years retarded in their studies. Pupils for these schools are discovered through the work of the psychological clinic which makes an annual examination of pupils who are so backward in their school work as to make attendance upon a special class advantageous to them. As a result of these examinations there is now a list of pupils recommended for attendance upon classes of this type. Not all of these children have left the regular grade school classes. There is lacking now in the situation an authoritative determination of the status of such pupils. Under the State Law the city is required to maintain classes for such pupils, the obvious intention being to provide a better training for them than can be given in the class of the ordinary type. It happens, however, that for various reasons parents of some of these children insist upon having them remain in the regular graded classes. In this way, the purpose of this provision is defeated and the work of the regular grade classes is hindered. It is desirable in the near future that all of the children retarded three or more years should be gathered in special

classes and should be given the specific training suited to their needs. There are at the present time in the four atypical classes 60 pupils. Another special class is the Sight Saving Class, for children of defective eyesight. This class is maintained by the School Committee in cooperation with the Department of Education. Only children who have been examined and recommended by the ophthalmologist of the State Department of Education are admitted to this class. Large-faced type is used in all the reading matter. The handwork is all of a kind which places no strain upon the eyes. There are at present in this class 11 pupils.

SUMMARY AND RECOMMENDATIONS

In order to focus attention upon the most outstanding needs of the immediate future, I submit the following three recommendations:

(1) That the high school building situation receive immediate attention, to determine what shall be done to provide suitable additional accommodations.

(2) That consideration be given to the situation in the eastern part of the city with a view of determining what accommodations must be made for the increase of pupils consequent upon the building up of the Ten Hills Farm section.

(3) That attention be given immediately to the petition of the teachers for a general increase of salaries, in order that determination upon this question may be made in the first part of the municipal year.

CONCLUSION

This survey of the condition of the schools for the year 1925 affords many reasons for gratification to our city. The fact that every child in the elementary schools can attend school all day and have a seat to himself is the first and great cause for satisfaction. This is a condition by no means universal in cities of the State. It is a fundamental of good school conditions. The second reason for gratification is the generous provision of opportunities for the children of Somerville which the school system affords. Diversified needs require the provision of diversified opportunity. These the schools of Somerville present to a high degree. Such diversification is also a fundamental of a good school system. A third cause for gratification is the sympathetic, intelligent, and efficient conduct of the school work by principals and

teachers. Such a condition is the crowning distinction of a school system. Still another cause for gratification is the cordial cooperation existing between the schools and the homes. Through Parent-Teacher Associations and through visitations, the parents are in close touch with the schools and are cooperating to secure the best advancement of the children. This is a condition of great importance and of great promise. The development of the youth of the land is a work which can be best accomplished when the influence of the home supplements that of the school, each contributing harmoniously something that the other lacks and both comprehending that the proper development of the youth of today is essential to the welfare of the State of tomorrow.

Respectfully submitted,

CHARLES S. CLARK,

Superintendent of Schools.

December 28, 1925

REPORT OF THE HEAD MASTER OF THE HIGH SCHOOL

February 1, 1926

Mr. Charles S. Clark
Superintendent of Schools
Somerville, Mass.

Dear Mr. Clark:

A report from the High School for 1925 offers very little of an unusual character.

In athletics the erection of a locker building on Dilboy Field has met an outstanding need. The winning of the baseball championship and an improved standing in football showed commendable effort and spirit. The giving of a dinner to the football boys by a group of High School Alumni showed a healthy interest from outside in the physical welfare of our pupils and should produce helpful and needed results. A cup for the best all-round athlete and scholar presented by Robert M. Garland in memory of his brother Chester Otis Garland will be an excellent stimulant to the best kind of athlete. The granting of diploma credits by the School Committee for regular and faithful participation in school sports is also a helpful step.

In debating an increasing interest has been apparent. Teams representing the Girls' and Boys' Societies have won debates with other schools during the year.

Without going into detail regarding many other forms of school achievement and school activities which are commendable, I should like to devote the rest of my report to one phase of school organization which has been very helpful and which has been carried further in the Somerville High School than in most schools, i. e. student cooperation.

Student cooperation appears in the school in three ways.

- (1) By organizations which are of an advisory and inspirational type such as the Students' Council.
- (2) By organizations which have to do with the routine administration of the building such as the Traffic Squad.
- (3) By the filling, on the part of the pupils, of positions of leadership.

The Students' Council is an organization made up of the officers of each class, the floor proctors and two teachers. The

class officers are elected by the classes. Each room elects a proctor. The proctors on each floor elect one of their number to serve as floor proctor on the council. The teacher representatives are appointed by the Headmaster. This organization works in the school life as follows: by suggestions made to the pupils through the school bulletin, by work through the proctors in the home rooms, and by assemblies under its charge. Certain matters which have been dealt with this past year through the Students' Council have been Courtesy Week, the Red Cross Drive, athletics, and recently a very successful drive for Thrift. The Students' Council is considering at present, ways and means of improving attendance in the school, regarding it not as an object in itself but rather as a means of teaching regularity, punctuality, and the higher conception of Thrift.

The Traffic Squad is an organization based on an entirely different plan. Where the Students' Council is largely advisory and suggestive, the Traffic Squad is primarily executive. Under proper organization, about eighty boys and girls constitute a Traffic Squad for the school. The members of this squad are selected by the pupils though right of rejection, seldom employed, is in the hands of the Head Master. This Traffic Squad supervises all filing throughout the building. This supervision may be taken as a form of safety work in that accidents are much less likely to happen under pupil supervision. In addition to the supervision of the filing, the Traffic Squad has duties to perform in case of fire-drill and at recess, both within and without the building. In other words the Traffic Squad is an administrative pupils' organization formed to care for the welfare of the pupils, their safety in emergency and the proper protection of the building. These young people act as ushers in all assemblies. The whole-hearted interest which they take in the work and the excellent quality of the result of their effort speak well for the valuable experience and excellent training which they are deriving.

The third form of student cooperation is shown in the administration of extra curriculum activities, as practically every pupil organization in the school is under pupil leadership. There are about fifty physical training groups, each having two pupil leaders who are elected by their own members. These pupils direct the daily physical training exercises and are a nucleus for the officers controlling military manoeuvres which take place on class day. The orchestras, Glee Clubs, Band, Fife and Drum Corps, Bugle and Drum Corps, English Club, Dramatic Society—in fact all student organization,—all have pupil leaders. The school paper, *The Radiator*, is

practically under pupil organization. The editor, business manager, and all other officers, except two faculty advisors, are pupils. The success of these different organizations under pupil leadership has been most striking. The reaction on the other pupils of the school has been to develop a greater spirit of cooperation and interest than would otherwise have been secured. In other words, we feel not only do the pupils who have occupied these positions of leadership get great individual gain but that the rest of the school gets an equal gain in that it acquires the habit of following leadership of the right kind. The result of good to the school in loyalty, initiative, experience, and responsibility is indeed great. Training for citizenship is one of the important functions of a school. We feel that we are meeting this need in training pupils to think for themselves, to take initiative, and to follow right thinking and helpful leadership.

Respectfully submitted,

JOHN A. AVERY,

Head Master.

CONTENTS OF APPENDIX

SUMMARY OF STATISTICS

Population and school census.
School buildings.
Teachers.
Attendance for year.
Cost of school maintenance.
Teachers' salaries.
Result of eye and ear tests.

MISCELLANEOUS TABLES

CONCERNING FINANCE

No. of Table.

1. Schedule of school property.
2. Cost of maintaining schools, school year 1924-1925.
3. Cost per capita of maintaining schools, school year 1924-1925.
4. Cost of maintaining schools for a series of years.
5. Cost per capita for maintaining schools for a series of year.
6. Amount spent annually for new school buildings and for repairs for a series of years.

CONCERNING PUPILS

7. Population and school registration.
8. Attendance, etc., of the schools for school year 1924-1925.
9. Statistics of the high school for school year 1924-1925.
10. Pupils by grades, June, 1925.
11. Separate statistics for high, junior high, elementary and vocational schools, for school year 1924-1925.
12. Admissions to first grade in September.
13. Number of junior high school graduates, 1925.
14. Truant statistics for a series of years.
15. Evening school statistics, 1924-1925.
16. Elementary school promotees for a series of years.
17. Attendance statistics of all schools for a series of years.
18. Statistics of the high school for a series of years.
19. Promotions, junior high schools, 1925.
- 19A Promotions, elementary schools, 1925.

CONCERNING TEACHERS

20. Resignations of teachers, 1925.
21. Teachers elected in 1925.
22. Leave of absence of teachers.
23. Transfers of teachers.
24. Number of teachers employed for a series of years.

STATISTICAL AND GENERAL TABLES

25. Changes in textbooks, 1925.
26. High and Junior High School graduation exercises, 1925.
27. Vocational school graduation exercises, 1925.
28. Organization of school board for 1926.
29. Teachers in service January, 1926.
30. Officers in service January, 1926.
31. School janitors.

SUMMARY OF STATISTICS

1.—POPULATION AND SCHOOL CENSUS

Population, state census, 1895	52,200
Population, United States census, 1900	61,643
Population, state census, 1905	69,272
Population, United States census, 1910	77,236
Population, state census, 1915	86,854
Population, United States census, 1920	93,033
Children between five and fifteen years of age inclusive, April, 1925 by school census	17,591

2.—SCHOOL BUILDINGS

Number of school buildings in June	31
Number of classrooms in use in June	401
Valuation of school property	\$3,216,400

3.—TEACHERS

	*1924	*1925	Change
In high schools	73	74	+1
In junior high schools	116	118	+2
In elementary schools	210	219	+9
In kindergartens	14	14	0
Total in elementary schools	224	233	+9
Vocational school for boys	8	8	0
Independent Household Arts ...	1	1	0

Valuation of city	99,311,000 00	104,769,800 00	+5,458,800 00
Number of dollars spent to maintain schools out of every \$1,000 of valuation	9 40	9 20	—0 20
Number of dollars spent for all school purposes out of every \$1,000 of valuation	12 90	9 84	—3 06

* School year.

Cost of the Schools

The total amount spent for the maintenance of the schools of Somerville for the school year ending June 30, 1925, is \$964,261.00.

This includes the sums spent for care of school buildings, including janitors' services, fuel, light, and school telephones; the amount paid for salaries of officers, and the amount spent for school supplies; and the sum paid for salaries of teachers.

The expenditure for *care* for *school buildings* is wholly in charge of the City Government.

The amount paid for janitors is	\$73,966 48
The cost of fuel is	41,846 38
The cost of light is	12,225 69
A total cost of	\$128,038 55
The cost per capita	8 71
Cost of repairs	45,847 81

The second important expenditure is wholly under the control of the School Committee and is covered by what is known as the "*School Contingent*" appropriation. The following is the itemized account:—

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.		CONTINUATION SCHOOLS AND AMERICANIZATION WORK
		High and Vocational	Elementary	High and Vocational	Elementary	
Officers' Salaries.....	\$15,596.48					
Office Expenses.....	3443 80					
Textbooks.....	14,099.96	\$5,495.54	\$8,531.55	\$54.71		\$18.16
Stationery and Supplies and Other Expenses of Instruction.....	24,145.09	12,921.71	10,456.17	460.86	40.81	265.54
Miscellaneous (Tuition, etc.)	3,570.86	1,533.82	1,800.18	133.84	8.69	94.33
Total	\$60,856.19	\$19,951.07	\$20,787.90	\$649.41	\$49.50	\$378.03

The third, and by far the largest, element of the cost of schools is the sum spent for the *salaries of teachers*. This expenditure is under the control of the School Committee.

The following statement shows the distribution of the sums paid for salaries:—

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.		CONTINUATION SCHOOLS AND AMERICANIZATION WORK
		High and Vocational	Elementary	High and Vocational	Elementary	
Supervisors	\$15,004.50	\$4,217.56	\$9,786.84			1,000.00
Principals.....	50,162.50	12,707.50	33,540.00	\$627 00	\$438.00	2,850.00
Teachers	710,199.26	225,447.99	467,583.37	6,439.00	1,071.00	9,658.00
Total	\$775,366.26	\$242,373.05	\$510,910.21	\$7,066.00	\$1,509.00	\$13,508.00

The *total outlay* for all *school purposes* includes all of the preceding and the sums spent for schoolhouse repairs and new buildings.

Per Capita Cost. The proper method of comparison of the cost of schools year by year is to consider the sum spent for each pupil in the average membership. In this computation we exclude the cost of evening schools, and the vocational schools. The following shows:—

THE PER CAPITA COST OF DAY SCHOOLS FOR 1924 AND 1925

	High School.			Junior High Schools.			Elementary Schools.			All Day Schools.		
	1924.	1925.	Change	1924.	1925.	Change	1924.	1925.	Change	1924.	1925.	Change
	Instruction	\$76.21	\$75.21	-\$1.00	\$58.09	\$60.01	+\$1.92	\$42.18	\$42.43	+\$0.25	\$50.71	\$51.75
Supplies	7.16	6.24	-0.92	4.08	3.47	-0.61	2.13	1.60	-0.53	3.28	2.76	-0.52
Care	9.45	9.16	-0.29	6.45	7.30	+0.85	7.18	8.42	+1.24	7.30	8.30	+1.00
Total.....	\$92.82	\$90.61	-\$2.21	\$68.62	\$70.78	+\$2.16	\$51.49	\$52.45	+\$0.96	\$61.29	\$62.81	+\$1.52

Including the cost of maintenance of evening schools, the per capita cost is as follows:—

	1920	1921	1922	1923	1924	1925
Cost of Instruction	\$44 34	\$50 07	\$50 90	\$50 39	\$51 21	\$51 25
Cost of Supplies	2 80	1 60	2 77	2 85	3 34	2 79
Cost of Care	7 45	9 62	6 73	9 24	7 39	8 35
Total	\$54 59	\$61 29	\$60 40	\$62 48	\$61 94	\$62 39

An examination of these tables shows that we have paid \$1.00 less for the instruction of each pupil in the High School than in 1924, and 92 cents less per pupil for supplies.

The elementary schools have cost 25 cents more per pupil for instruction, and 53 cents less for supplies.

The amount spent for the school year 1925 was \$9.20, or 20 cents less than was spent in 1924. The amount yielded for each child in the average membership of the schools for 1925, not including the vocational schools, was \$62.39.

TEACHERS' SALARIES

The salaries paid to teachers in January 1926 are as follows:—

1 man	\$4,100	2 men, 10 women	\$1,900
1 man	3,575	1 woman	1,875
2 men	3,175	1 woman	1,850
1 man	3,125	5 women	1,825
4 men	3,100	10 women	1,800
2 men, 1 woman.....	3,075	3 women	1,775
1 man	3,050	1 man, 25 women	1,750
1 man	3,000	9 women	1,725
1 man	2,950	17 women	1,700
1 man	2,850	23 women	1,675
1 man	2,775	22 women	1,650
1 man	2,700	2 women	1,625
1 man	2,600	26 women	1,600
2 men	2,575	20 women	1,575
3 men	2,550	*1 man, 59 women	1,550
2 men	2,500	1 man, 90 women	1,500
1 woman	2,475	2 women	1,475
1 man	2,350	1 woman	1,450
1 man	2,325	5 women	1,400
1 man	2,300	1 woman	1,375
1 man	2,275	4 women	1,350
3 men	2,200	7 women	1,300
2 men, 1 woman	2,150	2 women	1,275
1 man	2,125	2 women	1,250
5 men	2,100	11 women	1,200

REPORT OF COMMISSIONER OF PUBLIC BUILDINGS

City Hall, Somerville, January 1, 1926.

To the Honorable, The Mayor, and the Board of Aldermen of
the City of Somerville.

Gentlemen —

In accordance with the provisions of the City Charter, I submit herewith the annual report of the public buildings department for the year ending December 31, 1925.

The total valuation of the property which is in the custody of the public buildings department is approximately \$4,355,000.

The total expenditures for the year 1925 for the care and maintenance of this property was \$238,526.11.

This amount was expended as follows :

	Janitors	Fuel	Light	Care and Repairs	Total
School Bldgs.	\$68,785 23	\$32,860 40	\$11,260 02	\$58,417 52	\$171,323 17
Municipal Bldgs.	5,965 78	1,000 00	1,025 29	8,903 16	16,894 23
Polling Places	9 88	5 67	558 70	574 25
Police Bldgs.	2,485 79	573 21	1,015 89	992 34	5,067 23
Fire Bldgs.	3,216 29	3,091 65	4,010 76	10,318 70
Electrical Bldg.	1,118 00	701 33	28 77	73 89	1,921 99
Contagious Hosp.	416 00	930 97	409 05	1,932 48	3,688 50
Sewer Bldg.	40 76	78 30	101 94	221 00
Sanitary Bldg.	104 72	198 05	215 74	518 51
Highway Bldgs.	863 47	248 50	1,680 66	2,792 63
City Home Bldgs.	1,747 82	566 97	2,260 15	4,574 94
Central Library	3,378 80	620 85	1,086 75	671 91	5,758 31

Bandstand	285 57	285 57
Water Bldgs.	315 80	433 92	1,079 19	1,828 91
Totals	\$87,846 96	\$44,478 53	\$20,500 19	\$85,700 43	\$238,526 11

Inspection of Buildings

The Commissioner of Public Buildings is also the inspector of buildings according to the terms of the charter and as such during the past year has made over 3600 formal inspections of buildings in the process of construction.

The following table shows the number of permits issued for building operations during the year 1925 :—

Buildings	WARDS							Totals
	1	2	3	4	5	6	7	
Dwellings	96	39	36	42	89	67	78	447

Stone	1	1	2
Totals	177	134	97	98	166	166	231	1069

The number of plumbing permits issued during 1925 was	519
Number permits for plumbing in new buildings	287
Number of permits for plumbing in old buildings	232
Number of buildings in which soil pipes were tested	436

The total estimated cost of new buildings and alterations during the year 1925 was \$5,653,030.00, while the estimated cost in 1924 was \$3,604,730.00, showing an increase of \$2,048,300.00.

The total number of permits issued during the year 1925, viz 1069, was 14 less than during the year 1924, when 1083 permits for new buildings and alterations were issued, showing a decrease of 1 per cent.

There has been considerable speculative building of dwellings going on this year, or to be exact there were permits issued for 156 new dwellings housing 568 families.

Single family houses have been altered into two family houses and some of the larger houses have been altered into small kitchenette suites. These types of alteration demand very careful inspection and supervision by this department and entail considerable more time than new construction.

On September 1, 1918 the Board of Aldermen of the City of Somerville passed an ordinance requiring a fee to be collected for every building permit issued by this department. In accordance with this, fees collected for building permits during the year 1925 amounted to \$3554.00.

The Commissioner has under his charge and direction the work of maintenance and upkeep of the eighty-four public buildings of this City and the grounds in connection therewith, all janitors in the City's employ, a force of mechanics who perform the work of keeping the buildings in repair, the inspection of installation and care of all elevators, the supervision of construction of all new municipal buildings, the maintenance of the public bathing beach and public municipal baths in the Bennett and Bingham Schools, and Lincoln Park.

The various activities in connection with the department work require a vast amount of time and attention in order to keep the property in proper condition for occupancy.

The adoption of the new Fire Zoning and General Zoning Ordinance together with the new Building Ordinance just completed has added a considerable amount of labor to this already heavily burdened department.

Every permit issued by this department must be governed by the above ordinances, which in itself, entails a great deal of study.

Coal

As in the past years an invitation was sent out for bids for supplying the necessary tonnage of both Anthracite and Bituminous coal for the city buildings for the winter of 1925 and the spring of 1926.

The contract for Bituminous coal was awarded to the Pratt Coal Company of Boston at a price less than the City of Boston secured, and the contract for Anthracite coal given to Colbert Brothers of Somerville.

The above firms furnished a chemical analysis of the coal which they agreed to supply. A sample from each delivery was sent to the Arthur D. Little Company for analysis.

In anticipation of the coal srike in the Anthracite coal mines the Commissioner filled every available space in buildings where Anthracite coal was used, and owing to this foresight the city departments have not felt the pressure of the strike that has effected other municipalities.

Elevators

According to an act of the Legislature, the Building Commissioner is required to have every elevator in the city inspected yearly, and a report of the conditions and necessary repairs made to the Public Safety Department, State House, Boston.

Plans and specifications of all new installations of elevators must be filed in this office and certificates of approval granted by the Commissioner.

During the year 1925 there were 117 elevators inspected and 32 orders for repairs were sent out to concerns, covering 70 elevators.

School Buildings

The maintenance and care of the school buildings has, as formerly, demanded the most vigilant attention from this department and the appropriation made for that purpose I believe has been expended carefully and judiciously.

Every year, before the summer vacation arrives, this department sends out blanks to be filled in by both the principals and janitors of the school buildings for all requisitions and repairs needed.

These repairs and requests are taken up with the Superintendent of Schools, and taken care of in the order which he suggests so far as the appropriation will allow.

First are taken into consideration the requests and repairs absolutely needed for the opening of schools in the Fall. Then the others are taken up in the order of their importance. This in itself is a huge task as the wants of every section must be taken into consideration.

There have been several additional school rooms opened since September 1st and new furniture had to be procured and set up to accommodate these additional classes. New office equipment for the offices of the High School and the Junior High Schools have been supplied during the past year. The opening of three additional kindergarden rooms necessitated the purchasing of complete furniture and equipment for these rooms.

Room No. 104 in the High School, formerly use as a stock room, has been fitted up as a bank with all new equipment including safe making this department a model bank, equal in facilities to any banking rooms in the City.

Lighting of School Buildings

The most urgent need of the year is the lighting by electricity of the several older buildings in the city.

The care of the pupils' eyesight is one of the most necessary things to be taken into consideration, and the Commissioner strongly recommends that the twenty school buildings which are not completely and properly lighted will be taken care of by a special appropriation covering cost of same.

Fire Escapes

Somerville has unfortunately several three story school buildings of the older type with stairs running from a common hallway.

The Bell, Prescott and Forster School buildings have been taken care of by enclosed fire stairways of non-combustible material, entirely separate from the building but accessible from each floor.

The Commissioner recommends that enclosed stairs of

the same type be built on the Morse, Highland and Edgerly schools.

The High School is now overcrowded and it will be necessary at a very early date to make addition to this building, or a new High School erected in the western part of the City.

Whichever is done the present High School must be brought to the standard of the High Schools of today. A careful study of the building as a whole must be made and heating and ventilating system must be modernized. The present electric lighting of the class rooms is inadequate and new lighting facilities must be installed.

A gymnasium is badly needed and as we must take as good of care of the physical condition of the children as of their mental training this must be included in the plans.

The development of the Ten Hills Section and other parts of the Winter Hill section on the Mystic River side will mean an addition to the present Glines School or a new school in this section of the city. This should be looked into right away and land procured for same at once.

School Yards

During the past year the Durell, Southern Junior High, Morse, and part of the Hodgkins School yards have been fenced with modern 6' chain wire fencing. This prevents the children, while at play, from running into roadway, thereby saving the possibility of accidents. It is the hope of the Commissioner to continue on this line and to erect several more such fences during the coming year.

Several school yards were resurfaced with tarvia during the past year and in a few years we hope to be able to have every school yard covered with smooth surface free from dust and mud.

Heating of Schools

Several boilers have been retubed and otherwise repaired during the past year.

I sincerely recommend a system of heat control be put into the High School, and the building of a new boiler room and modernizing of the heating equipment. This would entail a considerable saving of coal each year, and in a few years would pay for itself.

Also the installation of a steam heating system at the Morse School doing away with the seven antiquated furnaces now in use.

Blackboards

Several of the buildings are equipped with paper blackboards, and the surfaces of same have to be renewed every year at a cost of several hundred dollars. I would recommend that slate blackboards be installed in place of paper blackboards, as the slate boards last indefinitely and the saving on repairs would more than repay the cost of purchasing same.

Fire Department Buildings

There have been numerous repairs and improvements made in the fire buildings of the city.

I urgently recommend that Engine No. Four building be replaced by a new one as it is in such bad shape that it does not seem wise to spend much on repairs. As a fire station is needed in this vicinity, I recommend that this station be torn down and a new one built on less valuable land, and this lot sold for commercial purposes. Much of the material in the old building could be made use of in a new one.

As the fire department is now all motorized it becomes necessary to alter many stations, putting cement floors in the apparatus rooms in place of the wood floors used for the old horse drawn vehicles, and the separation of the garage from the living quarters of the men. We have already started along this line and expect to do considerably more during the coming year.

Municipal Buildings

The past year has seen the completion of City Hall. We now have a modern building housing the several departments. New office equipment has been purchased during the past year to complete a modern and up to date equipment second to none in the state.

The front end of City Hall Annex has been thoroughly renovated and equipped for School Committee and Department uses. The rear end of the building has been fitted up for the G. A. R., Spanish War Veterans, and other patriotic uses.

Libraries

The most urgent need of the libraries at the present time is new lighting equipment. The Union Square Branch, East Somerville Branch and the children's room of the Central Library must be fitted out with new lighting fixtures. The Commissioner hopes to do this at an early date.

The exterior of both the West Branch Library and the Union Square Branch Library have been painted during the past year.

WATER, HIGHWAY AND SANITARY BUILDINGS

Water Buildings

Considerable work has been done on the Water buildings during the past year.

New drop ceilings have been installed, buildings painted both inside and outside, and the electric wiring all overhauled.

Sanitary Buildings

The Sanitary buildings are in need of considerable repairs. A new shed must be erected, and the receiving shed for garbage repaired. The Commissioner hopes to be able to make these additions and repairs during the coming year.

Highway Buildings

An addition to the Highway Garage has been made during the past year. Extension of present heating and lighting systems installed. Many other minor but necessary repairs were made.

Hospital

During the past year a complete new refrigerating plant, satisfactory to the hospital authorities, has been installed. The entire inside has been whitened, painted and varnished. Other minor repairs have been attended to.

City Home

Many repairs and the reshingling of buildings have been taken care of this year. A new chain wire fence has been built along the entire length of the Broadway side, and it is the intention of the Commissioner to continue this fence along the Boulevard side during the coming year.

An addition must be built over office for two more sleeping rooms for help. A 500 gallon water tank for hot water must be installed with connections to steam boiler for winter use and with gas heater for summer use, to supply the needs of the hospital of this department. A new toilet for the help must be installed in the main house to replace antiquated and worn out one now in use.

A new boiler was installed in greenhouse and heating equipment overhauled. The boiler is large enough to take care of proposed addition to greenhouse.

Police Buildings

The Commissioner recommends that a new model Police Station be erected in a more central part of the city to take the place of the present station which is in a very bad condition.

Park Buildings

The completion of the Field House at Dilboy Field has filled a much needed want. The field house is fitted with shower baths and locker rooms for both boys and girls, toilet rooms for the public, electric lights, and modern heating and hot water equipment with an attendant in charge.

Bath House

The public bathhouse on the Mystic River at Wellington Bridge was opened and maintained as usual this year with a good attendance.

About 150 tons of sand were purchased for resanding the beach.

This particular recreation has been a great help to many mothers and children during the hot weather of the past season. It is a common sight to see mothers and children arriving at the beach as early as nine o'clock with their lunches to spend the entire day.

The attendance at the beach during the warm weather has sometimes exceeded 1,000 a day.

Owing to the building of the new Ford plant and the changing of the storm drain it becomes necessary to move the Bathhouse. The Commissioner is hopeful of obtaining land at or near the old beach which is on the North side of the Parkway in rear of Ten Hills. If possible the Bathhouse will be moved and ready for the opening June 17.

In General

The Building Commissioner has had the co-operation of all branches of the City Government, including His Honor, the Mayor, the honorable members of the Board of Aldermen and all the city officials, and desires to thank them for their kindly consideration.

Respectfully submitted,

GEORGE L. DUDLEY,

Commissioner of Public Buildings.

Number of females admitted during 1925	10
Number of males discharged during 1925	9
Number of females discharged during 1925	5
Number of males supported during 1925	36
Number of females supported during 1925	30
Number of males died during 1925	6
Number of females died during 1925	4
Number of inmates in home December 31, 1925	40

Table No. 2

Reimbursements	\$7,384 60	
Net expenditures	9,753 43	
	<hr/>	\$17,138 03
Appropriation and transfers		17,138 03

Respectfully submitted,

J. FOSTER COLQUHOUN,

Warden.

REPORT OF THE CITY PHYSICIAN

Somerville, January 1, 1926

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen:—

The work of your City Physician during the year 1925 is presented in the following abstract:—

Office consultations and treatments	238
Total outside visits	769
Confinements	4
Vaccinations	21
Visits at City Home	172
Attended at Police Station	37

Examinations:—

For legal department	20
For police department	13
For fire department	13
For soldiers' relief department	4
For sanitary department	1
For sewer department	1
For pension	8

Much of the important work of the city physician, such as attendance at hearings, conferences and the like, does not admit of tabulation.

Respectfully submitted,

FRANK E. BATEMAN,

City Physician.

REPORT OF THE LAW DEPARTMENT

To the Honorable the Mayor and the Board of Aldermen
of the City of Somerville:

The annual report of the law department for the year
ending December 31, 1925, is as follows:

An act was secured from the legislature giving the city council of Somerville the powers and authority of park commissioners under the provisions of sections 3 and 14 of chapter 45 of the General Laws, thereby probably making it unnecessary for the city hereafter to secure special acts for the establishment and control of parks and playgrounds.

The metropolitan district commission in October made a taking of lands in East Cambridge and Somerville for the Northern Traffic Artery, so-called, under the provisions of chapter 489 of the acts of 1924 as amended by chapter 319 of the acts of 1925. The act provides that when the work has been completed the part in Somerville shall become a public street of this city. The route of the new way is as follows: Beginning at the Cambridge end of the Cambridge bridge, thence running along the Charles river basin to the Charles river dam; thence along Bridge street through East Cambridge to Somerville avenue; thence along Somerville avenue to Medford street; thence along Medford street across Washington street to the westerly end of Chester avenue near the central fire station; thence across private lands and the location of the Boston and Maine Railroad, Southern Division to Broadway nearly opposite Fellsway East; thence along Fellsway East to Mystic avenue. The width will be about one hundred feet. The act provides that twenty-five per cent of the cost shall be borne by the commonwealth and that three-fourths of the cost shall be paid by the cities and towns specially benefited in such manner as a commission to be appointed by the supreme judicial court shall determine.

In January the supreme court rendered a decision relating to the authority of a school committee in a city to fix the salaries of teachers in the public schools and relating to

the appropriation for that purpose by the city government. At the request of the school committee I gave opinions in reply to several questions on this subject.

An attempt by the city of Woburn to secure legislation that would require the construction of a large drain in that city at the expense of the metropolitan sewerage district was opposed and the general subject matter was referred to the metropolitan district commission. A report has recently been made by the commission adverse to the claims of the city of Woburn.

A zoning ordinance prepared by experts who were employed by the city was examined in detail by members of the planning board and members of the legislative committee of the board of aldermen and myself and after being changed in many important respects was enacted by the city government.

The subject of an extension of the metropolitan water district will soon be before the legislature on a report by a special investigating commission appointed under chapter 491 of the acts of 1924. This district includes nineteen municipalities of which Somerville ranks next to Boston in amount of assessment for expenses. The nature and cost of the extension and the method of apportioning the cost will be important matters for all the municipalities concerned.

A report made to me by Ralph M. Smith, Esq., as assistant in this department, is submitted herewith as a part of this report.

Yours very respectfully,

FRANK W. KAAAN,

City Solicitor.

REPORT OF RALPH M. SMITH, FOR THE YEAR 1925

Street Accident Notices

Pending December 22, 1924	184
New Notices	27
Disposed of and settled	143
Pending December 31, 1925	57

A large number included under the disposed of and settled item is because of the fact that I have removed from the files all those notices which are over two years old and on which legal proceedings have not been brought, there being one hundred twenty-eight under this list, the remaining fifteen being cases which were settled.

All of the pending notices have been investigated, in fact, during the last year the investigation has been much more satisfactory than at the time of my last report. I think now that the cases are in fairly good shape considering the amount of appropriation that I have to work with.

Street Accident Cases in Superior Court

Pending December 22, 1924	17
New cases entered	12
Disposed of and settled	12
Cases pending December 31, 1925	17

Two of the cases disposed of represent cases that went to the Supreme Court on report of the presiding Judge, one of which being determined in favor of the City and the other in favor of the plaintiff. One other case was tried out before a Jury and a verdict of \$3000 rendered against the City against which there is now pending a motion for new trial not yet disposed of.

On the pending cases in addition to the investigation made by the Claims Inspector I have filed interrogatories in each case and have secured all the information by this method. One case has been non-suited as the result of failure to answer interrogatories.

Title Examination

One title on Fairlee Street, Somerville, was examined.

Opinions

Seventeen written opinions have been prepared and submitted to various department heads.

Collection Matters

Pending December 22, 1924	76
Received	41
Disposed of and settled	37
Pending December 31, 1925	80

Twelve suits have been entered on collection matters, two of which are still pending in Court. There are also two suits pending against other cities and towns for disposition of Contagious Hospital and Public Welfare cases.

RALPH M. SMITH.

REPORT OF THE SEALER OF WEIGHTS AND MEASURES

Office of Sealer of Weights and Measures.

City Hall, Somerville, January 1, 1926.

To His Honor, the Mayor, and the Board of Aldermen:—

Other Inspections:

Marking of Bread	112
Paper or Fibre Cartons	350
Cartons Approved as Measures	974
Milk Jars	560
Wholesale Milk Cans	350
Metal Ice Cream Containers	573
Coal Certificates	3
Stone Certificates	3
Weighing of Coal in Transit	3
Weighing of Stone in Transit	3
Taximeters	10

Miscellaneous:

Complaints Investigated	8
Court Cases	3
Total Number Licenses Issued	319

Amount paid City Treasurer for Pedlers' Licenses	988
Amount paid City Treasurer as Sealing Fees	830.72

The taximeter course of two miles has been laid out on Highland Avenue, and is in full working operation. The course is marked with brass plates in curb stone at intervals of $\frac{1}{4}$ — $\frac{1}{4}$ — $\frac{1}{4}$ — $\frac{1}{4}$ — $\frac{1}{4}$ —1 mi. After giving the taximeter the road test of 4 miles, if the meter registers correctly, then there is a time test of one half hour of three minute intervals, and if this test is correct then the meter is sealed, both as to time and mileage.

The deficiency in package goods, was very slight due to shrinkage, and the practice of putting up goods too far ahead was discouraged by the Weights and Measures Department.

There were three cases brought to the attention of the court, and fines imposed; short weight of ice, \$25; inaccurate scale, \$10; and peddling without license, \$10.

As much time as could be given in between other duties was given over to inspection of package goods in stores, the reweighing showed a better percentage of correct weight than the previous year, we also find scales and weighing devices are kept in better condition, and more attention paid to their operation.

The department wishes to extend an invitation to the public to call and see the equipment used in our work, and to see what effort is made for the protection of the people of Somerville. And we will also be only too glad to explain any matter relative to weights and measures.

B. S. ABBOTT,

Sealer of Weights and Measures.

REPORT OF LICENSING COMMISSION

January 25, 1926.

To the Honorable the Mayor and Board of Aldermen of the
City of Somerville:—

Gentlemen :

The Licensing Commission respectfully submits the following report for the year 1925. The Commission has followed its established policy with reference to the matters within its jurisdiction and has kept in close touch with the office of the State Fire Marshal regarding garages in new developments in the city and changing types of construction.

There has been no increase in the number of establishments operating with Lord's Day Licenses at all incompatible with the changing conditions and rising growth in population.

The Commission desires to acknowledge its appreciation of the confidence placed in and the many courtesies extended to it by Mayor John M. Webster, its activities having been thereby rendered pleasant to perform. The Commission also wishes to acknowledge the splendid co-operation of other departments of the City Government connected with its operation.

Applications were received and acted upon by the Commission as follows:

Garage Licenses

423 Applications received.
385 Licenses granted and issued.
28 Applications leave to withdraw.
1 Application no action necessary.
9 Applications laid over to 1926.

Lord's Day Licenses

- 318 Applications received.
- 273 Licenses granted and issued.
 - 8 Transfers of location granted.
- 34 Applications leave to withdraw.
 - 1 Transfer of location leave to withdraw.
 - 1 Application laid over to 1926.
 - 1 Transfer of location laid over to 1926.

Fees for the above licenses granted and issued, amounting to \$2,125.00 were paid over to the City Treasurer.

Respectfully submitted,

EUGENE M. CARMAN, Chairman
WM. H. SMITH,
WM. J. SHANAHAN,
Licensing Commission.

Attest:

R. A. KEYES,
Secretary.

REPORT OF THE POLICE DEPARTMENT

To the Honorable the Mayor and Board of Aldermen of the City of Somerville, Mass.—

Gentlemen:—I respectfully submit the annual report of the Somerville police department, for the year ending December 31, 1925.

ORDINANCES

Somerville, January 1, 1926.

The following ordinances have been adopted since the printing of the annual reports for the year 1924:—

ORDINANCE NO. 110

An Ordinance Amending Ordinance No. 109 entitled "An Ordinance Establishing Fire Districts."

Be it ordained by the Board of Aldermen of the city of Somerville as follows:—

Section 1. Ordinance No. 109 entitled "An Ordinance Establishing Fire Districts" is hereby amended by adding the following to section 1.

Fire District No. 10—Powder House Square

Beginning at the junction of the easterly side of Pearson road and the northeasterly side of Broadway, thence the boundary line runs northeasterly at right angles to Broadway to the boundary line between the city of Medford and the city of Somerville; thence northwesterly on said boundary line to a point one hundred feet northwesterly from Broadway; thence northwesterly in a line parallel with Broadway and distant one hundred feet therefrom to College avenue; thence southerly on College avenue to Broadway; thence southeasterly on Broadway to the point of beginning.

Section 2. This ordinance shall take effect upon its passage.

Approved April 11, 1925.

ORDINANCE NO. 111

An Ordinance to Prevent the Attachment of Notices etc. to poles and other structures in public places.

Be it ordained by the board of aldermen of the city of Somerville as follows:

Section 1. No person shall attach or cause to be attached a sign, placard, notice or any other thing to a tree, pole, post or other structure in a public park, public way or public boulevard.

Section 2. Any person who violates any of the provisions of this ordinance shall be liable to a penalty of not more than twenty dollars for each offense.

Section 3. This ordinance shall take effect upon its passage.

Approved May 15, 1925.

ORDINANCE NO. 112

An ordinance establishing Spring Hill terrace as a one-way street.

Be it ordained by the Board of Aldermen of the city of Somerville, as follows:

Section 1. No person shall cause or allow a vehicle other than a vehicle propelled by hand to pass along any portion of Spring Hill terrace, except in a southeasterly or northeasterly direction between Belmont street and Highland avenue.

Section 2. Whoever violates any provision of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense.

Section 3. This ordinance shall take effect August 1, 1925.

Approved July 28, 1925.

ORDINANCE NO. 113

An Ordinance Relative to Vehicles in Marshall Street

Be it ordained by the board of aldermen of the city of Somerville, as follows:

Section 1. No person shall cause or allow any vehicle to remain standing more than ten minutes on the southeasterly half of Marshall street within two hundred and thirty feet of the southwesterly side of Broadway.

Section 2. This ordinance shall take effect on its passage.

Section 3. Whoever violates any provision of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense.

Approved September 25, 1925.

ORDINANCE NO. 114

Building Zone Ordinance

Printed as a separate document.

ELECTIONS

The following is a statement of the votes cast in the several wards of the city for the candidates for the various offices, at the City Election held therein, November 3, 1925.

REPORT OF THE CITY ENGINEER

OFFICE OF THE CITY ENGINEER,

CITY HALL, SOMERVILLE, JANUARY 20, 1926.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—In accordance with the city ordinances, the following report of the work done and expense incurred for the year ending December 31, 1925, by the Engineering Department and appropriations under my charge and supervision, including the accounts of city engineer, sewers construction, sewers maintenance, parks maintenance, playgrounds maintenance, and other public works, is herewith presented:—the 53rd annual report—my thirtieth report as city engineer.

ENGINEERING DEPARTMENT

In previous reports the general work, charter requirements and city ordinances relating to the duties of the city engineer have been fully described—he shall be consulted in relation to public improvements of every kind when the advice of a civil engineer would be of service. City Engineer is also Supt. of Sewers and Supt. of Parks and grounds.

Divisions	Appropriations and Transfers		Expenditures	Balances
City Engineer	\$13,600 00	\$919 26	\$14,516 57	\$ 2 69

Sidewalks,—comprising profiles, lines, grades, measurements, inspection, titles, costs and assessments	199 84
Water Works,—comprising lines, grades, locations of mains, gates, hydrants, services for buildings, and other matters relating to the department	212 51
Parks and Playgrounds,—comprising surveys, plans, estimates, profiles, and grades, including laying out of parks, playgrounds, boulevard and supervision	238 78
Public Buildings,—comprising surveys, estimates, lines and grades, and other work relating to construction and laying out of grounds	125 25
Street Numbering,—comprising locations of buildings, plans, assigning street numbers, etc.	480 65
Street Lines and Grades,—comprising establishing of lines, grades, and miscellaneous data given parties for building and grading	178 79
Bridges and Grade Crossings,—comprising surveys, plans, profiles, estimates, lines and grades, etc.	10 00
City Survey,—comprising establishing of street lines, acceptance plans, and miscellaneous survey work for city map, etc.	271 24
Middlesex Registry and Land Court,—comprising copying of plans, and abstracts from deeds and examination of titles filed at East Cambridge, also tracing of street acceptance and sewer taking plans, filed for record	138 42
Private Corporations, Railway, Telephone, Electric Light and Gas Light Companies,—comprising grades, plans, profiles and office notes, locations of poles and conduits	159 92
Setting Stone Bounds and Brass Rods,—defining street lines and city boundary lines
Office Work,—comprising record of all locations, indexing, typewriting, bookkeeping, calculations, reports, and general draughting	1,370 04
Miscellaneous Work,—comprising designs, sketches, etc., relating to various schemes for committees
Holidays, Vacations and Sickness	692 82
National Guard Duty	70 00
Engineering,—General Departmental expenses (all divisions) comprising city engineer's salary, auto, telephone, carfares, and supplies	5,737 73
Total	<u>\$14,516 57</u>

Value of field instruments, tools and office instruments,
\$1,500.00.

The total cost of maintaining the Engineer's Division since it was established, 1872-1925, both years inclusive, has amounted to \$479,061.57.

Five assistants have been employed the greater part of the year, on engineering work.

A number of plans were made during the year for street acceptance and five streets have been accepted as public highways under the betterment act.

There are plans for acceptance of ten private streets on file in this office, that for various reasons have not been made public ways.

Middlesex Avenue and a section of Mystic Avenue (between Middlesex Avenue and Austin Street) have been transferred or turned over from State control to the city as public highways—and the city has widened Middlesex Avenue on the easterly side 20 feet, the total width being 80 feet; Mystic Avenue is 66 feet wide. The paved roadways, when fully completed, will be 60 feet and 52 feet in width.

Surveys, calculations, estimates and plans have been made for taking land, buildings and private property for various purposes in certain sections of the city.

Some of the old main thoroughfares should be renumbered their entire length, so as to eliminate half numbers and letters now being used, also certain streets, continuing in bordering cities where numbers conflict.

Perambulation of the Somerville—Cambridge city boundary line. A committee appointed from each city, including the city engineers and street commissioners,—examined the monuments and reference points defining the division line between these two cities. The granite bound No. 7 on Line Street is to be reset.

These boundary lines are perambulated every five years as prescribed by the statutes.

STREETS ACCEPTED AS PUBLIC HIGHWAYS IN 1925, UNDER THE BETTERMENT ACT.

Name of Street	Ward	From	To	Width in ft.	Length in ft.	Date of Acceptance
Boston Avenue	6	Kidder Avenue	Prichard Avenue	40-50	525.45	Dec. 28, 1925
Douglas Avenue	5	Edgar Avenue	Easterly	30	161.32	Dec. 28, 1925
Hardan Road	7	Powder House Blvd.	Southerly	40	183.37	Sept. 30, 1925
Pitman Street	6	Beech Street	Spring Street	30	381.11	Dec. 28, 1925
Smith Avenue	2	Line Street	Beacon Street	23	213.42	Dec. 28, 1925
Total					<u>1,464.67</u>	

..... (0.277 mlle)

STREETS TRANSFERRED FROM STATE CONTROL TO CITY CONTROL

- Middlesex Avenue (Middlesex widened 20 feet on easterly side by City, 1925)
- Mystic Avenue (between Middlesex Avenue and Austin Street)

LENGTH OF STREETS

*Public	87.437
Private	14.470
	<hr/>
Total length of streets	101.907

*Includes 1.406 Miles City Boulevard and Park Roadways
 2.331 Miles State Boulevard
 0.97 Miles State Highway

In the 1910 report, tables were published showing old names of certain streets as formerly known, and names of public Squares in the city; the names of some of these Squares have been changed recently, and new Squares added.

LENGTH OF PUBLIC STREETS IN EACH WARD

	Miles
Ward one	10.824
Ward two	9.952
Ward three	7.630
Ward four	10.026
Ward five	12,658
Ward six	13.966
Ward seven	22.381
	<hr/>
Ttotal length of public street in the city	87.437

Street "Markers"—(Stone Bounds) (Brass rods set in cement sidewalks.)

There are at the present time a total of 662 bounds or brass rods set for defining street lines, and this work should be continued as much as possible each year. These bounds are also of great convenience in establishing permanent "Bench Marks" throughout the city for giving grades.

Previous reports will show location of all street bounds set.

(9) STREETS CONSTRUCTED UNDER BETTERMENT ACT

Type of constructions Granite Edgestone, Concrete Gutters and Bituminous Macadam Roadway.

	Width of roadway	Length in feet
Cady Avenue	26.7	158.1
Corinthian Road	26.7	560.3
East Albion Street	23.3	284.9
Fairfax Street	26.7	933.0
Fremont Street	26.7	182.8
Lewis Street	26.7	416.0
Sunset Road	26.7	656.2
Watson Street	26.7	236.5
Woods Avenue	26.7	1,148.7
		<hr/>
Total	(0.867 Mile)	4,576.5

Average cost \$11.86 per linear foot.

Assessments have been levied on abutting property owners for approximately one-half of the cost of constructing these streets.

STREETS GRANITE PAVED

New blocks and old blocks (re-cut) have been laid on a concrete base with Portland cement grout in

	Square Yards	Length
Middlesex Avenue (west side) (except 24' width old concrete roadway)		
Middlesex Avenue (east side)	9,657.0	2,306.0
Prospect Street (between R. R. bridge and Webster Avenue)	560.0	152.9
Webster Avenue (between Columbia Street and city line) (St. Ry. location)	335.0	610.0
Medford Street (between Broadway and Norwood Ave.)	2,857.0	690.0
Somerville Avenue (southwest side) (between Wilson Square and opposite Central St.)		
Somerville Avenue (northeast side) (between Granite Street and Elm Street)	10,862.1	2,424.1
Mystic Avenue (between Austin Street and Boston line) old blocks and concrete base relaid	3,750.0	1,054.0
Total (1.35 Miles)	28,021.1	7,237.0

STREETS SURFACED WITH WARRENITE (Warren Bros. Patent)

Laid on top old concrete base.

	Square Yards	Length
Broadway (northeast side) (between Magoun Square and Alfred Street)	1,838.0	758.6
Medford Street (between Norwood Avenue and including Gilman Square)	12,381.0	3,191.6
Pearl Street (between Gilman Square and Cross Street)	9,779.0	2,574.0
Total (1.23 Miles)	23,998.0	6,524.2

The total length of permanent paved streets in the city amounts to 18.768 miles.

Permanent street pavement should be extended as rapidly as possible, using old granite blocks, re-cut and laid on a concrete base—the best and most economical pavement for this city.

Grades were given and measurements taken for the reconstruction of five streets with a bituminous wearing surface, a length of 4,670 feet.

In constructing the granite pavement, new bituminous streets and granolithic sidewalks, 14, 283.0 feet (2.70 miles) of new edgestone were set.

TABLE OF STREET CONSTRUCTION

	Square Yards	Miles
*Streets paved with granite blocks	164,917	7.838
**Streets paved with concrete	11,772	.46
†Streets paved with asphaltic top	29,666	1.71
Streets paved with vitrified brick	20,958	1.29
Streets paved with "Bi-co-mac"	2,581	0.22
Streets paved with bitulithic (patent)	37,405	2.03
Combination pavement (concrete base with bituminous top)	81,065	5.44
‡Streets macadamized (bituminous binder)..		47.012
Streets macadamized (water bound)		20.37
Streets graveled or unimproved		15.75
Total		101.91

*Also 31.41 miles (single tract) electric railway paved with granite, asphalt, bitulithic, etc.

**Includes 6,149 sq. yds. concrete roadway Middlesex Avenue.

†Includes 0.97 mile of state highway.

‡Includes 1.406 miles of city boulevard and park roadways and 2.331 miles of state boulevard (Metropolitan District Commission, Park Division.)

There are a number of crossings in this city at intersecting public thoroughfares, where the corners should be cut back and the roadway widened for the safety of traffic and improvement in appearance.

Lines and grades were given and measurements taken for constructing thrity-seven new granolithic sidewalks—4,783 square yards (1.027 miles) and assessments were computed, the abutting property owners paying one-half the cost on twenty-six sidewalks, the remainder the entire cost. City work was done at an average cost of \$3.40 per square yard.

In laying out new work, under orders passed for construction of sidewalks, etc., occasionally portions of buildings and fences are found to be encroaching on the sidewalk and on some of the old rangeways these encroachments have existed for many years; as improvements are made, the full width of sidewalk should be maintained.

In sections of the city where brick sidewalks have been laid many years, and must necessarily be relaid on account of deterioration and unevenness,—cement sidewalks should be substituted in place of brick.

**MILES OF EDGESTONE, GRANOLITHIC, GRAVEL AND BRICK
SIDEWALKS IN EACH WARD**

	Edgestone	Gravel Sidewalk	Brick Sidewalk	Granolithic Sidewalk
Ward one	20.174	3.441	11.843	5.184
Ward two	17.564	6.034	6.340	4.304
Ward three	14.325	0.906	11.527	1.968
Ward four	16.186	0.993	9.548	4.700
Ward five	22.921	4.270	12.103	6.237
Ward six	25.432	3.579	10.475	11.992
Ward seven	36.655	0.556	8.220	24.64
	<hr/>	<hr/>	<hr/>	<hr/>
	153.257	19.779	70.056	59.025

(Details, etc., streets and sidewalks in report of Street Commissioner.)

Plans have been made by the various companies and filed in the city engineer's office, showing the locations of gas mains, poles, tracks and conduits in this city, which have been granted by the board of aldermen during the year;—the work of placing overhead wires in conduits, underground, and removing poles from the streets should be extended as rapidly as possible.

In the City's squares overhead wires should be placed underground, immediately, and practically all poles (except for lights) removed—on the main thoroughfares many of the existing poles should be eliminated, at the present time, being unnecessary.

A special ordinance should be enacted concerning city inspection on all underground work done by private companies or corporations and regulation as to method of street openings.

UNDERGROUND CONDUITS

	Miles laid in City Streets
Boston Elevated Electric R. R.	4.46
Edison Electric Light Co.	15.42
New England Telephone and Telegraph Co.	19.52
City Fire Alarm Wires (located in ducts constructed by Corporations)	12.95
Cambridge Gas Co. (pipe line)	65.96
Charlestown Gas Co. (pipe line)	31.15
	<hr/>
Total	149.46

All locations for sub-surface construction are assigned by this department.

Lines and grades have been given for laying new city water mains. New house services, many gates, hydrants, water posts and blow-offs have been located and recorded, sketches and plans made showing the same, and the water works maps corrected to date; also a large number of old water services where new meters were installed, have been located and recorded.

A number of the locations of old hydrants, gates, etc., have been found to be incorrect, a few having been removed entirely; a new survey of the entire distribution system should be made and the maps and office records compiled. (Length of water mains, details, etc., in report of water commissioner.)

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, including land court plans, have been copied, also titles examined, abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and schedules of assessments made out showing the property owners.

A set of block plans should be made covering the entire city area, from accurate surveys made during the past thirty-five years, and carefully compared section by section with the deed dimensions and areas recorded in the assessors' department, and in this manner the correct areas of land determined.

This set of plans would show the area and dimensions of each lot, all houses and other buildings, sewers, catch basins, house drains, water services, gas mains, underground conduits for wires, street lights, street railway tracks, etc., and be of great value to many city departments. Five of these sectional plans have been partially made. A separate appropriation should be made for completing these plans.

Total number of plans on file in the office approximately eight thousand, eight hundred and fifty.

For the immediate improvement of conditions in this city the highway bridges and approaches over the steam railroads should be rebuilt the full width of the street at Broadway, (North Somerville) Prospect Street and Washington Street, near Union Square; and the steam railroad bridge over Washington Street (East Somerville) reconstructed with increased head-room for street traffic,—the dangerous railroad grade crossing at Park Street should be abolished, as decreed by the courts a number of years ago.

I respectfully refer to some of the more important recommendations and suggestions made in reports of the city engineer for a number of years past, which are for the improvement of conditions in this city.

COMPILED TABLE OF AREAS, USEFUL FOR VARIOUS DEPARTMENTS, SHOWING A SUB-DIVISION OF CITY'S ACREAGE

Land and water, total area city (4.22 square miles)		2700 acres
Water	100	acres

Approximate number of dwellings in city, 15170.		
Average area to a dwelling about 4350 square feet.		
Average persons to an acre (built upon) 65.		
(Somerville is the most densely populated suburban city in the U. S.)		

CITY ENGINEER

SEWER DIVISION

The designing and constructing of sewers, storm drains, catch basins, house drains, etc.,—maintenance of the drainage system and other items in this division are under the direction, supervision and control of the city engineer.

A large number of sewers were petitioned for and constructed during the year in newly laid out streets, on account of extensive building operations.

One of the city's principal outlets for storm water (a structure 7½ feet by 11 feet) had to be re-located and constructed on the easterly side of Middlesex Avenue and thence discharging into Mystic River, on account of the Ford Motor Company's building construction; the old wooden box drain, constructed across this property by the B. and M. R. R. Corporation in the year 1902, being abandoned.

A number of new sewers and storm drains will have to be constructed and alterations made in the city's drainage system, immediately, on account of the laying out and constructing of the new state boulevard and traffic road across the easterly end of this city.

CONSTRUCTION ACCOUNT, STATEMENT OF EXPENDITURES,
1925

Labor (city dept.)	\$5,051 17	
Labor (contract)	68,914 50	
Teaming and trucking	1,017 09	
Materials and supplies	14,236 83	
	<hr/>	
Total Expenditure		\$89,219 59

CLASSIFICATION OF EXPENDITURES

Constructing sewers (separate system)	\$12,410 23	
Constructing sewers (combined system)	29 48	
Constructing storm drains	71,600 69	
Constructing catch basins	4,249 19	
Constructing new manholes on old sewers	146 00	
	<hr/>	
Cost of new work	\$88,435 59	
Materials for other depts.—credits, etc.	91 17	
Materials on hand	692 83	
	<hr/>	
Total		\$89,219 59

CREDIT

Appropriations	\$89,000 00	
Balance unexpended, 1924	3,446 90	
Service Transfers and Credits	6,091 17	
	<hr/>	
Total		\$98,538 07
		<hr/>
Balance unexpended (over to 1926)		\$9,318 48

Twenty-eight new sewers and storm drains were constructed during the year; a length of 16,220 feet, approximately three miles, part of the work being done by department labor, the remainder by contract.

See tabular statement for 1925, showing itemized account of work.

Total length, city's drainage system	118.646 miles
Cost of construction (including catch basins)	\$1,477,741 00

The 1918 report contains a compiled table of Storm Drains constructed showing length, cost, date of construction, district benefited, etc.

Assessments, Metropolitan sewerage system, 1925 (City's proportional cost)	\$109,022 32
Total paid Commonwealth of Massachusetts for state sewer (1892—1925, inclusive)	\$2,025,247 35
Total length Metropolitan sewerage system mains running through this city	3.475 miles
14 connections, in Somerville, with Metropolitan sewerage mains. Locations of city's mains connecting with state sewer in 1912 report, and details of construction in previous reports.	
New catch basins constructed in city's highways 1925	38
Total catch basins constructed and maintained by sewer division	2,004
Other catch basins—State, R. R. Co., etc.	166
Total catch basins in the city for storm drainage purposes	2,170

The "separate system" sewers should be extended in the older sections of the city each year, as the appropriation will allow, and storm drains completed in certain localities as previously recommended:—especially in the North Somerville District, where the discharge is across the boundary line into City of Medford, "Two Penny Brook" outlet; also a "flooding relief" project in Morrison Avenue—Highland Road area and the B. and M. railroad valley; and a storm overflow at the East Cambridge line extending from the Somerville Avenue sewer and discharging into Miller's River.

No agreement has been reached concerning a new location and size of outlet for discharging storm water into Mystic River, where the Consolidated Rendering Co. has placed filling material in the natural drainage outlet and along the shore of the river.

Sidewalk sewers in Mossland Street should be constructed immediately and sections of the old sewers in Poplar Street and Franklin Avenue reconstructed,—thereby relieving the continuous blocking of house drains in these streets under existing conditions.

Appropriation	\$25,000 00	
		<hr/>
Balance unexpended		\$17 88

Value of tools and property on hand, maintenance of Sewers, \$2,000.

A permanent force of men, varying in number from eight to thirteen per week, and teams are kept continually at work flushing, cleaning and repairing the city's drainage system, catch basins, etc., the expense necessarily increasing yearly as lengths of sewers, storm drains and catch basins are added to the system, and the distance increased to the dumping places, which are fast diminishing, only two being available at present.

The scarcity of dumping places has confronted the city for some time and various schemes have been considered for efficient and economical methods of disposal but no feasible plan has been adopted.

Material removed from catch basins and hauled to dumps	cubic yards	3250
Average cost, (labor \$1.78; teaming \$2.46)		
	per cubic yard	\$4 24
Average cost, cleaning, flushing and general maint- enance	per basin	\$6 87
Average cost, cleaning and flushing drainage system including catch basins	per mile	\$166 30

There are about twenty catch basins (average) to a mile of roadway in this city.

An auto-truck cleaning machine for catch basins, of an approved design, could be used advantageously in this city about one-half time during the year—the result being speedier cleaning; and at other times utilized in various work in other divisions of the Engineering Department.

A number of repairs have been made on some of the old sewers, alterations made in the outlets and overflows, and extra manholes built for the purpose of improving the system.

Many catch basins and manholes have been repaired.

Three hundred and eighty-four permits have been issued to licensed drain layers for connecting buildings with main sewers and storm drains; eighty-nine being for repairs, alterations or extensions, all of the work being done under the supervision of the city's inspector.

Many of these repairs and alterations were made necessary by the growth of tree roots in the private drain pipe. In several cases, these private drains were relaid with iron pipe and lead joints; which is the type of construction recommended by this department, where drain connections have become stopped on account of tree roots.

Certain persons are licensed as drain layers by the city and are under bonds, for the purpose of laying and repairing these private drains:—none others are permitted to do this work.

Reference to data concerning each drain connection with the public sewer is on file in this office, and time and expense could be saved by the owner, by applying directly to this department for investigation and advice, where trouble exists.

A number of car track catch basins and underground conduit manholes have been connected with the city's drainage system.

There are to date about 17,666 private drain connections with the city's drainage system.

A better system of grease traps should be installed in the premises of some of the larger manufacturing plants and rendering companies to prevent large amounts of grease and waste products from escaping into city sewer mains and at various times has partially blocked sections of sewers.

PARKS AND PLAYGROUNDS DIVISION

This division has the care and maintenance of about 82 acres of land laid out as parks and playgrounds, being about equally divided in area—pleasure parks and playfields.

Seventy-three acres are owned by the city and certain areas owned by private parties are turned over to the city for recreation purposes, also satisfactory arrangements have been made for a number of years past, whereby the city has the use of Tufts College playfields during the summer vacation months.

These areas when completely developed will compare favorably with other cities in the vicinity.

Assessments for Metropolitan parks and boulevards (City's proportional cost)	\$86,198 34
Total paid Commonwealth of Massachusetts—Metropolitan park system, to January 1, 1926	\$1,238,932 42
Total length Metropolitan boulevard in Somerville	2.33 miles

The route across this city of the new boulevard and traffic road—Northern Traffic Artery has been determined; land has been taken and a number of buildings removed and probably construction work will be commenced immediately.

All of the city's playfield areas have been in constant use throughout the year;—special supervision was provided by the Welfare and Recreation Commission during the months of July and August especially for the children's activities, to make the playgrounds popular and successful; an exhibition featured the closing of the summer work.

Tufts College playfield was under the city's supervision during the summer,—“twilight baseball” being very popular.

At the athletic field bordering Alewife Brook, a permanent field house has been constructed with all modern equipment and construction of an out-door winter running track commenced, which will also provide a hockey rink and wading pool. The remaining area should be graded as soon as possible and when completed as originally designed, the city will own one of the best recreation fields in the vicinity.

(In the 1910 report, plan shows proposed complete laying out.)

The city has become so densely populated (averaging nearly 25,000 people a square mile) that some of the larger park areas should be more extensively utilized for public recreation and physical training purposes. On several of the playfields concrete buildings should be constructed, additional apparatus and shelters provided and some of the smaller playground areas should be enclosed by wire fencing for protection.

In certain localities of the city, well-lighted playgrounds, during the summer evenings, should be maintained for the young men and women who are obliged to work in the day time.

Previous reports are respectfully referred to for suggestions and recommendations for improvement of park and playground areas.

In connection with the departmental work, the Welfare and Recreation Commission, the Playgrounds Association and Women's Clubs have been of great assistance in advising, directing and promoting the city's welfare. (Details, etc., in Commission's and Association reports.)

(See city auditor's report for total expenditure by city departments and commissions for recreation and play the past year.)

APPENDED TABLE

Annexed to this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1910 report, tables were published showing old names of certain streets as formerly known, and the names of public squares in the city.

Respectfully submitted,

ERNEST W. BAILEY,

City Engineer.

Total length of streets in the city, 101.91 miles.

REPORT OF THE STREET COMMISSIONER

OFFICE OF THE STREET COMMISSIONER,

City Hall, Somerville, January 1, 1926.

To His Honor, the Mayor, and the Board of Alderman:—

Gentlemen :—I most respectfully submit the fiftieth annual report, containing a brief summary of the principal work performed by the Highway Department, by day labor and contract, during the year 1925 with recommendations for necessary additions the coming year.

This department has charge of the construction, alteration, repair, maintenance and management of ways, streets, sidewalks and bridges; the setting out and care of shade trees; the suppression of gypsy and brown tail moths, elm leaf beetles and other pests which destroy trees; and the oiling and watering of streets.

Highway Department Appropriations

	Appropriations	Expenditures
Highway Maintenance	\$115,986 03	\$115,315 45
Sidewalks Maintenance	10,300 00	10,297 90
Street Sprinkling	37,600 00	37,401 90

	<hr/>	<hr/>
	\$525,632 21	\$502,112 19
	<hr/>	<hr/>

Somerville has not receded from its policy of road improvements. The good accomplished, the dividends occurring, the benefits conferred are so apparent that this city is spurred on to greater efforts.

Our people are demanding roads that will meet the traffic requirements of today, roads that will bear the shock of great loads at high speed, roads over which motor vehicles can operate with economy, roads over which all kinds of highway traffic can operate regardless of weather or season, roads that will render a profit instead of creating a deficit.

The coming spring the new Northern Arteryway, connecting the North and South Shores, will be started and although Somerville will lose a considerable amount of taxable property it will be a great improvement in caring for the traffic that passes through our city.

1925

Snow and Ice

The benefit of snow removal is valuable to trade and industry by having the highways open to motor vehicles one hundred per cent of the year. There is hardly an item of household consumption that is not transported, at some point in its distribution, by motor truck. The doctor, ambulance, mail, police and fire departments depend on motor driven vehicles.

Another motor driven plough has been added to the department this year.

This department cares for the sidewalks around all public buildings and grounds.

257 requests and reports were attended to.

\$8,531.14 was expended for the removal of Snow and Ice. 2989 cubic yards of snow and ice were removed. 93 $\frac{1}{4}$ cubic yards of sand and 147 cubic yards of ashes were used in caring for icy sidewalks, streets and crossings.

Bridges

The bridges are in good condition. The painting of the iron fences, under the care of the Highway Department was completed this year. Some of the railroad bridges should be widened to conform with the width of the roads approaching the same.

Street Railways

The Boston Elevated Railway Company reconstructed double tracks on Somerville avenue from near Granite street on the north side and near Park street on the south side to Wilson square, and on Mystic avenue from the Boston line to near Austin street.

The double tracks on Broadway from Teele square to the Arlington line and on Highland avenue should be reconstructed.

They also removed the double tracks on Medford street and Pearl street from Broadway to Cross street.

Underground Wires

Permits were issued to the Edison Electric Illuminating Company to open streets for the construction or enlarging of conduits on School street from Highland avenue to Medford street and on Medford and Pearl streets to their terminal poles on intersecting streets and services; on Broadway from Walnut street to School street for the new White Way, the new lights were turned on by Mayor Webster and in honor of this event the merchants, in this district, had a parade and band concert.

To the New England Telephone and Telegraph Company for enlarging conduits on Pearl street from Marshall street to their office at Bradley street and for underground connections and services on Medford and Pearl streets.

The Boston Elevated Railway Company removed their trolley poles and wires on Medford and Pearl streets.

Crushed Stone

20 tons of crushed stone were purchased from William J. Sullivan Company at their quarry for \$1.75 per ton, and 5485 cubic yards for \$2.80 per cubic yard delivered on the line of work. 136 tons of pea stone at \$1.75 per ton and 221 tons No. 2 stone at \$1.50 per ton were purchased from Coleman Brothers at their quarry and 47 tons at \$2.95 per ton were delivered on the line of work. 108 tons of crushed stone were purchased from Rowe Contracting Co. at \$2.30 per ton.

Sidewalks Maintenance

Money spent for repairing sidewalks is well invested.

4956 linear feet of edgestone were reset. 2525 square yards of brick sidewalks were relaid and 244 square yards of granolithic relaid. 3298 square yards of granolithic were substituted for old brick sidewalks. This kind of work should be continued.

Police reports pertaining to all kinds of defective sidewalks are charged to this appropriation.

\$10,297.90 was expended for Sidewalks Maintenance.

Street Sprinkling

All the tar used under this account was applied by the department's employees and equipment. Cold tar was delivered into storage tanks situated in the city stables yard by the Trimount Oil Company at \$.097 per gallon.

The American Car Sprinkler Company sprinkled and flushed our main streets where there are car tracks for \$975.00 a month, seven days a week.

Dust layers used during the year :—

182,615 gallons of Tarco B, Trimount Oil Company.

5,000 gallons Non-Asphaltic Oil, Trimount Oil Company.

30,000 pounds Calcium Chloride.

\$37,401.90 was expended for Street Sprinkling.

Street Cleaning

Very few complaints were received in regard to dirty streets. The two motor pick-up sweeping machines were kept to work continually and in many instances two shifts of men were used, thus keeping the machines working day and night. There is also a night cleaning gang who cares for the squares.

5250 cubic yards of street sweepings were removed.

\$25,052.75 was expended for Street Cleaning.

Suppression of Moths

This department cares for all trees both public and private in regard to moths.

- 8,329 street trees were inspected and cared for.
- 14,912 private trees were inspected and cared for.
- 22,831 bushes were found moth infested.
- 13,061 fences and buildings on which moths nested.
- 25,387 gypsy moth nests were painted with creosote.
- 13 brown tail moth nests were gathered and destroyed.
- 170 satin moth nests were painted with creosote.
- 6,248 trees were sprayed by the gasoline spraying machine to exterminate the different kinds of caterpillars and beetles.
- 34,939 tussock moth nests were destroyed.

\$4,748.47 was expended for the Suppression of Moths.

Shade Trees

Many dead and dangerous trees were removed during the year.

- 66 trees were set out.
- 217 trees were removed.
- 269 trees were trimmed by request.
- 91 tree guards and supports were installed.

\$5,467.97 was expended for the Care of Trees.

The above streets were reconstructed or resurfaced with Bituminous Macadam.					
Broadway	N'ely side, Magoun square	Opp. Cedar street			4,615 71
The above street was resurfaced with Warrenite pavement.					

Highway Construction—New Streets

Nine new streets were constructed during the year under the Betterment Act, by contract, viz :—

Setting edgestones 70c per linear foot.

Gutter construction \$3.50 per square yard.

Construction of Macadam roadway \$1.65 per square yard.

The city furnished the edgestone delivered on the line of work for \$1.34 per linear foot and also the asphalt for 19c per gallon.

Three new streets were constructed by City employees.

Five new streets were accepted this year.

\$54,318.72 was expended for New Streets.

Sidewalks Construction

The average cost of granolithic sidewalks constructed by department employees, including excavation and all materials was \$3.46 per square yard, the abutters paying half the cost of construction.

Miles of edgestone, granolithic, brick and gravel sidewalks in the city :—

Edgestones	153.257 miles
Gravel sidewalks	19.779 miles
Brick sidewalks	70.056 miles
Granolithic sidewalks	59.025 miles

\$16,471.35 was expended for Sidewalks Construction.

Highway Construction—Permanent Pavement

The city now has a fine thoroughfare on Medford and Pearl streets from Broadway to Cross street. The Boston Elevated Railway Company removed their double car tracks and a concrete base was constructed (the sides of these two streets already had concrete) the Warren Bros. then placed a Warrenite mixed top for a wearing surface from curb to curb.

On the portion of Medford street known as Magoun square from Broadway to the easterly line of Norwood avenue, the old rails and the concrete on the sides were removed, a new concrete base was constructed with granite cut blocks and grouted with Portland Cement. The merchants on this section of the street were so pleased with the new construction they had a parade, band concert and block party to celebrate the completion of this paving.

Middlesex avenue which had a strip of concrete twenty-four feet wide with gravel sides has been widened eight feet on the west and twenty-eight feet on the east side making a permanent roadway sixty feet wide. This widening was con-

structed with concrete base, granite paving blocks grouted with Portland Cement and edgestones set on both sides. Ford's new plant will be situated on this throughfare.

Mystic avenue from the Boston line to near Austin street has been repaved, a new concrete base and recut granite blocks were laid where needed.

Prospect street from Webster avenue to the Boston and Maine Railroad bridge has been constructed with a concrete base and granite cut blocks grouted with Portland Cement.

On Webster avenue from Columbia street to the Cambridge line the space between the car tracks (known as the dummy) was relaid with cut granite blocks grouted with Portland Cement.

On Somerville avenue the north side from Granite street and the south side from near Park street to Wilson square the old granite blocks were removed, recut and laid on a new concrete base grouted with Portland Cement.

\$200,586.11 was expended for Permanent Pavement.

Reconstruction and Resurfacing

Five streets were reconstructed or resurfaced this year at an average cost of \$1.75 per square yard by city employees. By reconstructing a few side streets each year the city will keep the streets in first class condition.

\$32,451.57 was expended for Reconstruction and Resurfacing.

Micellaneous

- 165 Granolithic driveways constructed.
- 111 Brick driveways constructed.
- 61 Edgestones dropped for driveways.
- 4 Driveways extended.
- 3 Driveways discontinued.

Driveways are constructed, discontinued, relocated or extended at the expense of the petitioners.

Two horses were killed on account of disability.

Three horses were purchased during the year.

The department maintains its own municipal repair shop for the different lines of work.

I have attended meetings of the Public Works, Mayor Webster as Chairman, Public Works Committee and the Board of Aldermen for consultation regarding work and petitions.

Traffic Control

The United States Department of Commerce reports for the fifty-three weeks period ending Jan. 2, 1926 that Somerville has had fewer fatalities than any other city of comparable size in the country except Norfolk, Va. The Highway Department maintains all the traffic signs, lanterns, lines and lights. The Police Department lights the lanterns at night. Several safety zones have been established. Traffic and danger lines were painted on the streets. "Be Careful" signs were erected for the Somerville Safety Council. Line signs were erected at the bordering City and Town lines.

Adequate space for highway traffic and effective regulations of its use by vehicles and pedestrians are among the most pressing present day municipal needs.

The impossibility of providing a traffic officer at every street corner has resulted in a rapidly increasing need for traffic signs, signals or lines of some kind. To relieve some of the dangerous situations there has been a gradual introduction of one way streets.

Permits

There were during 1925 :—

- 157 permits issued to the Cambridge and Charlestown Gas Companies.
- 100 permits issued to cross sidewalks.
- 584 permits issued to occupy streets and sidewalks.
- 27 permits issued to feed horses.
- 6 street sprinkling complaints and requests.
- 153 notifications to other departments and corporations.
- 57 accident reports.
- 1008 police reports.
- 849 brick and granolithic sidewalks repaired.
- 1404 miscellaneous reports and requests.
- 191 drain layers permits.
- 821 water department openings.
- 198 permits to open streets and sidewalks.
- 96 danger and traffic signs erected.
- 37 new signs erected.
- 198 signs repainted.
- 87 streets cleaned by request.
- 4678 cubic yards of sand and gravel used.
- 5778 cubic yards of dirt removed.
- 937 cubic yards of ashes used.
- 917 cubic yards of old macadam used.
- 5620 bags of Portland cement used.
- 6 cubic yards of loam used.

Recommendations

I most respectfully recommend the repaving of Somerville avenue from Union square to Medford street and the granite blocks that would be left from this reconstruction work could be used to complete the northerly side of Beacon street from Buckingham street to Park street. That a new bituminous mixed top be laid on Broadway from Teele square to Arlington line and on Broadway south side from Edmands street to Boston line. On Prospect street from Webster avenue to Cambridge line the tar top should be stripped off the concrete base and recut granite paving blocks should be laid on the old base, grouted with Portland Cement.

Portions of the brick paving in Davis square should be relaid, using granite cut blocks grouted.

This department should have a fire proof garage.

As Mayor Webster, whom I have served under for four years is to retire at the end of this year, I desire to express my appreciation for the co-operation and interest he has taken in this department.

I wish to extend my sincere thanks to all for their support and co-operation.

Respectfully submitted,

ASA B. PRICHARD,

Street Commissioner.

REPORT OF THE COMMISSIONER OF ELECTRIC LINES AND LIGHTS

Somerville, Mass.

February 1, 1926.

To the Honorable, the Mayor and the Board of Aldermen of
the City of Somerville.

Gentlemen :—

I most respectfully submit my seventeenth annual report as Commissioner of Electric Lines and Lights for the year ending December 31, 1925.

Inspection of Wiring in Buildings.

Electrical installations have increased in number over last year and constant supervision must be maintained to see that the work is safe and up to standard requirements.

Considerable defective work has been found most of which has been done by amateurs and unlicensed men who pose as electricians and such work is a menace to the whole district.

The improper use of appliances, some of which have never been approved, have resulted in numerous fires.

These appliances are found attached to lighting sockets on fixtures generally causing the protective fuses to blow out, and these are often replaced by improper ones introducing a fire hazard.

Flat irons, washing machines, cooking and heating appliances require a separate circuit for each.

Inspections are followed up as closely as possible and wiring as a whole shows some improvement.

No work should be accepted or paid for until inspected and approved.

One assistant inspector was appointed last year but another is needed to make periodical re-inspections of old work.

Number of notifications of new work	2960
Number of inspections of new work	4817
Number of re-inspections of new work	624
Number of inspections of old work	40
Number of defective installations of old work	10
Number of defective installations remedied	10
Number of re-inspections of old work	10
Total number of inspections	5491
Number of permits issued to the Edison Electric Illuminating Co. for installing meters, lamps, etc.	7480

Fire Alarm System

The Fire Alarm System is in excellent condition but some of the older apparatus should be replaced.

Several new boxes will be required in the newly developed parts of the City.

358 bell alarms have been received and transmitted during the year.

782 telephone calls for fire were received and fire department sent.

2 A. D. T. alarms were received and transmitted.

The central office equipment consists of the following :—

- 2— 6 circuit operating boards.
- 1— 5 circuit tapper board.
- 1— 5 circuit gong board.
- 2—16 circuit storage battery charging boards.
- 1—32 circuit protector board.
- 1—12 circuit automatic repeater.
- 1— dial 4 number manual transmitter.
- 2— 5 circuit punching registers.
- 13 punching registers and take up reels.
- 2 automatic time and date stamps.
- 1 master clock.
- 950 cells storage battery.
- 5— 10 foot 4 shelf battery racks.
- 4 metropolitan tappers and 2 gongs.

The apparatus outside the central office consists of the following :—

- 136 signal boxes.
- 7 tower strikers
- 45 gongs.
- 10 punching registers.
- 20 tappers.
- 8 private telephones.

About 63 miles of overhead wires and 81 miles of underground wires. One new box has been installed No. 724 Mystic Valley Parkway and Irvington Road.

8500 feet of overhead wire has been run and 20,400 feet of old wire removed.

2,400 feet of underground cable was installed.

Police Signal System

The police Signal System is now about 13 years old and some of the apparatus will have to be replaced constant repairs being necessary to keep it working.

Some trouble has been found with signal boxes but service has not often been interrupted.

A number of boxes have been overhauled and parts replaced.

A new register and time stamp for the signal desk is necessary at once as old ones are beyond repair.

New batteries will be needed and desk overhauled.

The system consists of the following :—

- 1— 4 circuit police desk.
- About 19 miles of overhead wire.
- 3 special boxes.
- 59 street signal boxes.
- About 15 miles of underground cable.

Supervision of Poles and Wires on the Streets

The same attention has been given to the condition of poles and wires on the streets as in previous years. A number of defective poles have been replaced by the companies owning same.

New poles have been placed in locations granted for the purpose of supplying lighting and telephone service and abandoned poles have been removed.

	New Poles	Re-placed	Re-moved	Re-set
New England Telephone & Telegraph Co.	5	57		15
Edison Electric Illuminating Co.	66	222	9	5
Boston Elevated Railway Company				2
Postal Telegraph Company.....		2		
Permits given to the New England Tel. & Tel. Co. for attachments to the Edison Company's poles	50			
Permits given to the Edison Electric Ill. Co. for attachments to the New England Tel. & Tel. Company's poles	54			

Street Lighting

A number of new lights have been added and some have been changed. The lights on Medford Street from Gilman Square to Magoun Square have been changed from 600 C. P. to 1000 C. P. and mounted on underground posts and the entire street has been cleared of overhead wires.

The new "White Way" on Broadway, Winter Hill is a great improvement in the lighting of that district.

The number of street lights January 1, 1926 are as follows :—

214— Magnetite lights.
22— 1000 C. P. lights.
378— 600 C. P. lights.
133— 125 C. P. lights.
991— 60 C. P. lights.

Recommendation

I respectfully recommend that another assistant inspector be employed to enable the department to more thoroughly cover all new and old installations of electrical wiring in the City. This is imperative as with the increase of new electrical inspections required in the City, old work cannot be properly checked up.

Conclusion

I wish to thank His Honor, the Mayor, the members of the Board of Aldermen and the several departments for the many courtesies received.

Respectfully yours,
WALTER I. FULLER,
Commissioner of Electric Lines and Lights.

SOMERVILLE WATER WORKS

SOMERVILLE, MIDDLESEX CO, MASSACHUSETTS

Settled, when part of Charlestown, 1630
(Home of Colonial Governor John Winthrop)
Incorporated a town, 1842
Established a city, 1872

Location: Somerville City Hall (near centre of the city) is 2¾ miles northerly from State House, in Boston.

Greatest extent of the City north and south about 4.2 miles.

Greatest extent of the City east and west about 2.1 miles.

Elevation Highland avenue at City Hall 105 feet above mean low water.

Lowest building elevation in the city 13 feet

Highest building elevation in the city 145 feet

Area of city, including land and water, about 4.22 square miles

Land, 2,461.50 acres; water and marsh, 238.50 acres

Population, 1920 census, 93,033

Present population, estimated, 100,000

Entire population on line of pipe and supplied with water

Water works owned by City of Somerville

Construction commenced in 1868

Source of supply: Metropolitan system, taking water of the Nashua river at Clinton, Mass.

Range of pressure on street mains:

Low service 35 to 65 pounds

High service 45 to 100 pounds

Mayor

HON. JOHN M. WEBSTER

Water Commissioner

REPORT OF THE WATER COMMISSIONER

OFFICE OF THE WATER COMMISSIONER,
January, 1926.

To His Honor, the Mayor, and the Board of Aldermen:—

I present herewith my report for the year ending December 31, 1925, this being the fifty-first annual report of the water department and my twenty-fifth as water commissioner:

Revenue and Expenditures

Water bills have been issued as follows:—

“Annual” water charges, amounting to	\$7,244 50
“Additional” water charges, amounting to	1,741 81
“Metered” water charges, amounting to	279,380 71
	\$288,367 02
Adjustments	1,165 21
	\$287,201 81
Income from sale of water	
Receipts; water service assessments	\$12,417 97
Receipts; labor and materials sold:—	
Misc. accounts charged	8,185 46
Adjustments	843 66
	7,341 80
	19,759 77
Total income of water works	\$306,961 58

This amount was used as follows:—

For water works purposes:—

Under Control of the Water Commissioner

Water Works Maintenance	\$69,943 10
Water Works Extension	53,408 69
Miscellaneous accounts:	
Maintenance	\$7,341 80
Extension	47 39
	7,389 19
	\$130,740 98

Not Under Control of the Water Commissioner

Metropolitan water works assessment	\$138,498 07
Maintenance water works buildings	1,828 91
	\$140,326 98

For other municipal purposes:—

Not Under Control of the Water Commissioner

Surplus	\$35,893 62
Total	\$306,961 58

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use and it is paid for out of the income from sale of water.

Department Receipts and Disbursements

WATER MAINTENANCE ACCOUNT

Appropriations made by Board of Aldermen		\$81,000 00	
Department accounts; receipts		1,179 55	
Water works extension account; receipts		34,936 72	
Amount expended for labor and materials for operation, maintenance, and renewal of the water works	\$69,943 10		
Amount expended for materials used in extension of the water works	34,936 72		
Miscellaneous accounts	7,341 80		
Labor and materials furnished municipal departments	1,179 55		
Extension Account; amount refunded	47 39		
Transferred to other accounts by Board of Aldermen	3,635 00		
Balance	32 71		
		<u>\$117,116 27</u>	<u>\$117,116 27</u>

WATER WORKS EXTENSION ACCOUNT

Appropriations made by Board of Aldermen...		\$54,000 00	
Water Maintenance account: refunds		348 45	
Amounts paid Water Maintenance Account...	47 39		
Service for Public Building	301 06		
Amount expended for labor and materials used in extension of the water works...	53,408 69		
Balance	591 31		
		<u>\$54,348 45</u>	<u>\$54,348 45</u>

Cost of Water Works

The total cost of water works on December 31, 1924, as represented by the expenditures from appropriations for water works extension was	\$1,187,641 73
Expended during the year 1925, on extension account	\$ 53,408 69
Total expenditures, December 31, 1925....	<u>\$1,241,050 42</u>

Water Works Income from 1898 and its Distribution

The water income and its distribution from 1898 to 1925, inclusive, is shown in the following table:—

Total water income	\$6,869,460 83
Distribution:—	

Water Works Account

Water works Construction, Renewal, Maintenance, Operation and Miscellaneous Accounts	\$1,895,290 80
Water bonds	274,000 00
Interest	86,575 00
Metropolitan Water Assessments	2,825,935 66
Maintenance Water Works buildings	16,584 63
	\$5,098,386 09

Other Municipal Accounts

Various municipal departments through specific appropriations and general revenue account	\$1,771,074 74
	\$6,869,460 83

Water Distribution System—Construction

STREET MAINS

Approximate number of feet of street mains in the city, January 1, 1925. (including hydrant branches and blow-offs)		555,296
Feet of street mains laid in 1925	8,338	
Feet of hydrant branches laid in 1925	190	
Feet of blow-off branches laid in 1925	26	
	8,554	
Total feet of pipe laid	8,554	
Feet of pipe removed or replaced	334	
	8,220	
Net increase in feet of pipe		8,220
Total approximate feet of pipe in the city		563,516
Total pipe mileage, approximately		106.72

The sizes and lengths of pipe laid and discontinued are as follows:

Size	Feet Laid	Feet Discontinued	Size	Feet Laid	Feet Discontinued
¾"	0	0	6"	1,215	0
1"	108	51	8"	596	0
1½"	0	44	10"	2,994	24
2"	149	215	12"	2,926	0
4"	113	0	16"	66	0
			20"	387	0

The pipes constructed and replaced during the year are as follows:—

	Size	Feet Laid	Feet Discon- tinued	Size Discon- tinued
Bailey Road	10"	893		
Century Street	8"	316

	<hr/>	
Number now in city		15

Water Service Connections

Interpreting "Water Services" to mean service connections in use on live supplies it appears from a study of old records, elimination of old service connections through combination with other supplies, abandonment of old service connections, etc., that the number of services actually in use in the city on January 1, 1925 was		13,516
The number of new service connections brought into use during the year was.....	189	
The number of old service connections restored to use	75	
	<hr/>	
		264
The number of service connections shut off during the year for permanent or temporary non-use of water was	166	
	<hr/>	

Increase in number of services in actual use	98
The total number of services in use on December 31, 1925, was approximately	
ly	13,614
These services, under state law, are all required to be metered.	
In addition to the above there are fire supplies for sprinkler systems, which are not at present required to be metered, to the number of	
	62
The number of new service connections installed during the year was 251 but not all of these are yet in use, or "alive."	
The number of feet of pipe laid in making these connections was 9,062.	

Size, number and length of services installed in 1925:—

$\frac{3}{4}$ "—220—7837'	1"—13—370'	$1\frac{1}{2}$ "—4—66'
2 "— 5— 215'	4"— 2—293'	6 "—7—281'

Number of fire supplies installed during 1925 (Included in above)	7	
Location of Fire Supplies	No.	Size
Linwood St., No. 161; Ernest P. Robitaille, Public Garage	1	6"
Beacon St., No. 266; Albert S. Walsh, Public Garage	1	6"

*Resurvey

Summary of Pipes and Fixtures of the Water System December 31, 1925

Feet of main pipe (approximately)	563,502
Services in use (approximately)	13,614
Fire supplies (sprinkler systems)	62
Public fire hydrants	1,231
Private fire hydrants	66
Gates	2,142
Check Valves	9
Meters	13,206
Motor registers	2
Waterposts	62
Car-sprinkler connections	15
Blow-offs	193
Drinking fountains and troughs	8

WATER ASSESSMENTS AND CONSUMPTION

The assessment paid to the Commonwealth by this city as its proportionate part of the cost and operation of the Metropolitan Water Works for the year 1925 was as follows:—

Sinking Fund	9,494 07
Maintenance	39,301 10
Interest	80,534 66
Maturing Bonds	4,686 40
Brookline Credit	4,481 84
Total payment for 1925	138,498 07

The amount paid by this city since the beginning in 1898 is as follows:—

Sinking Fund	431,646 32
Maintenance	614,168 24
Interest	1,682,650 71
Maturing Bonds	29,073 54
Miscellaneous	68,396 85
Total payments to date	2,825,935 66

There has been credited to the city by the Commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district and water furnished to water companies, the sum of \$9,056.10.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the Metropolitan water works, is shown below by months for the year 1925:—

Month	Gallons per day	Gallons per capita	Month	Gallons per day	Gallons per capita
January	8,163,200	83	July	8,423,700	85
February	7,765,900	79	August	8,295,800	84
March	7,449,300	75	September ...	8,282,600	83
April	7,375,700	75	October	7,976,700	80
May	7,590,800	77	November ...	7,653,800	77
June	8,492,700	86	December ...	7,977,000	80

The consumption for the year was:—

Low-service	2,265,204,000 gallons
High-service system	638,555,000 gallons
Total consumption	2,903,759,000 gallons
Average daily consumption	7,955,500 gallons
Average daily consumption, per capita, for Somerville	80 gallons
Average daily consumption per capita, for Metropolitan district	99 gallons

The following table shows the daily per capita consumption of water in the cities and towns in the Metropolitan Water District for the year 1925, as registered by the Metropolitan meters.

City or town	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Year
Arlington	62	58	55	58	68	78	70	70	69	63	56	52	63

Boston	89,724,700	115	94.11
Everett	5,281,000	126	89.38
Total District	128,349,800	99	95.08

*Metropolitan District Commission Report for 1924.

Operation — Maintenance — Construction

The constantly increasing routine work of the department has kept our maintenance and operating forces busily engaged.

Much building activity has taken place in the easterly part of the city through the acquisition of a large tract of land on Middlesex avenue by the Ford Motor Company for

an assembling plant, and the development of the so-called Ten Hills Farm, a tract covering many acres which once contained the country residence of Colonial Governor John Winthrop. This "Farm" has now been laid out with streets and about 300 house lots upon which many residences have been erected during the year. Several thousand feet of street mains with service pipes, fire hydrants, controlling valves and blow-offs have been installed to meet present requirements of a water supply in these developments.

Tracts of smaller area in other parts of the city have been developed residentially and all have received needful supplies of water.

Important work in connecting dead ends of mains to improve the water circulation in the distribution system has been accomplished in Mystic Avenue, Crown Street and Powder House Boulevard. In the latter street an additional check-valve was installed to automatically feed the high-service district from the low-service system in case of need through failure of the high-pressure mains to properly function.

251 new service pipes have been laid, showing an increase of 96 over the previous year. Meters or meter connections have been installed to meet all requirements of consumers and of the State laws.

A summary of the streets in which water pipes were laid appears earlier in this report; the lengthy detailed items of the work done which have in previous years appeared in these pages are now kept on reference file in the general office of the water department.

As much as possible of the construction work of the year has been done by contract under supervision of the water commissioner.

Northern Traffic Artery

Much study has been given the proposed new traffic road which is to be built through Somerville by the Commonwealth in relation to its effect upon the water pipes now in use. Some changes will undoubtedly need to be made and preparations for the same are under way. Service connections have already been cut off from more than forty dwelling houses that have been vacated and other work has been accomplished.

Water Consumption

The water consumption for the year has risen three points to an average of 80 gallons per capita daily and the receipts from sales of water have correspondingly increased.

Water Rate Collections

The burden of collecting the water rates falls upon the water department. How well this is accomplished is shown by the following results, which gives the water commissioner justifiable pride:—

The table gives the number and amount of metered water bills rendered in each month of the year 1925. Each bill covers a period of three months use of water.

Section and Qr.	Date of Bills	Number of Bills	Amount to be Collected
1-4	January 1	3826	\$32,290 54
2-1	February 1	4960	19,578 13
3-1	March 1	4315	15,644 66
1-1	April 1	3830	36,006 67
2-2	May 1	4968	19,616 88
3-2	June 1	4320	14,658 66
1-2	July 1	3835	32,494 03
2-3	August 1	4970	20,610 66
3-3	September 1	4326	15,889 29
1-3	October 1	3844	35,933 04
2-4	November 1	5022	20,658 40
3-4	December 1	4338	14,595 16

At the time of going to press with this report these bills have all been paid, making the record of collections 100 per cent.

The above record is made possible largely through our method of closely following up delinquencies and the judicious use of the gate wrench.

It has been found necessary to apply the provisions of the recently enacted Water Rate Lien Law in but one instance and this bill was then promptly paid.

Financial

All bills against the department for the year have been paid, so far as known, and the books show a surplus of receipts from departmental activities amounting to \$35,893.62.

Acknowledgment

The water commissioner appreciates the constructive help of mayor, aldermen, business associates, employees and citizens who have cooperated with him in his work of carrying on this large and important public service of our city.

Respectfully submitted,

FRANK E. MERRILL,

Water Commissioner.

SUMMARY OF STATISTICS

FOR THE YEAR ENDING DECEMBER 31, 1925

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS

SOMERVILLE, MIDDLESEX COUNTY, MASS.

General Statistics

Population, census 1920, 93,033; present, estimated 100,000.

Date of construction: Commenced in 1868.

By whom owned: City of Somerville.

Source of supply: Metropolitan water system.

Mode of supply: Water is delivered into the city's mains, under both high and low pressure, by the Metropolitan Water Works.

Statistics of Consumption of Water

Census population, 1920, 93,033.

Population on lines of pipe, Dec. 31, 1925, 100,000.

Population supplied, Dec. 31, 1925, 100,000.

Total consumption for the year, 2,903,759,000 gallons.

Average daily consumption, 7,955,500 gallons.

Gallons per day to each inhabitant, 80.

Statistics Relating to Distributing System, 1925**MAINS**

Kind of pipe, cast iron.

Sizes, from 4-inch and under to 20-inch.

Laid 8,554 feet; discontinued 334 feet; net extension, 8,220 feet.

Total now in use, 106.7 miles.

Number of hydrants added during year (public, 18, private, 0) 18.

Number of hydrants (public and private) now in use, 1,297.

Number of stop gates added during year, 80.

Number of stop gates now in use, 2,140.

Number of blow-offs, 193.

Range of pressure on mains, 35 pounds to 100 pounds.

SERVICES

Kind of pipe: Lead; lead-lined wrought iron; cement-lined wrought iron; cast iron.

Sizes, one-half to eight inches.

Laid 9,062 feet.

Number of service connections made, 251.

Services in use, approximately, 13,614.

Number of fire supplies (sprinkler systems), 62.

Number of meters added, 471; meters and motor registers discontinued, 277; net increase, 194.

Number now in use, 13,206.

Percentage of services metered, 97.7.

Percentage of water receipts from metered service, 97.

Number of motors and elevator registers added, 0; removed, 1.

Number now in use, 2 (included in number of meters.)

REPORT OF SANITARY DEPARTMENT

February 18, 1926.

To the Honorable, the Mayor, and the Board of Aldermen of
the City of Somerville.

Gentlemen :

The report of the Sanitary Department for the year 1925 is respectfully submitted herewith.

Collections of Ashes and Paper

	Ashes (Cubic Yards)	Paper (Cubic Yards)
January	17,881	4,330
February	14,187	3,710
March	13,565	3,360
April	12,333	3,780
May	9,987	3,320
June	9,264	3,500
July	9,750	3,500
August	10,060	3,680
September	9,207	3,320
October	10,268	4,680
November	11,608	3,320
December	13,098	3,770
	141,208	44,270

During the year the Sanitary Department paid to the Highway Department \$2,661.91 for the use of teams and \$1,357.00 for board of horses.

The paper and combustible materials are being disposed of at the incinerator plant, the city receiving a revenue of \$400. per year for the paper. The garbage is collected by contract, twice a week from May 15th to October 15th and once a week for the period from October 15th to the following May 15th. Ashes and non-combustible refuse are collect-

ed principally with automobile trucks on account of the distance to the dumps used by the department which are located in Medford and subject to the rules and regulations of the Board of Health of the City of Medford.

The Medford dumps are fast filling up and I recommend that Somerville take action as soon as possible to provide dumping facilities for its refuse.

Respectfully submitted,

EDGAR T. MAYHEW,

Supt. of Sanitary Dept.

REPORT OF SOMERVILLE PLANNING BOARD

December 31, 1925.

To His Honor, the Mayor, and Board of Aldermen.

Gentlemen:—

As required by the provisions of Chapter 494 of the Acts of 1913 the Planning Board herewith submits its annual report, together with recommendations for the year 1926, as herein contained.

Organization

The Planning Board met and organized for the year 1925, the following members being present: John Williamson, George J. Rauh, Waldo D. Phelps and David J. Kelley. The Board elected John Williamson Chairman and David J. Kelley Secretary for the ensuing year.

The Zoning of Somerville

On April 28, 1923 the City of Somerville, through its Planning Board, employed the Technical Advisory Corporation of New York to make a preliminary survey of the city to gather the necessary data for the purpose of later making a comprehensive city plan and zoning ordinance. The report of these expert city planners is contained in our report for that year.

In 1924 the Planning Board again urged the City Government to appropriate sufficient funds to complete the work of zoning the city but no action was taken.

It was therefore again requested by the Planning Board in its report for the year 1924 that it be given the necessary appropriation to carry out its recommendations for zoning the city. In the early part of 1925 the Board of Aldermen on the recommendation of Mayor John M. Webster approved an appropriation of \$10,000 to do the work, but stipulated

that work of zoning should be done by the Planning Board working in conjunction with a special committee of the Board of Aldermen. As a result the Planning Board invited several different expert city planners to appear before the Board of Aldermen and the Planning Board to give their views and submit estimates of the cost of furnishing a complete zoning map and ordinance for Somerville.

After hearing the different ideas expressed and the estimates given, the Planning Board employed the Technical Advisory Corporation of New York to complete the work it had begun.

The contract was signed on July 2, 1925, and work was immediately started, which finally resulted in the submission to the Planning Board of a comprehensive zoning ordinance and map dividing the city into six different use districts or zones. The ordinance and map were then presented to the Board of Aldermen and referred to its Legislative Committee for consideration. After numerous meetings of the Legislative Committee and the Planning Board the ordinance was reported to the Board of Aldermen by Albert E. Hughes Chairman of the Legislative Committee, in order that a public hearing could be arranged for and final action taken by the Board of Aldermen.

At the public hearing it developed that most of the citizens appearing were in favor of the immediate enactment of the ordinance but there were some objectors who were later satisfied. The ordinance was finally passed by the unanimous vote of the 19 members of the Board of Aldermen who were present. A copy of the ordinance as finally passed with the zoning map is submitted with this report.

Mayor John M. Webster, the Board of Aldermen of 1924 and especially the hardworking Legislative Committee of the Board may well feel proud of this legislation which the Planning Board is certain means so much for the future growth and welfare of our city, and the protection of the health, comfort and property rights of its citizens.

Recommendation for 1926

There are two important matters that the Planning Board wishes again to call to the attention of the Mayor and Board of Aldermen, namely:—

1. The enactment of a new building code.
2. A more equitable plan of assessing real estate.

With reference to the building code the Planning Board last March submitted a new building code to the Board of Aldermen which has yet to be acted upon and reported by the Legislative Committee. The Planning Board is aware that this ordinance should receive careful study but believes that it should be taken up by the new city government without further delay. It is very necessary that the building code should be enacted so that it will not conflict with some of the provisions of the zoning ordinance but no doubt the Legislative Committee will have the zoning law in mind when considering the building code.

The other important recommendation as to the assessing of real estate has been approved by the Board of Aldermen but will require a much larger appropriation than was required for the zoning ordinance.

The Planning Board believes that it is better to have this important matter done with great care even if the first expense seems great.

The formation of a new system of assessing real estate will result in a fairer and more equal sharing in the burdens of government so that all land owners similarly situated will be treated alike. All real estate will be assessed in accordance with a definite rule or plan and not depend solely on the judgment of the assessors. It will also be of great assistance to the assessors in fulfilling their duty to the city and to all property owners.

The Planning Board also submits the following recommendation for 1926:

1. The widening of the railroad bridge near Ball Square on Broadway to relieve the present dangerous traffic conditions at that point.
2. The further use and development of Saxon C. Foss Park formerly Somerville Park by providing a playground on that part adjoining Mystic Avenue and generally making the park more useful and attractive than at present. This could be done with very little expense to the city. The city engineer, Ernest W. Bailey, has a plan drafted which can be seen at any time. This plan shows more in detail what can be done to make this park the beauty spot of the city.
3. The enlarging of the present fire districts to include all of Broadway; all of Holland Street; all of Elm Street to Somerville Avenue, all of Somerville Avenue to Union Square; and Medford Street from Highland Avenue to Washington Street.

4. The widening of Highland Avenue by taking 30 inches off the sidewalk on each side of the street. This would mean moving the curbing and would not require the taking of any private property. This improvement would help to relieve traffic congestion on this main throughfare.

5. The widening of the railroad bridge on Cross Street to relieve traffic conditions at that point.

Mystic River Development

The time is coming when the city will not have enough available dumping ground to take care of the ashes and refuse. Let us take steps now to save heavy expense later when it will be necessary to lighter the city refuse and ashes down Boston Harbor to be dumped into the ocean, the same as is now necessary in the City of Boston. A municipal wharf on the Mystic River west of the Wellington Bridge at some point between the Bridge and the Hinckley Rendering Company Plant would be an asset to the City of Somerville and certainly a great help in the further development of the River.

The Planning Board again urges upon the city government the necessity of taking some land on the river front to be utilized as a wharf by the city, before any new buildings or other development has taken place which would increase the damages to be paid for the taking.

Appropriations

During the year 1925 the Planning Board expended and accounts for its appropriation as follows:—

Zoning the city	\$7,196 62
Telephone	25 20
Clerical Services	90 95
Expense to Convention	58 00
Printing and Advertising	42 00
Other supplies	122 30
Framing Plans	230 00
	<hr/>
	7,765 07
Balance returned to city Treasury	2,234 93
	<hr/>
Total	\$10,000 00

For the year 1926 the Planning Board requests an appropriation of \$35,000 in order that it may undertake the work of formulating a new system of assessing real estate and also

carry on its work as outlined in the recommendation contained in this report. In connection with the work necessary to insure a new system of assessing real estate the Planning Board requests the co-operation of the Board of Aldermen and the appointment of a special committee of said Board of Aldermen to work with the Planning Board.

Respectfully submitted,

JOHN WILLIAMSON, *Chairman.*

WALDO D. PHELPS.

GEORGE J. RAUH.

DAVID J. KELLEY, *Secretary*

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT

To the Honorable, the Mayor and the Board of Aldermen,

Gentlemen :

In compliance with the City Ordinance, I have the honor of submitting, for your information, the annual report of the fire department for the year ending December 31, 1925.

Alarms and Losses

Number of bell alarms	359	
Number of still alarms	830	
Total alarms		1,189
Number less than 1924		17
Value of buildings at risk	\$3,762,750	00
Insurance on buildings	4,267,635	00
Damage to buildings	259,880	41
Value of contents	1,670,515	00
Insurance on contents	594,365	00
Damage to contents	148,861	06
Total value at risk	4,862,000	00
Total damage	408,741	47
Approximate per capita loss		4 08

Classification of Causes of Alarms

Dump	151
Bonfires	118
Out of town	126
Grass	65
Spark on shingle roof	52
Automobiles	51
Electric wires and appliances	51
Careless smoker	49
Set by children	48
Chimney fires	44
Unnecessary	43
Defective heaters	42
False alarms	41
Unknown	32
Spontaneous ignition	28
Overheated heaters	27
Careless use of matches	23
Children playing with matches	21
Rubbish in the cellar	21
Leaves and Christmas trees	13
Miscellaneous	143

1,189

Manual Force

The manual force consists of one hundred and nineteen (119) permanent men, during the year one has been retired and placed on the pension list, one has been added from eligible list of the Civil Service.

The roster of the department is as follows,—

- 1 Chief Engineer.
- 1 Deputy Chief,
- 2 District Chiefs,
- 7 Captains,
- 1 Master Mechanic,
- 11 Lieutenants,
- 2 Enginemen,
- 94 Permanent men.

Apparatus

- 1 Motor driven, 1,300 gallon pumper and hose wagon,
- 1 Motor driven, 900 gallon pumper and hose wagon,
- 2 Motor driven, 750 gallon pumper, hose wagon and chemical,
- 1 Tractor drawn, 800 gallon steam fire engine,
- 5 Motor driven, combination hose and chemical wagons,
- 1 Motor driven, combination ladder truck and chemical,
- 2 Motor driven, tiller steering ladder trucks,
- 1 Automobile, Chief's car,
- 1 Automobile, Deputy Chief's car,
- 1 Automobile, District Chief's car,
- 1 Automobile, Master Mechanic's car,
- 1 Automobile, Service car,
- 1 Automobile, hose wagon used for dump service.
- 1 Motor driven, ladder truck, in reserve.

Hose

The amount of serviceable hose is 9,450 feet of two and one-half ($2\frac{1}{2}$) inch double jacket, rubber lined, water hose and 2,050 feet of three quarter inch chemical hose. There has been 1,500 feet of new two and one half inch purchased and 1,950 condemned, also 300 feet of new chemical hose purchased and 400 feet condemned. At least 2,000 feet of new hose should be purchased the coming year.

Brief Resume

The fire starting in the Columbia Bag Wood Co. on September 3rd. amounted to 25% of the year's total loss: The losses by months were,

January	\$11,499 17
February	69,344 08
March	14,001 99
April	5,512 00
May	77,443 33
June	40,828 13
July	7,989 00
August	9,417 73
September	104,001 56
October	13,008 25
November	17,546 28
December	38,149 95
	\$408,741 47

Needless Causes of Alarms. Setting fires at the dump, bonfires, burning grass and false alarms, summoning the apparatus 436 times the past year, are malicious and unnecessary, the calls of this character are increasing from year to year, some drastic steps should be taken to abate this abuse of men and equipment; the city has been lavish in the expenditure of money for the purchase of the best fire-fighting machines and they should be preserved and protected for service at legitimate alarms.

Chimney Fires and Overheated Heaters. Fires of this character are increasing; owing to the shortage of coal and the use of many substitutes together with the installation of oil burners constitute a grave menace if proper attention is not given to the cleaning of chimneys and heaters, fires should never be started until the soot and carbon have been removed, otherwise a dangerous fire is inevitable with the attendant loss of property and possibly life.

Electric Appliances and Wires. The many labor saving devices designed to be used in connection with electricity have been a prolific cause of starting many fires, this class of fires can and should be entirely eliminated by the exercise of proper care in disconnecting the current when not in use.

Recommendations

The increase in number of the 4, 5 and 6 storied apartment buildings demands the providing of a quick raising ladder as an adequate means of prompt service for the saving of lives and property, to that end, I recommend the purchase of a seventy-five foot aerial truck.

As in my last report, I recommend the replacement of the tractor-drawn steam fire engine at the Central Station with a motor driven pump of at least 1,000 gallons capacity; at the time of the purchase of the steamer, thirteen years ago, it was similarly used throughout the country, this type of pump has been replaced by the up-to-date, less expensive to operate and more efficient motor driven pump; more than two-thirds of the fires are answered by the apparatus at the Central Station, therefore, the latest and best type of equipment should be provided.

Again I recommend the abolition of the present quarters occupied by Engine Company No. 4 at the corner of Highland Avenue and Grove street and the erection, at a more suitable place, of a building adequate for housing of the apparatus and habitable for the men in the Davis Square section of the city.

In Conclusion

In concluding this report, I wish to express to His Honor, Mayor Webster and the members of the Board of Aldermen my appreciation for their consideration and co-operation in the welfare of the department.

I commend the members of the department for their devotion to duty thereby assisting in maintaining its recognized high standing.

Respectfully submitted,

SEWALL M. RICH

Chief Engineer.
